## Pass Guaranteed Quiz HP - HPE7-A01 - High Hit-Rate Aruba Certified Campus Access Professional Exam Valid Exam Tutorial

Good news comes that our company has successfully launched the new version of the HPE7-A01 guide tests. Perhaps you are

deeply bothered by preparing the exam; perhaps you have wanted to give it up. Now, you can totally feel relaxed with the assistance of our HPE7-A01 Actual Test. It is very worthy for you to buy our product. Not only can our study materials help you pass the exam, but also it can save your much time. What are you waiting for? Follow your passion and heart.

## HP Aruba Certified Campus Access Professional Exam Sample Questions (Q142-Q147):

### NEW QUESTION # 142

Your Director of Security asks you to assign AOS-CX switch management roles to new employees based on their specific job requirements. After the configuration was complete, it was noted that a user assigned with the auditors role did not have the appropriate level of access on the switch.

The user was not allowed to perform firmware upgrades and a privilege level of 15 was not assigned to their role. Which default management role should have been assigned for the user?

- A. sysops
- B. administrators
- C. sysadmin
- D. config

**Answer: A**

Explanation:

Explanation

The correct answer is B. sysops.

The sysops user role is a predefined role that allows users to perform system operations on the switch, such as backup, restore, upgrade, or reboot. The sysops user role also has access to the PUT and POST methods for REST API, which can be used to modify the switch configuration. The sysops user role has a privilege level of 15, which is the highest level of access on the switch.

The other options are incorrect because:

A: sysadmin: The sysadmin user role is a predefined role that allows users to view and modify the switch configuration using the CLI or the Web UI. The sysadmin user role does not have access to the REST API methods, and cannot perform firmware upgrades.

C: administrators: The administrators user role is a predefined role that has full access to all switch configuration information and all REST API methods. This role is more than what the Director of Security requires.

D: config: The config user role is a predefined role that allows users to view and modify the switch configuration using the CLI or the Web UI. The config user role does not have access to the REST API methods, and cannot perform firmware upgrades.

### NEW QUESTION # 143

In AOS 10, which session-based ACL below will only allow ping from any wired station to wireless clients but will not allow ping from wireless clients to wired stations? The wired host ingress traffic arrives on a trusted port.

- A. ip access-list session pingFromWired any any svc-icmp permit user any svc-icmp deny
- B. ip access-list session pingFromWired any user any permit
- C. ip access-list session pingFromWired any any svc-icmp deny any user svc-icmp permit
- D. ip access-list session pingFromWired user any svc-icmp deny any any svc-icmp permit

**Answer: C**

Explanation:

Explanation

A session-based ACL is applied to traffic entering or leaving a port or VLAN based on the direction of the session initiation. To allow ping from any wired station to wireless clients but not vice versa, a session-based ACL should be used to deny icmp echo traffic from any source to any destination, and then permit icmp echo-reply traffic from any source to user destination. The user role represents wireless clients in AOS 10.

<https://techhub.hpe.com/eginfolib/networking/docs/arubaos-switch/security/GUID-EA0A5B3C-FE4C-4B9B-BE>

### NEW QUESTION # 144

In an ArubaOS 10 architecture using an AP and a gateway, what happens when a client attempts to join the network and the WLAN is configured with OWE?

- A. RADIUS protocol is utilized.
- B. No encryption is applied.
- C. Authentication information is not exchanged
- D. The Gateway will not respond.

**Answer: C**

Explanation:

This is the correct statement about what happens when a client attempts to join the network and the WLAN is configured with OWE (Opportunistic Wireless Encryption). OWE is a standard that provides encryption for open networks without requiring any authentication or credentials from the client or the network. OWE uses a Diffie-Hellman key exchange mechanism to establish a secure session between the client and the AP without exchanging any authentication information. The other options are incorrect because they either describe scenarios that require authentication or encryption methods that are not used by OWE.

#### NEW QUESTION # 145

A new network design is being considered to minimize client latency in a high-density environment. The design needs to do this by eliminating contention overhead by dedicating subcarriers to clients.

Which technology is the best match for this use case?

- A. MU-MIMO
- B. Channel Bonding
- C. OFDMA
- D. QWMM

**Answer: C**

Explanation:

Explanation

OFDMA (Orthogonal Frequency Division Multiple Access) is a technology that can minimize client latency in a high-density environment by eliminating contention overhead by dedicating subcarriers to clients. OFDMA allows multiple clients to transmit simultaneously on different subcarriers within the same channel, reducing contention and increasing efficiency. MU-MIMO (Multi-User Multiple Input Multiple Output) is a technology that allows multiple clients to transmit simultaneously on different spatial streams within the same channel, but it does not eliminate contention overhead. QWMM (Quality of Service Wireless Multimedia) is a technology that prioritizes traffic based on four access categories, but it does not eliminate contention overhead. Channel Bonding is a technology that combines two adjacent channels into one wider channel, increasing bandwidth but not eliminating contention overhead. References:

#### NEW QUESTION # 146

You are configuring an SVI on an Aruba CX switch that needs to have the following characteristics:

- \* VLANID = 25
- . IPv4 address 10.105.43.1 with mask 255.255.255.0
- \* IPv6 address fd00:5708::f02d:4df6 with a 64 bit prefix length
- \* member of VRF eng
- \* VRF eng and VLAN 25 have not yet been created

Which command lists will satisfy the requirements with the least number of commands?

```
vrf eng
vlan 25
interface vlan 25
ip address 10.105.43.1/24
ipv6 address fd00:5708::f02d:4df6/64
vrf attach eng
```

- A.

- B. 

```
interface vlan 25
vrf attach eng
ip address 10.105.43.1/24
ipv6 address fd00:5708::f02d:4df6/64
```
- C. 

```
vrf eng
vlan 25
interface vlan 25
ip address 10.105.43.1 255.255.255.0
ipv6 address fd00:5708::f02d:4df6/64
vrf attach eng
```
- D. 

```
interface vlan 25
vrf attach eng
ip address 10.105.43.1/24
ipv6 address fd00:5708::f02d:4df6/64
```

**Answer: D**

Explanation:

The other options either use more commands or do not create the VRF or the VLAN.

Option C uses the following commands:

vrf eng: This command creates a VRF named eng and enters the VRF configuration mode1.

vlan 25: This command creates a VLAN with ID 25 and enters the VLAN configuration mode2.

interface vlan 25: This command creates an SVI on VLAN 25 and enters the interface configuration mode3.

ip address 10.105.43.1/24 ipv6 address fd00:5708::f02d:4df6/64 vrf attach eng: This command assigns an IPv4 address of 10.105.43.1 with a subnet mask of 255.255.255.0 and an IPv6 address of fd00:5708::f02d:4df6 with a prefix length of 64 to the SVI, and attaches it to the VRF eng

## NEW QUESTION # 147

.....

The HP HPE7-A01 questions PDF questions are portable and printable, making it simple for you to prepare for the Aruba Certified Campus Access Professional Exam (HPE7-A01) test in a short time. Smart devices such as smartphones, tablets, and laptops all support the HP HPE7-A01 Exam PDF dumps format of our study material.

**HPE7-A01 Exam Sims:** <https://www.lead2passexam.com/HP/valid-HPE7-A01-exam-dumps.html>

After using our HPE7-A01 exam cram, you will not feel uneasy about the exam any more, So it is really a desirable experience to obtain our HPE7-A01 practice test materials, They can easily cover the exam topics with more practice due to the unique set of HPE7-A01 exam dumps, HP HPE7-A01 Valid Exam Tutorial Some people just complain and do nothing, This is precious tool that can let you sail through HPE7-A01 test with no mistakes.
