Even if you fail to pass the exam, as long as you are willing to continue to use our FCP_FAZ_AD-7.4

Study Tool, we will still provide you with the benefits of free updates within a year.

Fortinet FCP - FortiAnalyzer 7.4 Administrator Sample Questions (Q175-Q180):

NEW QUESTION # 175

Which two settings must you configure on FortiAnalyzer to allow non-local administrators to authenticate to FortiAnalyzer with any user account in a single LDAP group? (Choose two.)

- A. A remote LDAP server
- B. A trusted host profile that restricts access to the LDAP group
- C. An administrator group
- D. A local wildcard administrator account

Answer: A,D

NEW QUESTION # 176

A rogue administrator was accessing FortiAnalyzer without permission.

Where can you view the activities that the rogue administrator performed on FortiAnalyzer?

- A. System Settings
- B. Fabric View
- C. FortiView
- D. Log View

Answer: C

Explanation:

Log View in FortiAnalyzer records all logs related to system and user activities, including any changes made by administrators. It would show entries related to any unauthorized access or modifications done by a rogue administrator.

NEW QUESTION # 177

Which two methods are the most common methods to control and restrict administrative access on FortiAnalyzer? (Choose two.)

- A. Trusted hosts
- B. Administrative access profiles
- C. Virtual domains
- D. Security Fabric

Answer: A,B

Explanation:

Reference:

<https://docs2.fortinet.com/document/fortianalyzer/6.0.0/administration-guide/581222/trusted-hosts>

NEW QUESTION # 178

An administrator has configured the following settings:

```
config system fortiview settings
```

```
set resolve-ip enable
```

```
end
```

What is the significance of executing this command?

- A. It resolves the destination IP address to a hostname in FortiView on FortiAnalyzer.
- B. It resolves the source and destination IP addresses to a hostname in FortiView on FortiAnalyzer.
- C. You must configure local DNS servers on FortiGate for this command to resolve IP addresses on Forti Analyzer.
- D. Use this command only if the source IP addresses are not resolved on FortiGate.

Answer: D

NEW QUESTION # 179

Which two settings must you configure on FortiAnalyzer to allow non-local administrators to authenticate on FortiAnalyzer with any user account in a single LDAP group? (Choose two.)

- A. A local wildcard administrator account
- **B. An administrator group**
- C. LDAP servers IP addresses added as trusted hosts
- **D. One or more remote LDAP servers**

Answer: B,D

Explanation:

C . One or more remote LDAP servers: FortiAnalyzer needs to be configured to communicate with your external LDAP server where the user accounts and groups reside. This involves setting up the LDAP server address, port, and authentication details.

B . An administrator group: You need to create an administrator group on FortiAnalyzer and link it to the specific LDAP group that contains the users you want to grant administrative access. This allows any user within that LDAP group to authenticate and have the permissions assigned to the administrator group on FortiAnalyzer.

This configuration allows FortiAnalyzer to authenticate users against the external LDAP server and authorize them based on their membership in the designated LDAP group. This way, you don't need to create individual local accounts for each administrator, simplifying user management and centralizing authentication.

NEW QUESTION # 180

.....

We offer money back guarantee if anyone fails but that doesn't happen if one use our FCP_FAZ_AD-7.4 dumps. These Fortinet FCP_FAZ_AD-7.4 exam dumps are authentic and help you in achieving success.
