And our 220-1102 study braindumps will help you pass the exam easily and get the certification for sure.

CompTIA A+ Certification Exam: Core 2 Sample Questions (Q468-Q473):

NEW QUESTION # 468

A technician is troubleshooting a user's PC that is displaying pop-up windows advertising free software downloads. When the technician tries to open a document, the system displays an error message: "Not enough memory to perform this operation." Which of the following should be the technician's next step to resolve this issue?

- A. Install antivirus software
- B. Upgrade the browser
- **C. Install antispyware**
- D. Reimage the system
- E. Disable the pop-up blocker

Answer: C

NEW QUESTION # 469

A department has the following technical requirements for a new application:

The company plans to upgrade from a 32-bit Windows OS to a 64-bit OS. Which of the following will the company be able to fully take advantage of after the upgrade?

- A. Hard drive
- B. CPU
- C. Touch screen
- **D. RAM**

Answer: D

Explanation:

<https://www.makeuseof.com/tag/difference-32-bit-64-bit-windows/>

After upgrading from a 32-bit Windows OS to a 64-bit OS, the company will be able to fully take advantage of the RAM of the computer. This is because a 64-bit operating system is able to use larger amounts of RAM compared to a 32-bit operating system, which may benefit the system's overall performance if it has more than 4GB of RAM installed.

NEW QUESTION # 470

A user is unable to access a web-based application. A technician verifies the computer cannot access any web pages at all. The computer obtains an IP address from the DHCP server. Then, the technician verifies the user can ping localhost, the gateway, and known IP addresses on the internet and receive a response. Which of the following is the MOST likely reason for the issue?

- A. The browser cache needs to be cleared
- B. The incorrect DNS address was assigned.
- C. The wrong VLAN was assigned.

Answer: A

Explanation:

Explanation

DNS (domain name system) is a protocol that translates domain names to IP addresses. If the computer has an incorrect DNS address assigned, it will not be able to resolve the domain names of web-based applications and access them. A firewall, a VLAN (virtual local area network) and a browser cache are not the most likely reasons for the issue, since the computer can ping known IP addresses on the internet and receive a response.

NEW QUESTION # 471

Which of the following protects a mobile device against unwanted access when it is left unattended?

- A. PIN code
- B. Antivirus software
- C. OS updates
- D. BYOD policy

Answer: A

Explanation:

Explanation

A PIN code is a numeric password that protects a mobile device against unwanted access when it is left unattended. It requires the user to enter the correct code before unlocking the device. OS updates, antivirus software and BYOD policy are other security measures for mobile devices, but they do not prevent unauthorized access when the device is left unattended. Verified References:

NEW QUESTION # 472

You have been contacted through the help desk chat application. A user is setting up a replacement SOHO router. Assist the user with setting up the router.

INSTRUCTIONS

Select the most appropriate statement for each response. Click the send button after each response to continue the chat. If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

To: Customer

I just received a new router for the office, and I need help setting it up.

I am happy to assist you today.

I need to set up my basic security settings.

Is this the first router in your office?

No, it is a replacement. The last router broke.
I am currently logged in and connected to the router's web page.

The first thing you need to do is change the default password.

Create a new password with an uppercase, a lowercase, and a special character.

That is complete now, and the router is asking to reboot. Should I reboot to move on?

Yes, reboot please.

What is next?

Do you know the name of the network you connected to before?

Yes.

Change the SSID to the previously used network name.

Also, make sure to change your wireless password to the one previously used.

That is done. Thank you for your help.

You are welcome. Is there anything else I can help you with?

No, I am all set.

NEW QUESTION # 473

.....
