Have you imagined that you can use a kind of study method which can support offline condition besides of supporting online condition? The Software version of our Salesforce-Media-Cloud training materials can work in an offline state. If you buy the Software version of our Salesforce-Media-Cloud Study Guide, you have the chance to use our Salesforce-Media-Cloud learning engine for preparing your exam when you are in an offline state. We believe that you will like the Software version of our Salesforce-Media-Cloud exam questions.

Salesforce Salesforce-Media-Cloud Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> Implement: This section of the exam measures skills of a Salesforce Solution Architect and focuses on implementing the Media Cloud solution based on business and technical requirements. It includes supporting CI CD deployment processes, planning data migration with an understanding of the data model, selecting appropriate integration approaches for media-specific contexts, applying security settings to control data access, and ensuring performance outcomes align with defined KPIs and non-functional expectations.
Topic 2	<ul style="list-style-type: none"> Design: This section of the exam measures the skills of a Salesforce Media Cloud Consultant and covers the process of designing scalable and efficient Media Cloud solutions. It focuses on creating solution flows using ASM capabilities, applying best practices in solution architecture, recommending product model and pricing strategies, and aligning designs with the Media Cloud data model. It also evaluates the candidate's ability to set up sharing and permission sets, identify integration points, assess reporting needs, and determine deployment strategies that fit within a CI CD environment.
Topic 3	<ul style="list-style-type: none"> Discovery: This section of the exam measures the skills of a Salesforce Solution Architect and covers the ability to assess business and technical requirements for implementing Media Cloud applications. It includes determining the technical scope for a statement of work (SOW), mapping use cases to Salesforce Media Cloud components, understanding how third-party systems integrate with the Media Cloud ecosystem, outlining system flows based on the existing business environment, and identifying relevant non-functional requirements based on customer needs.

Quiz 2026 Salesforce Trustable Salesforce-Media-Cloud: Salesforce Media Cloud Accredited Professional (AP) Exam Test Collection

In order to pass the exam and fight for a brighter future, these people who want to change themselves need to put their ingenuity and can do spirit to work. More importantly, it is necessary for these people to choose the convenient and helpful Salesforce-Media-Cloud test questions as their study tool in the next time. Because their time is not enough to prepare for the exam, and a lot of people have difficulty in preparing for the exam, so many people who want to pass the Salesforce-Media-Cloud exam and get the related certification in a short time have to pay more attention to the study materials. In addition, best practice indicates that people who have passed the Salesforce-Media-Cloud Exam would not pass the exam without the help of the Salesforce-Media-Cloud reference guide. So the study materials will be very important for all people. If you also want to pass the exam and get the related certification in a short, the good study materials are the best choice for you. Now we are going to make an introduction about the Salesforce-Media-Cloud exam prep from our company for you.

Salesforce Media Cloud Accredited Professional (AP) Exam Sample Questions (Q31-Q36):

NEW QUESTION # 31

Cloud Kicks has been using Media Cloud for the last three months and now wants to send order data over to the Google Ad Management platform.

What does a Consultant need to create in Salesforce to specify the callout URL?

- A. Connected App
- B. Named Credential**
- C. Custom Metadata
- D. Auth. Provider

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Named Credentials provide a secure and declarative way to specify callout URLs along with authentication information, simplifying integration with Google Ad Manager. Connected Apps and Auth Providers manage authentication but do not directly specify callout URLs.

NEW QUESTION # 32

A Media Publisher is using Advertising Sales Management (ASM) to manage their B2B Ad Sales business. During the creation of a media plan, a Consultant wants to see analytical insights using the View Insights button on the Add and Configure Placements screen.

Which system should the Consultant use to achieve this?

- A. Marketing Cloud Intelligence
- B. Tableau
- C. Google Ad Manager
- D. Custom Ad Server

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Marketing Cloud Intelligence provides advanced analytical insights integrated into Media Cloud ASM, including the View Insights feature in media plan placement. This system offers cross-channel campaign performance data, which cannot be achieved through custom ad servers or GAM alone.

NEW QUESTION # 33

A Media Cloud customer utilizes Industries Order Management to manage advertising publishing. Order Management orchestrates the fulfillment steps across multiple external systems, such as inventory management for reserve/assign ad placement, ad servers, and a billing system for invoicing.

Which two guidelines should a Consultant follow when designing an orchestration plan to external systems?

Choose 2 answers

- A. Create a master end-to-end plan to sequence the major milestones of all orders.
- B. Use a single swim lane or orchestration plan for all callouts to all external systems.
- C. Fully describe all Commercial product entities using product attributes.
- D. Create separate orchestration plan definitions for provisioning, logistics, inventory, and/or billing.

Answer: A,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Designing orchestration plans benefits from creating a master end-to-end plan for sequencing order milestones and breaking orchestration into separate plans per functional area (provisioning, logistics, billing) to manage complexity and integration points.

Using a single swim lane or over-describing commercial products is not recommended.

NEW QUESTION # 34

A Media Cloud customer needs to integrate Google Ad Manager (GAM) with an existing middleware system using an integration procedure.

What is the most secure way for a Consultant to implement the authentication and credentialing requirements for the integration, while also minimizing customization?

- A. Create a remote action in the integration procedure that calls a custom Apex Class.

- B. Modification on integration procedure is not needed since this is through middleware and the existing named credential is not utilized.
- C. Implement a custom OAuth to authenticate with middleware, storing credentials in the integration procedure.
- D. **Create a new authentication provider with custom metadata and use it within a named credential.**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Using a Named Credential with a custom Authentication Provider that stores client credentials in custom metadata ensures secure storage and easy maintenance. This reduces the need for custom OAuth flows in the integration procedure or Apex code, which increases complexity and maintenance.

NEW QUESTION # 35

A publishing company has an existing media plan creation process that was setup using OmniStudio a few months ago. A new requirement has come up where the user will be required to enter a new secondary budget field and this field should be stored with the rest of the media plan details.

On which object should a Consultant add this field so that it is stored with the rest of the media plan and can be added to the appropriate OmniScript?

- A. Opportunity
- B. Order
- C. **Media Plan Placement**
- D. Quote

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The Media Plan Placement object holds detailed line-item level data related to media plans, including budgets and schedules. Adding the new secondary budget field here allows it to be managed alongside other media plan details and be exposed in OmniScripts that drive the media plan creation process. Opportunity, Order, and Quote objects do not store placement-level budget fields.
