Pass Adobe AD0-E124 Exam with flying colors

All kinds of exams are changing with dynamic society because the requirements are changing all the time. To keep up with the newest regulations of the AD0-E124 exam, our experts keep their eyes focusing on it. Our AD0-E124 practice materials are updating according to the precise of the real exam. Our test prep can help you to conquer all difficulties you may encounter. In other words, we will be your best helper.

Adobe Experience Manager DevOps Engineer Expert Sample Questions (Q135-Q140):

NEW QUESTION # 135

A DevOps engineer wants to migrate a project code base into Cloud Manager. Which two actions must the DevOps engineer take to make sure the migration is successful? (Choose two.)

- A. Review the source code and make sure it meets the required standards and that all the classes have unit tests.
- B. Run the Dispatcher validator to make sure there are no errors in the Dispatcher configuration.
- C. Build and deploy the source code repository to a local environment using the latest version of the SDK.
- D. Run the source code through a local static code quality checker and analyze the report to identify any potential issues.

Answer: B,C

Explanation:

When migrating an existing AEM code base to AEM as a Cloud Service (AEMaaS), the structure and rules are strictly enforced by the Cloud Manager pipeline. Before pushing code, a DevOps engineer must validate the code locally against the AEM as a Cloud Service SDK to ensure OSGi bundles resolve and mutable /immutable content separations are respected (Option B). Additionally, the Dispatcher configuration has migrated from an Apache-based structure to a strict AEMaaS format. Running the local Dispatcher Validator CLI tool (Option C) is mandatory to ensure there are no syntax or structural errors in the dispatcher configurations, which would otherwise immediately fail the Cloud Manager build pipeline.

NEW QUESTION # 136

The development team asks the DevOps engineer for help to set up Java remote debugging on a local AEM instance to debug an AEM application. The DevOps engineer needs to activate remote debugging on port 8000.

Which JVM parameter should the DevOps engineer add to perform this task?

- A. `-Djava.awt.headless=true -javaagent:local.jar=8000`
- **B. `-agentlib:jdwp=transport=dt_socket,address=8000,server=y,suspend=n`**
- C. `-Xdebug -Xrunjdwp:transport=dt_socket,server=y,address=8000,suspend=n`
- D. `-Dcom.sun.management.jmxremote.port=8000 -Djava.rmi.server.hostname=localhost`

Answer: B

Explanation:

To enable Java remote debugging (Java Debug Wire Protocol or JDWP) for any JVM application, including AEM, the correct parameter format in modern Java versions is `-agentlib:jdwp=transport=dt_socket,server=y,suspend=n,address=8000`. This allows an IDE (like IntelliJ or Eclipse) to attach to the JVM process on port 8000. Option A is used for exposing JMX beans (monitoring), not debugging.

NEW QUESTION # 137

What are the key benefits of using AEM Dispatcher as a caching layer? (Choose two)

- A. Eliminates the need for a CDN
- **B. Reduces the load on AEM publish instances**
- **C. Provides improved response times for cached content**
- D. Allows all requests to bypass caching

Answer: B,C

NEW QUESTION # 138

A customer of AEM as a Cloud Service accidentally releases a feature to production much earlier than planned. The decision has been made to roll back the environment to the previous release.

What should the DevOps engineer do?

- A. Copy the most recent git tag by running the command, `git tag | sort -r | head -n 1`.
Reset and force push the production pipeline branch to the copied tag and trigger the pipeline.
- B. Click "Reinstall" in Package Manager for all packages from the previous release.
Trigger the "Publish content tree" workflow for the home page and its children.
- **C. Find the most recent successful production pipeline on the Activity tab in Cloud Manager and copy the git tag.
Reset and force push the production pipeline branch to the copied tag and trigger the pipeline.**
- D. Restore the previous Revision from the Version History panel of the home page in AEM Sites.
Trigger the "Publish content tree" workflow for the home page and its children.

Answer: C

NEW QUESTION # 139

A DevOps engineer notices that an application's OSGi bundles included in AEM content package under `/apps/<appname>/install` does not get updated when the package is installed.

What prevents the bundle from being updated?

- A. A higher version of the bundle is already installed.
- B. The bundle is a -SNAPSHOT version.
- C. The bundle should be included in a runmode dedicated install folder.
- D. The bundle's OSGi Dependencies are not fulfilled.

Answer: A

NEW QUESTION # 140

.....

If you want to constantly improve yourself and realize your value, if you are not satisfied with your current state of work, if you still spend a lot of time studying and waiting for AD0-E124 qualification examination, then you need our AD0-E124 material, which can help solve all of the above problems. I can guarantee that our study materials will be your best choice. Our AD0-E124 Study Materials have three different versions, including the PDF version, the software version and the online version.

AD0-E124 Latest Exam Question: <https://www.exams4collection.com/AD0-E124-latest-braindumps.html>

We provide the Adobe AD0-E124 exam questions in a variety of formats, including a web-based practice test, desktop practice exam software, and downloadable PDF files, Adobe AD0-E124 Practice Test Fee The odds to fail in the test are approximate to zero, Adobe AD0-E124 Practice Test Fee Missing it is your losses, At Exams4Collection, you will be able to receive updated AD0-E124 exam dumps pdf.

Neighbor Discovery Issues, In the event that no AD0-E124 Online Bootcamps message is received, a `MessageQueueException` will be thrown, We provide the Adobe AD0-E124 Exam Questions in a variety of formats, including AD0-E124 a web-based practice test, desktop practice exam software, and downloadable PDF files.
