## Pegasystems Certified Pega Business Architect 24 Sample Questions (Q135-Q140):

### NEW QUESTION # 135

You have been asked to create a pie chart that shows the number of cases each manager has created. A list report contains columns for manager name, case ID, and office. How do you configure the list report in order to create the pie chart?

- A. Summarize the manager name column
- B. Group the manager name column
- **C. Summarize the case ID column**
- D. Group the case ID column

**Answer: C**

### NEW QUESTION # 136

UCom wants its shopping website to share an update about order acceptance and expected delivery time. Which Automation Step is most suitable?

- **A. Push Notification**
- B. Update Case
- C. Post to Pulse
- D. Send Notification

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

This question tests automation steps.

\* A: Incorrect. Notifications are internal. Extract: Pega Academy, Process Design: "Send Notification is for internal users."

\* B: Incorrect. Update Case changes data. Extract: Pega Academy, Process Design: "Update Case modifies case data."

\* C: Correct. Push Notifications inform customers. Extract: Pega Academy, Process Design: "Push Notifications deliver updates to external users." Pega Academy, Business Architect '23 Mission; CPBA Study Guide 8.8, Automation Steps; Pega Help, Push Notifications.

### NEW QUESTION # 137

Which two of the following scenarios are good candidates for rule delegation?

(Choose Two)

Response:

- A. Business policies controlled by regularity compliance
- B. Password validation standards
- C. Content of an email confirming a customer submission
- D. The service level on expense reports

**Answer: A,C**

#### NEW QUESTION # 138

You are configuring an accident claim case with two child cases for an automobile insurance company, as shown in the following figure:

The business requirement changes to allow the parent case to continue independently of the child case processes, how do you configure the Wait step for this requirement?

- A. Configure the step to continue the parent case when the child cases reach the payment pending review status.
- B. Configure the step so that only one child case must be resolved before the parent case can continue.
- C. Configure the step to continue the parent case when the child cases reach auditor approval.
- D. Configure the step so that users can continue with the parent case process regardless of child case status.

**Answer: D**

Explanation:

To configure a parent case to continue independently of its child cases, you need to adjust the Wait step settings in the parent case. By configuring the Wait step so that users can continue with the parent case process regardless of the child case status, the parent case does not need to wait for the child cases to reach a certain status or be resolved. This allows for parallel processing where the parent case progresses independently of the child cases.

Reference: Pega Academy - Wait Step: The Wait step in a case lifecycle is used to pause the processing of a case until a specific condition is met. Adjusting the wait condition allows the parent case to proceed independently of the child cases.

#### NEW QUESTION # 139

A pre-approval mortgage case type collects applicant information and real estate property details. Which field type stores and displays an applicant's mortgage loan amount correctly?

Response:

- A. Currency
- B. Decimal
- C. Picklist
- D. Integer

**Answer: A,D**

#### NEW QUESTION # 140
