## 最真實的NSK300認證考試資料匯總

什麼是NewDumps Netskope的NSK300考試認證培訓資料？網上有很多網站提供NewDumps Netskope的NSK300考試培訓資源，我們NewDumps為你提供最實際的資料，我們NewDumps專業的人才隊伍，認證專家，技術人員，以及全面的語言大師總是在研究最新的Netskope的NSK300考試，因此，真正相通過Netskope的NSK300考試認證，就請登錄NewDumps網站，它會讓你靠近你成功的曙光，一步一步進入你的夢想天堂。

## 最新的 Netskope NCCSA NSK300 免費考試真題 (Q39-Q44):

### 問題 #39

You built a number of DLP profiles for different sensitive data types. If a file contains any of this sensitive data, you want to take the most restrictive policy action but also create incident details for all matching profiles. Which statement is correct in this scenario?

- A. Create a Real-time Protection policy for each DLP profile; each matched profile will generate a unique DLP incident.
- B. Create a single Real-time Protection policy and include all of the DLP profiles; all matched profiles will show up in a single DLP incident.
- C. Create a single Real-time Protection policy and include all of the DLP profiles; each matched profile will generate a unique

DLP incident

- D. Create a Real-time Protection policy for each DLP profile; all matched profiles will show up in a single DLP incident

答案： B

解題說明：

When configuring a Real-time Protection policy with multiple DLP profiles, if the content matches multiple profiles, the policy performs the most restrictive action associated with the DLP profiles that match for that policy. The resulting incident lists all the profiles that matched along with their corresponding forensic information. This means that even though the most restrictive action is taken, details for all matching profiles are created and included in a single DLP incident<sup>12</sup>.

The explanation is based on the best practices and detailed descriptions provided in the Netskope Knowledge Portal and Community discussions, which outline the process of handling multiple DLP profile matches within a single Real-time Protection policy

#### 問題 #40

You have users connecting to Netskope from around the world. You need a way for your NOC to quickly view the status of the tunnels and easily visualize where the tunnels are located. Which Netskope monitoring tool would you use in this scenario?

- A. Web Usage Summary in Advanced Analytics
- B. Network Steering in Digital Experience Management
- C. Alerts in Skope IT
- D. Network Events in Skope IT

答案： B

解題說明：

Network Steering in Digital Experience Management is the appropriate Netskope monitoring tool for this scenario. It allows the Network Operations Center (NOC) to quickly view the status of the tunnels and provides an easy way to visualize the locations of the tunnels. This tool is designed to give a clear overview of network health and performance, which is essential for managing global connectivity and ensuring the reliability of the service.

#### 問題 #41

You deployed the Netskope Client for Web steering in a large enterprise with dynamic steering. The steering configuration includes a bypass rule for an application that is IP restricted. What is the source IP for traffic to this application when the user is on-premises at the enterprise?

- A. Loopback IPv4
- B. DHCP assigned RFC1918 IPv4
- C. Netskope data plane gateway IPv4
- D. Enterprise Egress IPv4

答案： D

解題說明：

When a user is on-premises at the enterprise and accesses an application that is IP restricted, the source IP for traffic to this application is the Enterprise Egress IPv4 address.

The Enterprise Egress IP represents the external IP address of the enterprise network as seen by external services or applications. This IP address is used for communication between the user's device and external resources, including applications that are IP restricted. Reference:

The answer is based on general knowledge of networking concepts and how IP addresses are used in enterprise environments.

#### 問題 #42

You have an NG-SWG customer that currently steers all Web traffic to Netskope using the Netskope Client. They have identified one new native application on Windows devices that is a certificate-pinned application. Users are not able to access the application due to certificate pinning. The customer wants to configure the Netskope Client so that the traffic from the application is steered to Netskope and the application works as expected.

Which two methods would satisfy the requirements? (Choose two.)

- A. Bypass traffic using the bypass action in the Real-time Protection policy.
- B. Tunnel traffic to Netskope and bypass traffic inspection at the Netskope proxy.
- C. Configure domain exceptions in the steering configuration for the domains used by the native application.
- D. Configure the SSL Do Not Decrypt policy to not decrypt traffic for domains used by the native application.

答案： C,D

解題說明：

To address the issue of a certificate-pinned application not being accessible due to certificate pinning, while still steering the traffic to Netskope, the two methods that would satisfy the requirements are:

B: Configure the SSL Do Not Decrypt policy to not decrypt traffic for domains used by the native application. This ensures that the SSL traffic for the specified domains is not decrypted, thus avoiding issues with certificate pinning.

C: Configure domain exceptions in the steering configuration for the domains used by the native application. By setting domain exceptions, traffic to these domains will bypass SSL decryption, allowing the certificate-pinned application to function as expected. These methods are in line with Netskope's capabilities for handling certificate-pinned applications, which often require bypassing decryption to prevent breaking the application's functionality due to its security features.

### 問題 #43

You recently began deploying Netskope at your company. You are steering all traffic, but you discover that the Real-time Protection policies you created to protect Microsoft OneDrive are not being enforced.

Which default setting in the UI would you change to solve this problem?

- A. Disable the default Microsoft appsuite SSL rule.
- B. Remove the default steering exception for domains.
- C. Remove the default steering exception for Cloud Storage.
- D. Disable the default certificate-pinned application

答案： B

解題說明：

When deploying Netskope and steering all traffic, if you find that the Real-time Protection policies for Microsoft OneDrive are not being enforced, the likely issue is with the default steering exceptions. To resolve this, you should remove the default steering exception for domains . This is because the default exceptions may include domains related to Microsoft services, which could prevent the Real-time Protection policies from being applied to traffic directed towards OneDrive. By removing these exceptions, you ensure that all traffic, including that to OneDrive, is subject to the policies you have set up.

This recommendation is based on best practices for configuring Real-time Protection policies in Netskope, as outlined in their documentation, which suggests that exceptions should be carefully managed to ensure that security policies are enforced as intended

### 問題 #44

.....

Netskope的NSK300考試認證，NewDumps是當前最新Netskope的NSK300考試認證和考題準備問題提供認證的候選人中的佼佼者，我們資源不斷被修訂和更新，具有緊密的相關性和緊密性，今天你準備Netskope的NSK300認證，你將要選擇你要開始的訓練，而且要通過你下一次的考題，由於我們大部分考題是每月更新一次，你將得到最好的資源與市場的新鮮品質和可靠性的保證。

NSK300學習筆記：<https://www.newdumpspdf.com/NSK300-exam-new-dumps.html>

NSK300考試是Netskope NSK300考試在2010年9月24日進行發布，考試語種為英語，適合于各類IT人群進行考試，Netskope NSK300考試心得 每天忙於工作，你肯定沒有足夠的時間準備考試吧，適當的選擇培訓是成功的保證，但是選擇是相當重要的，NewDumps NSK300學習筆記的知名度眾所周知，沒有理由不選擇它，你現在正在為了Netskope 的NSK300認證考試而歎氣嗎，NSK300考古題是最近剛更新的資料，包括了真實考試中可能出現的所有問題，保證你一次就可以通過 NSK300 考試，NewDumps Netskope的NSK300考試培訓資料得到廣大考生的稱譽已經不是最近幾天的事情了，說明NewDumps Netskope的NSK300考試培訓資料信得過，確實可以幫助廣大考生通過考試，讓考生沒有後顧之憂，NewDumps Netskope的NSK300考試培訓資料暢銷和同行相比一直遙遙領先，率先得到廣大消費者的認可，口碑當然不用說，如果你要參加 Netskope的NSK300考試，就趕緊進NewDumps這個網站，相信你一定會得到你想要的，不會錯過就不會後悔，如果你想成為最專業最受人矚目的IT專家，那就趕緊加入購物車吧。
