## C\_BCBAI\_2509 Exam Fee | New C\_BCBAI\_2509 Mock Exam

Under the hatchet of fast-paced development, we must always be cognizant of social long term goals and the direction of the development of science and technology. Adapt to the network society, otherwise, we will take the risk of being obsoleted. Our SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite qualification test help improve your technical skills and more importantly, helping you build up confidence to fight for a bright future in tough working environment. Our professional experts devote plenty of time and energy to developing the C\_BCBAI\_2509 Study Tool. You can trust us and let us be your honest cooperater in your future development. Here are several advantages about our SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite exam for your reference. We sincere suggest you to spare some time to have a glance over the following items.

### SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q56-Q61):

#### NEW QUESTION # 56

(What are some characteristics of trustworthy business AI? Note: There are 3 correct answers to this question.)

- A. Reusability
- B. Relevance
- C. Responsibility
- D. Resourcefulness
- E. Reliability

**Answer: B,C,E**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Characteristics of trustworthy business AI include responsibility through ethical governance and accountability, reliability via accurate and secure operations, and relevance by grounding in business data and contexts. These ensure AI is human-centered, transparent, and beneficial for enterprise use.

Exact extracts supporting this:

"These three 'R's' - relevance, reliability, responsibility - are the cornerstones of trustworthy AI for the business world."news.sap.com Responsibility: "SAP Business AI is... responsible."learning.sap.com Reliability: "Reliable: built on best technology and partnerships."news.sap.com Relevance: "Relevant: grounded in business data."news.sap.com Other options are incorrect because:

Option B: Resourcefulness is not a defined characteristic; focus is on the three R's.

Option C: Reusability may apply to models but is not a core trustworthiness trait; emphasis is on ethics and accuracy.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Derived from SAP News "Trustworthy AI Can Reinvent Companies" and SAP Learning "Introducing SAP Business Artificial Intelligence," which define trustworthy AI via relevance, reliability, and responsibility, aligned with C\_BCBAI\_2502 certification.

#### NEW QUESTION # 57

In SAP Business AI, what are some safeguards for protecting customer data? Note: There are 3 correct answers to this question.

- A. Consent-based model training
- B. Tenant isolation
- C. SAP-hosted AI infrastructure
- D. Clean core maintenance

**Answer: A,B,C**

Explanation:

SAP Business AI incorporates robust safeguards to protect customer data, ensuring privacy and compliance. The consent-based model training approach ensures that AI models are trained only on data for which explicit user consent has been obtained, aligning with global data protection regulations such as GDPR. This minimizes the risk of unauthorized data usage. SAP-hosted AI infrastructure provides a secure environment where data is processed within SAP's controlled, enterprise-grade cloud infrastructure, reducing exposure to external vulnerabilities. Tenant isolation ensures that each customer's data is stored and processed in a dedicated environment, preventing cross-tenant data leakage and enhancing security. These measures collectively uphold SAP's

commitment to data privacy and security, as outlined in the SAP Business AI documentation. Clean core maintenance, while important for system efficiency, is not directly related to data protection. Sustainability is not a safeguard for customer data.

#### NEW QUESTION # 58

What are the main domain clusters of SAP's guiding principles for ethical AI? Note: There are 3 correct answers to this question.

- A. Organizational practice
- B. Executive Sponsorship
- C. AI Ethics Steering Committee
- D. AI System engineering

**Answer: A,C,D**

Explanation:

SAP's guiding principles for ethical AI are organized into key domain clusters, including the AI Ethics Steering Committee, Organizational practice, and AI System engineering, as outlined in the SAP Responsible AI Framework. The AI Ethics Steering Committee oversees governance, ensuring AI development aligns with ethical standards. Organizational practice involves embedding ethical considerations into business processes, training, and culture to promote responsible AI use. AI System engineering focuses on designing AI systems with transparency, fairness, and accountability, incorporating technical safeguards to mitigate bias and ensure reliability. Executive Sponsorship, while important for leadership support, is not a defined domain cluster, and AI System definition is not explicitly listed in SAP's framework. These clusters ensure SAP's AI solutions are trustworthy and aligned with global ethical standards.
