質問と回答のみを提供するPDFバージョンの機能に満足できない場合は、C-ABAPD-2507試験の教材のAPPバージョンでさらに多くを提供できます。APPバージョンは、実際のテストシーンをシミュレートするだけでなく、間違いを指摘し、何度も練習することに気付くことができます。SAP C-ABAPD-2507試験の教材のこのバージョンはかなり強力です。あなたが喜んでいるなら、あなたは毎日あなたのパフォーマンスをマークし、比較的あなたの勉強と準備を調整することができます。C-ABAPD-2507試験の教材は、お客様の要求を満たすために最善を尽くします。

SAP C-ABAPD-2507 認定試験の出題範囲：

トピック	出題範囲
トピック 1	<ul style="list-style-type: none">ABAP RESTful Application Programming Model: This section of the exam measures skills of SAP Application Programmers and covers the fundamentals of the ABAP RESTful Application Programming Model (RAP). It includes topics such as behavior definitions, service binding, and the use of managed and unmanaged scenarios. The focus is on building modern, scalable, and cloud-ready applications using RAP.
トピック 2	<ul style="list-style-type: none">ABAP SQL and Code Pushdown: This section of the exam measures skills of SAP ABAP Developers and covers the use of advanced SQL techniques within ABAP. It includes code pushdown strategies that leverage database-level processing to enhance application performance. Key areas include Open SQL enhancements and integrating logic closer to the database.
トピック 3	<ul style="list-style-type: none">Object-Oriented Design: This section of the exam measures skills of SAP ABAP Developers and covers the basics of object-oriented programming in ABAP. It includes concepts such as classes, interfaces, inheritance, polymorphism, and encapsulation, all of which are necessary for building robust and scalable ABAP applications.
トピック 4	<ul style="list-style-type: none">ABAP Core Data Services and Data Modeling: This section of the exam measures skills of SAP ABAP Developers and covers the creation, definition, and use of Core Data Services (CDS) views for data modeling within SAP environments. Candidates are expected to understand annotations, data definitions, and the role of CDS in enabling advanced data processing and integration across SAP systems.
トピック 5	<ul style="list-style-type: none">Core ABAP Programming: This section of the exam measures skills of SAP Application Programmers and covers foundational ABAP programming knowledge. Topics include modularization techniques, internal tables, control structures, and classical report programming. Mastery of these concepts is essential for building efficient ABAP applications.

あなたはC-ABAPD-2507試験資料をよく勉強する限り、きっと短い時間で有難いC-ABAPD-2507認定試験資格証明書を取得できます。その後、あなたの生活もきっと大きく変わります。そして、いい友達ができ、いい生活を送ります。躊躇しないで、未来は本当に美しいです! C-ABAPD-2507試験資料有効であるかどうか分からない場合、SAPウェブサイトで、C-ABAPD-2507試験資料のデモを無料でダウンロードしてください。

SAP Certified Associate - Back-End Developer - ABAP Cloud 認定 C-ABAPD-2507 試験問題 (Q62-Q67):

質問 # 62

Which function call returns 0?

- A. `find_any_of(val = "ABAP ABAP abap" sub = "AB")`
- B. `Count_any_of(val - 'ABAP ABAP abap' sub "AB")`
- C. `Count (val - 'ABAP ABAP abap' sub - 'AB')`
- D. `find_any_not_of(val 'ABAP ABAP abap' sub = 'AB')`

正解: D

解説:

The function `find_any_not_of` returns the position of the first character in the string `val` that is not contained in the string `sub`. If no such character is found, the function returns 0. In this case, the string `val` contains only the characters A, B, and a, which are all contained in the string `sub`, so the function returns 0. The other functions return positive values, as follows:

`Count_any_of` returns the number of occurrences of any character in the string `sub` within the string `val`. In this case, it returns 8, since there are 8 A's and B's in `val`.

`Count` returns the number of occurrences of the string `sub` within the string `val`. In this case, it returns 2, since there are 2 AB's in `val`.

`find_any_of` returns the position of the first character in the string `val` that is contained in the string `sub`. In this case, it returns 1, since the first character A is in `sub`. Reference: String Functions - ABAP Keyword Documentation, Examples of String Functions - ABAP Keyword Documentation

質問 # 63

When does SAP recommend to use a sorted or a hashed table respectively? Note: There are 2 correct answers to this question.

- A. A sorted table, when you read a subset in a loop and specify a part of the key from the left
