Trend Micro Certified Professional for Deep Security Sample Questions (Q44-Q49):

NEW QUESTION # 44

Which of the following file types would not be evaluated by the Application Control Protection Module?

- A. .docx files
- B. .py scripts
- C. .exe files

- D. .class files

Answer: A

NEW QUESTION # 45

Which of the following are valid methods for forwarding Event information from Deep Security? Select all that apply.

- A. Security Information and Event Management (SIEM)
- B. Amazon Simple Notification Service (SNS)
- C. Simple Network Management Protocol (SNMP)
- D. Deep Security Application Programming Interface (API)

Answer: A,B,C

Explanation:

Deep Security supports forwarding event information through SNMP traps, integration with SIEM systems, and retrieval via the Deep Security API. While Amazon SNS is not a native forwarding method for Deep Security events, the others are fully supported and configurable from the Deep Security Manager.

SNMP allows sending traps for specific alert types.

API provides programmatic access to events.

SIEM forwarding is supported via syslog or direct integration.

NEW QUESTION # 46

The "Protection Source when in Combined Mode" settings are configured for a virtual machine as in the exhibit. You would like to enable Application Control on this virtual machine, but there is no corresponding setting displayed. Why?

- A. These settings are used when both an host-based agent and agentless protection are available for the virtual machine. Since Application Control is not supported in agentless installations, there is no need for the setting.
- B. In the example displayed in the exhibit, the VMware Guest Introspection Service has not yet been installed. This service is required to enable Application Control in agentless installations.
- C. In the example displayed in the exhibit, the Application Control Protection Module has not yet been enabled. Once it is enabled for this virtual machine, the corresponding settings are displayed.
- D. In the example displayed in the exhibit, no activation code was entered for Application Control. Since the Protection Module is not licensed, the corresponding settings are not displayed.

Answer: A

NEW QUESTION # 47

Which of the following is NOT an operation that can be performed on Deep Security resources using the API?

- A. VIEW
- B. POST
- C. PUT
- D. GET

Answer: A

Explanation:

Rest API

NEW QUESTION # 48

Your organization would like to implement a mechanism to alert administrators when files on a protected servers are modified or tampered with. Which Deep Security Protection Module should you enable to provide this functionality?

- A. The File Inspection Protection Module
- B. Deep Security can not provide this type of functionality
- C. The Intrusion Prevention Protection Module
- **D. The Integrity Monitoring Protection Module**

Answer: D

NEW QUESTION # 49

.....
