

# New Databricks-Certified-Data-Engineer-Associate Test Vce | Databricks-Certified-Data-Engineer-Associate Reliable Test Cram

P.S. Free & New Databricks-Certified-Data-Engineer-Associate dumps are available on Google Drive shared by Real4dumps: <https://drive.google.com/open?id=157kseoBKrh3prG56UfGcgfluwESrYB8S>

We have an integrated system for you. We offer you free demo for Databricks-Certified-Data-Engineer-Associate exam braindumps before purchasing. And you can get the downloading link and password in ten minutes after your payment, therefore you can start your learning immediately. We also provide free update for one year after you purchase Databricks-Certified-Data-Engineer-Associate Exam Dumps. After you have purchased the exam dumps, we also have the after-service to solve any problems you have. You can consult your question about Databricks-Certified-Data-Engineer-Associate exam dumps to our online and offline service staff.

The GAQM Databricks-Certified-Data-Engineer-Associate (Databricks Certified Data Engineer Associate) Certification Exam is a comprehensive examination that tests the skills of professionals who work with data on the Databricks platform. Databricks Certified Data Engineer Associate Exam certification is designed for individuals who are responsible for designing, building, and maintaining data pipelines, as well as data analysts, data architects, and data engineers. The Databricks Certified Data Engineer Associate certification is recognized globally and validates the skills and knowledge of individuals in the field of data engineering.

Databricks Certified Data Engineer Associate exam covers a wide range of topics, including data ingestion, data transformation, data storage, and data processing. Databricks-Certified-Data-Engineer-Associate Exam is designed to test the skills and knowledge of candidates in using Databricks to build and optimize data pipelines. Databricks Certified Data Engineer Associate Exam certification exam also tests the knowledge of candidates in working with Databricks to perform data transformations and store data in a variety of formats. Successful candidates will have a deep understanding of Databricks and its capabilities, and will be able to use this knowledge to build efficient and effective data pipelines.

## New Databricks-Certified-Data-Engineer-Associate Test Vce Aids You to Evacuate All Your Uncertainties before Purchase

Our Databricks-Certified-Data-Engineer-Associate training guide has been well known in the market. Almost all candidates know our Databricks-Certified-Data-Engineer-Associate exam questions as a powerful brand. Once their classmates or colleagues need to prepare an exam, they will soon introduce them to choose our Databricks-Certified-Data-Engineer-Associate Study Materials. So our study materials are helpful to your preparation of the Databricks-Certified-Data-Engineer-Associate exam. As a matter of fact, we receive thousands of the warm feedbacks to thank us for helping them pass the exam.

## Databricks Certified Data Engineer Associate Exam Sample Questions

## (Q165-Q170):

### NEW QUESTION # 165

A data engineer needs to create a table in Databricks using data from their organization's existing SQLite database.

They run the following command:

```
CREATE TABLE jdbc_customer360
USING _____ databricks
OPTIONS (
  url "jdbc:sqlite:/customers.db",
  dbtable "customer360"
)
```

Which of the following lines of code fills in the above blank to successfully complete the task?

- A. `sqlite`
- B. `org.apache.spark.sql.sqlite`
- C. `org.apache.spark.sql.jdbc`
- D. `autoloader`
- E. `DELTA`

**Answer: A**

Explanation:

In the given command, a data engineer is trying to create a table in Databricks using data from an SQLite database. The correct option to fill in the blank is "sqlite" because it specifies the type of database being connected to in a JDBC connection string. The USING clause should be followed by the format of the data, and since we are connecting to an SQLite database, "sqlite" would be appropriate here. References:

Create a table using JDBC

JDBC connection string

SQLite JDBC driver

### NEW QUESTION # 166

A Data Engineer is building a simple data pipeline using Delta Live Tables (DLT) in Databricks to ingest customer data. The raw customer data is stored in a cloud storage location in JSON format. The task is to create a DLT pipeline that reads the raw JSON data and writes it into a Delta table for further processing.

Which code snippet will correctly ingest the raw JSON data and create a Delta table using DLT?

```
import dlt

@dlt.view
def raw_customers():
    return spark.format.json("s3://my-bucket/raw-customers/")
```

- A.

```
import dlt

@dlt.table
def raw_customers():
    return spark.read.format("csv").load("s3://my-bucket/raw-customers/")
```

- B.

```
import dlt

@dlt.table
def raw_customers():
    return spark.read.json("s3://my-bucket/raw-customers/")
```

- C.
- D.

```
import dlt

@dlt.table
def raw_customers():
    return spark.read.format("parquet").load("s3://my-bucket/raw-customers/")
```

Answer: C

#### NEW QUESTION # 167

Which SQL code snippet will correctly demonstrate a Data Definition Language (DDL) operation used to create a table?

- A. CRFATF tabif employees ( id INT, name suing
- B. DROP TABLE employees;
- C. ALTR TABIF employees add column salary DECTMA(10,2);
- D. INSERT INTO employees (id, name) VALUES (1, 'Alice');

Answer: A

#### NEW QUESTION # 168

A data engineer has been using a Databricks SQL dashboard to monitor the cleanliness of the input data to an ELT job. The ELT job has its Databricks SQL query that returns the number of input records containing unexpected NULL values. The data engineer wants their entire team to be notified via a messaging webhook whenever this value reaches 100.

Which of the following approaches can the data engineer use to notify their entire team via a messaging webhook whenever the number of NULL values reaches 100?

- A. They can set up an Alert with a new email alert destination.
- B. They can set up an Alert with one-time notifications.
- C. They can set up an Alert with a new webhook alert destination.
- D. They can set up an Alert without notifications.
- E. They can set up an Alert with a custom template.

Answer: C

#### NEW QUESTION # 169

A data engineer and data analyst are working together on a data pipeline. The data engineer is working on the raw, bronze, and silver layers of the pipeline using Python, and the data analyst is working on the gold layer of the pipeline using SQL. The raw source of the pipeline is a streaming input. They now want to migrate their pipeline to use Delta Live Tables.

Which of the following changes will need to be made to the pipeline when migrating to Delta Live Tables?

- A. The pipeline will need to be written entirely in Python
- B. None of these changes will need to be made
- C. The pipeline will need to be written entirely in SQL
- D. The pipeline will need to use a batch source in place of a streaming source
- E. The pipeline will need to stop using the medallion-based multi-hop architecture

Answer: B

Explanation:

Delta Live Tables is a declarative framework for building reliable, maintainable, and testable data processing pipelines. You define the transformations to perform on your data and Delta Live Tables manages task orchestration, cluster management, monitoring, data quality, and error handling. Delta Live Tables supports both SQL and Python as the languages for defining your datasets and expectations. Delta Live Tables also supports both streaming and batch sources, and can handle both append-only and upsert data patterns. Delta Live Tables follows the medallion lakehouse architecture, which consists of three layers of data: bronze, silver, and gold. Therefore, migrating to Delta Live Tables does not require any of the changes listed in the options B, C, D, or E. The data

engineer and data analyst can use the same languages, sources, and architecture as before, and simply declare their datasets and expectations using Delta Live Tables syntax. References:

- \* What is Delta Live Tables?
- \* Transform data with Delta Live Tables
- \* What is the medallion lakehouse architecture?

## NEW QUESTION # 170

.....

In order to let you understand our products in detail, our Databricks Certified Data Engineer Associate Exam test torrent has a free trial service for all customers. You can download the trial version of our Databricks-Certified-Data-Engineer-Associate study torrent before you buy our products, you will develop a better understanding of our products by the trial version. In addition, the buying process of our Databricks-Certified-Data-Engineer-Associate exam prep is very convenient and significant. You will receive the email from our company in 5 to 10 minutes after you pay successfully; you just need to click on the link and log in, then you can start to use our Databricks-Certified-Data-Engineer-Associate study torrent for studying. Immediate download after pay successfully is a main virtue of our Databricks Certified Data Engineer Associate Exam test torrent. At the same time, you will have the chance to enjoy the 24-hours online service if you purchase our products, so we can make sure that we will provide you with an attentive service.
