

Pass Guaranteed Quiz 2026 Fantastic Nutanix NCP-CI-Azure: Practice Test Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Pdf

DOWNLOAD the newest ExamBoosts NCP-CI-Azure PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1udgfdvX53Rpod3P71aBzkXiSkz8_yTbe

In this competitive IT industry, having some authentication certificate can help you promote job position. Many companies that take a job promotion or increase salary for you will refer to how many gold content your authentication certificates have. Nutanix NCP-CI-Azure is a high gold content certification exam. Nutanix NCP-CI-Azure authentication certificate can meet many IT employees' needs. ExamBoosts can provide you with Nutanix certification NCP-CI-Azure exam targeted training. You can free download ExamBoosts's trial version of raining tools and some exercises and answers about Nutanix certification NCP-CI-Azure exam as a try.

As we all know that if you can obtain the NCP-CI-Azure certification, your life will change from now on. There will be various opportunities waiting for you. You take the initiative. It is up to you to make a decision. We only live once. Don't postpone your purpose and dreams. Our NCP-CI-Azure Real Exam will escort your dreams. You will get better jobs as well as higher salaries to lead a better life. Come to fight for your bright future and buy our NCP-CI-Azure practice braindumps right now!

>> Practice Test NCP-CI-Azure Pdf <<

NCP-CI-Azure Testking, Authorized NCP-CI-Azure Exam Dumps

If we waste a little bit of time, we will miss a lot of opportunities. If we miss the opportunity, we will accomplish nothing. Then, life becomes meaningless. Our NCP-CI-Azure preparation exam have taken this into account, so in order to save our customer's precious time, the experts in our company did everything they could to prepare our NCP-CI-Azure Study Materials for those who need to improve themselves quickly in a short time to pass the exam to get the NCP-CI-Azure certification.

Nutanix NCP-CI-Azure Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Managing an NC2 on Azure Environment: This section relates to skills in identifying management tasks for nodes and clusters. Candidates will monitor cluster health and cloud resource performance, ensuring that all components function efficiently. Understanding these management tasks is vital for maintaining operational integrity in a hybrid cloud environment.

Topic 2	<ul style="list-style-type: none"> • Configuring an NC2 on Azure Environment: This section evaluates the skills of IT Administrators and emphasizes modifying cloud networking security to protect resources. Candidates will configure Nutanix networking settings and troubleshoot connectivity issues to ensure seamless communication within the cloud environment.
Topic 3	<ul style="list-style-type: none"> • Planning an NC2 on Azure Deployment: This section of the exam measures the skills of IT Administrators and covers the preparation of the Azure cloud environment, including determining the appropriate Azure account and node types. It also involves subscribing to the NC2 service, which requires knowledge of authentication methods and organization naming conventions. Additionally, candidates must determine implementation requirements by evaluating deployment use cases and redundancy needs. Identifying networking requirements is crucial, focusing on connectivity options like VPN and CIDR ranges.
Topic 4	<ul style="list-style-type: none"> • Deploying an NC2 on Azure Environment: This section assesses the skills of Nutanix Cloud Operators and focuses on deploying the cloud cluster within the Azure environment. Candidates will learn to configure cloud provider networking effectively, ensuring that all necessary resources are correctly set up for deployment.

Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Sample Questions (Q28-Q33):

NEW QUESTION # 28

An administrator is planning on building the network prior to deploying a Nutanix cluster into Azure. Which two components require their own vNets for NC2 in Azure? (Choose two.)

- A. Virtual Network Gateway
- B. Bare-metal instance
- C. Prism Central
- D. Azure Load Balancer

Answer: B,C

Explanation:

* NC2 on Azure Deployment: Deploying Nutanix clusters in Azure involves configuring various components, each needing appropriate network isolation and configuration.

* Components and vNets:

* Bare-metal instance: Requires its own vNet to ensure proper network isolation and performance.

* Prism Central: Needs a dedicated vNet to manage and monitor the Nutanix environment, ensuring it has the required network access and isolation.

* Azure Load Balancer: Does not require its own vNet but needs to be associated with the appropriate vNet where services are deployed.

* Virtual Network Gateway: Is used for VPN connections but does not necessitate a separate vNet; it operates within an existing vNet.

* Network Isolation: Providing separate vNets for Bare-metal instances and Prism Central ensures optimal performance and management capabilities.

* Conclusion: Both Bare-metal instances and Prism Central require their own vNets in the NC2 on Azure deployment.

NEW QUESTION # 29

An administrator must ensure that certain NC2 VMs can access Azure resources. The NC2 VM traffic must not traverse the internet.

How would the administrator achieve this?

- A. By creating an Azure Private Endpoint for VMs in a No-NAT network via vWAN.
- B. By creating an Azure Private Endpoint for VMs in a NAT network via vWAN.
- C. By creating an Azure Private Endpoint for VMs in the host-mgmt subnet.

- **D. By creating an Azure Private Endpoint for VMs in a Delegated Subnet**

Answer: D

Explanation:

- * Azure Private Endpoint: A Private Endpoint provides secure connectivity to Azure resources by enabling private access through the Azure backbone network. This ensures that the traffic does not traverse the internet, providing enhanced security and performance.
- * Delegated Subnet: By creating an Azure Private Endpoint for VMs in a delegated subnet, the administrator ensures that the VMs can access Azure resources directly and securely without using the public internet.

References:

- * Azure Private Endpoint Documentation
- * Nutanix NC2 Networking Configuration Guide

NEW QUESTION # 30

Which two options are prerequisites for deploying an NC2 cloud cluster in Azure? (Choose two.)

- **A. A my.nutanix.com account**
- **B. A valid CIDR range**
- C. An Azure Express Route circuit
- D. An on Premises Prism Central environment

Answer: A,B

Explanation:

Valid CIDR Range: When deploying an NC2 cloud cluster in Azure, a valid CIDR range is necessary to define the IP address space for the cluster and its associated networks. This range ensures that there are no conflicts with existing network configurations and provides sufficient addresses for the cluster resources.

My Nutanix Account: A my.nutanix.com account is required to access Nutanix services and manage NC2 deployments. This account allows administrators to log in, configure settings, and manage their Nutanix environment on Azure.

Azure Virtual Network Documentation

NEW QUESTION # 31

An administrator deploys a new NC2 cluster in Azure in a new subscription. No VPN or Express Route exists. Which two actions will allow the administrator access to Prism Central to start the configuration? (Choose two.)

- **A. Deploy a Jump Host VM instance in the Prism Central VNet inside a delegated subnet.**
- **B. Deploy a Jump Host VM instance in an external VNet and peer the VNets.**
- C. Deploy a Jump Host VM instance and NAT Gateway in an external VNet and peer the VNets.
- D. Deploy a Jump Host VM instance in the Prism Central VNet inside a non-delegated subnet.

Answer: A,B

Explanation:

* Jump Host VM in External VNet with VNet Peering:

* Deploy Jump Host VM: Deploy a VM in an external VNet that is not within the same network as Prism Central.

* VNet Peering: Establish VNet peering between the external VNet and the Prism Central VNet.

This allows the Jump Host to communicate with Prism Central securely.

* Jump Host VM in Prism Central VNet Inside a Delegated Subnet:

* Deploy Jump Host VM: Deploy the Jump Host VM directly in the Prism Central VNet within a delegated subnet. This places the Jump Host in the same network environment as Prism Central, allowing direct access.

NEW QUESTION # 32

An administrator is tasked to identify the firewall requirement and submit the port request to the requirement team before the clusters

deployment.

Which requirement should the administrator ensure is implemented on the corporate firewall?

- A. Allow uni-directional Internet Control Message Protocol (ICMP) traffic between the CVMs, Prism Element, and Prism Central.
- **B. Allow bi-directional Internet Control Message Protocol (ICMP) traffic between the CVMs, Prism Element, and Prism Central.**
- C. ICMP can be disabled but the connectivity should be enabled between the CVMs, Prism Element, and Prism Central.
- D. ICMP and connectivity can be disabled between the CVMs, Prism Element, and Prism Central.

Answer: B

Explanation:

ICMP Traffic: ICMP is essential for network diagnostics and troubleshooting, such as ping and traceroute, which help in monitoring the connectivity and health of the network.

Bi-Directional Traffic: Allowing bi-directional ICMP traffic ensures that all nodes (CVMs, Prism Element, and Prism Central) can both send and receive diagnostic messages, which is crucial for maintaining proper communication and network stability.
