## NPPE認定資格試験問題集、NPPE受験資格

NPPE National Professional Practice Examination (NPPE) Examは、技術的な精度の最高水準を高め、認定された主題と専門家のみを使用します。最新の正確なNPPE試験トレントをクライアントに提供し、提供する質問と回答は実際の試験に基づいています。合格率が高く、約98%-100%であることをお約束します。また、NPPEテストブレイクダンプは高いヒット率を高め、試験を刺激してNPPE試験の準備を整えることができます。あなたの成功は、NPPE試験問題に縛られています。

## APEGS National Professional Practice Examination (NPPE) Exam 認定NPPE 試験問題 (Q76-Q81):

質問 # 76

A professional member consulting for a foreign country might be subject to laws and conditions at variance with those of Canada. Which of the following statements about a professional member practicing in a foreign country is true?

- **A. The member is expected to comply with the law of the country where he or she consults.**
- B. The member should uphold Canadian laws if they conflict with those of the foreign country since they tend to be superior.
- C. The member may disclose some information of former clients in Canada because conflict of interest conditions do not apply.
- D. The member is not expected to maintain the ethics of practice enforced in Canada.

正解: A

解説:

A professional working internationally must comply with the local laws of the country where they consult, as per professional ethics guidelines. This adherence ensures respect for the legal framework of the host country while practicing ethically. Ignoring local laws can lead to legal and professional consequences, making it crucial to conform to these laws, thus making option B correct.

質問 # 77

Which of the following statements about government involvement with real property is true according to Canadian law?

- **A. The government has retained most of the interest in mines and minerals.**
- B. The government has the right to use the land for public purposes without paying any compensation.
- C. The government has transferred its rights to all real property to private parties.
- D. The government has transferred all of its rights to land to various parties.

正解: A

解説:

In Canada, governments (Crown in right of Canada or of a province/territory) retain significant interests in real property, particularly subsurface resources. A common NPPE-tested principle is that the Crown has historically retained ownership or control over most mines and minerals, even where surface rights have been granted or sold to private parties. This is especially evident in many provinces where mineral rights are reserved to the Crown unless explicitly conveyed. Options B and C are false because governments have not transferred all rights to land or all real property to private parties; large areas remain Crown land and many resource rights are retained. Option D is false because when governments take or use private land for public purposes (expropriation), Canadian law generally requires compensation, subject to the governing expropriation statute and its rules. Therefore, A is the true statement.

質問 # 78

Which of the following responsibilities is most essential to the role of a licensed professional providing services to the public in Canada?

- A. Demonstrating innovation in technical design
- B. Participating in public communications and outreach initiatives
- C. Promoting the goals of their professional regulator
- **D. Maintaining a current professional licence in good standing**

正解: D

解説:

Providing professional engineering or geoscience services to the public in Canada is a regulated activity. A foundational responsibility is to hold and maintain the appropriate licence/registration in good standing, comply with the regulator's requirements (fees, competence obligations where applicable, standards of practice, code of ethics), and practise only as authorized. That makes C the most essential responsibility among the options. Innovation (A) can be valuable but is not required to fulfil professional duties. Promoting the regulator's goals (B) is not an essential role duty; professionals must comply with regulatory requirements and support public protection, but they are not mandated promoters. Public outreach (D) may be beneficial but is not a core requirement for all practitioners. Therefore, maintaining a current licence in good standing (C) is the essential responsibility.

質問 # 79

Engineering and geoscience professional regulators across Canada have a "disciplinary process" in place that provides a framework

to investigate, judge, and potentially impose penalties on a

- A. registered member of their professional association who is suspected of malpractice
- B. member of the general public who has damaged the reputation of the professional regulator
- C. member of the general public who is suspected of breaking the law
- D. professional holding a lone, valid licence to practice with a different Canadian regulator

正解: A

解説:

Professional discipline is the regulator's process for addressing alleged unprofessional conduct, professional misconduct, or incompetence by its registrants/licenses. NPPE materials emphasize that regulators exist to protect the public and maintain trust in the profession through complaints investigation, hearings, and sanctions where warranted. This disciplinary authority applies to members/registrants of that regulator (B).

Regulators do not "discipline" the general public (A, D); issues involving nonmembers are handled through enforcement actions for title misuse or unlicensed practice, or through the general legal system. Option C is incorrect because a regulator's discipline process applies to its own registrants; a professional licensed only in another jurisdiction would fall under that other regulator's disciplinary authority unless they are also registered locally or engaged in conduct within the local regulator's jurisdiction under specific statutory provisions. Therefore, B is correct.

### 質問 # 80

Professional members working in what province need to be aware that contract law in that province is based on legislated statutes that date back hundreds of years?

- A. Ontario
- B. New Brunswick
- C. Quebec
- D. Newfoundland

正解: C

解説:

Professional members working in Quebec (Option B) need to be aware that contract law in this province is based on the Civil Code of Quebec, which dates back to the Napoleonic Code. This makes it distinct from the rest of Canada, which primarily follows common law principles in contract law. Quebec's civil law system includes detailed statutes that govern legal contracts, which is different from the common law system used in other provinces.

### 質問 # 81
