Validate Your Skills with SAP C_S4PM_2504 Exam Questions

The staffs of C_S4PM_2504 training materials are all professionally trained. If you have encountered some problems in using our products, you can always seek our help. Our staff will guide you professionally. If you are experiencing a technical problem on the system, the staff at C_S4PM_2504 practice guide will also perform one-on-one services for you. We want to eliminate all

unnecessary problems for you, and you can learn our C_S4PM_2504 Exam Questions without any problems. You may have enjoyed many services, but the professionalism of C_S4PM_2504 simulating exam will conquer you.

SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Sample Questions (Q18-Q23):

NEW QUESTION # 18

What are some important characteristics of "key users"?

Note: There are 3 correct answers to this question.

- A. Training skills
- B. Programming skills
- C. Technical system knowledge
- D. Business expertise
- E. Collaborative attitude

Answer: A,D,E

NEW QUESTION # 19

If you cannot find a prepackaged solution process that addresses integration requirements in SAP Signavio Process Navigator, where do you look next?

- A. SAP Business Accelerator Hub
- B. SAP Cloud ALM
- C. SAP Discovery Center
- D. SAP Business Technology Platform

Answer: A

Explanation:

SAP Signavio Process Navigator provides process models and best practices for SAP S/4HANA Cloud. If a prepackaged solution process for integration requirements is unavailable, the next logical step is to explore additional integration content.

* Option A: SAP Cloud ALM Incorrect. SAP Cloud ALM supports project and requirement management but does not provide prepackaged integration solutions. The SAP Cloud ALM Documentation states, "SAP Cloud ALM is not a repository for integration content but a tool for implementation management."

* Option B: SAP Business Accelerator Hub Correct. The SAP Business Accelerator Hub is the primary platform for finding integration content, APIs, and prepackaged solutions for SAP S/4HANA Cloud.

The SAP Business Accelerator Hub Guide explains, "The SAP Business Accelerator Hub offers a comprehensive repository of integration scenarios, APIs, and content to address customer-specific integration requirements."

* Option C: SAP Discovery Center Incorrect. The SAP Discovery Center provides information on SAP BTP services and use cases but is not focused on prepackaged integration solutions. The SAP Discovery Center Guide notes, "The Discovery Center is for exploring BTP capabilities, not for sourcing integration content."

* Option D: SAP Business Technology Platform Incorrect. SAP BTP is a platform for development and integration but does not directly provide prepackaged solutions. It supports custom integrations, not ready-to-use content like the Business Accelerator Hub.

Extract from Official Documentation:

* SAP Business Accelerator Hub Guide (<https://www.sap.com>): "The SAP Business Accelerator Hub is the go-to platform for discovering integration content, including APIs, connectors, and prepackaged solutions for SAP S/4HANA Cloud integrations."

* SAP S/4HANA Cloud Implementation Guide: "When standard processes in SAP Signavio Process Navigator are insufficient, customers can explore additional integration content in the SAP Business Accelerator Hub." Additional Context:

The Business Accelerator Hub is designed to accelerate integration by providing reusable content, making it the logical next step after Signavio Process Navigator.

:

SAP Help Portal: SAP Business Accelerator Hub Guide (<https://www.sap.com>).

SAP S/4HANA Cloud Implementation Guide: Details integration content sources.

SAP Activate Methodology: Recommends the Business Accelerator Hub for integration.

NEW QUESTION # 20

What can you do with the SAP for Me mobile app? Note: There are 2 correct answers to this question.

- A. Access the SAP ONE Support Launchpad
- B. Get full transparency into your SAP product portfolio
- C. Interact with SAP easily
- D. Download learning content from SAP Learning Hub

Answer: B,C

NEW QUESTION # 21

Why does SAP recommend to document alternative processes when implementing SAP S/4HANA Cloud Public Edition?

- A. To allow for future deprecation of alternative processes when standard solutions become available
- B. To suggest new feature alternative business processes for SAP inclusion in future upgrades
- C. To allow the system to be fully customized for the customer
- D. To ensure alternative processes are permanently used instead of standard features

Answer: A

NEW QUESTION # 22

What accelerator can help you document the configuration definition in the Explore phase?

- A. Backlog template
- B. Data definition template
- C. Change request template
- D. Test plan template

Answer: A

Explanation:

In the Explore phase of the SAP Activate methodology, documenting the configuration definition is essential to capture requirements and gaps identified during Fit-to-Standard workshops. An accelerator is needed to structure this documentation effectively.

* Option A: Data definition template Incorrect. Data definition templates are used for data migration planning, typically in the Realize phase. The SAP S/4HANA Cloud Migration Guide states, "Data definition templates support data migration tasks, not configuration documentation in the Explore phase."

* Option B: Test plan template Incorrect. Test plan templates are used in the Realize phase for testing activities, not for configuration documentation. The SAP S/4HANA Cloud Testing Guide notes, "Test plan templates are for organizing test cases, not documenting configuration definitions."

* Option C: Change request template Incorrect. Change request templates manage changes to the system, typically post-Explore. The SAP S/4HANA Cloud Implementation Guide clarifies, "Change request templates are used for managing system changes, not for capturing configuration definitions in the Explore phase."

* Option D: Backlog template Correct. The backlog template is an accelerator used to document configuration definitions, including gaps and delta requirements, during the Explore phase. The SAP Activate Methodology Guide explains, "The backlog template is a key accelerator in the Explore phase, used to document configuration definitions and delta requirements identified during Fit-to-Standard workshops, forming the basis for Realize phase activities." Extract from Official Documentation:

* SAP Activate Methodology Guide (SAP Community, <https://community.sap.com>): "In the Explore phase, the backlog template serves as an accelerator to document configuration definitions, capturing requirements and gaps from Fit-to-Standard workshops for subsequent configuration."

* SAP S/4HANA Cloud Implementation Guide (SAP Help Portal, <https://help.sap.com>): "The backlog template is used during the Explore phase to document configuration definitions, including delta requirements, ensuring a structured transition to the Realize phase." Additional Context:

The backlog template is a critical tool in SAP Cloud ALM, enabling teams to organize and prioritize configuration tasks identified during Fit-to-Standard workshops. Its use aligns with the agile nature of SAP Activate, ensuring traceability and clarity as the project moves into configuration and development phases.

:

SAP Help Portal: SAP S/4HANA Cloud Implementation Guide (<https://help.sap.com>).

SAP Community: SAP Activate Methodology Guide (<https://community.sap.com>).

SAP S/4HANA Cloud Study Guide: Details Explore phase accelerators.

SAP Cloud ALM Documentation: Outlines backlog template usage.
