1Z0-771 Exam Topics Pdf | Reliable 1Z0-771 Test Dumps

For the candidates, getting access to the latest Oracle 1Z0-771 practice test material takes a lot of work. The study materials for the 1Z0-771 test preparation are spread throughout a number of websites and the majority of them aren't updated. However, the applicants only have a short time to prepare for the Oracle 1Z0-771 Exam. They want a platform that offers the latest and real 1Z0-771 exam questions so they can get prepared within a few days.

Oracle APEX Cloud Developer Professional Sample Questions (Q24-Q29):

NEW QUESTION # 24

Which two AI Service Providers are supported by Oracle APEX?

- A. Jarvis
- B. DOC Document Generator pre-built function
- C. OCI Generative AI
- D. OpenAI

Answer: C,D

Explanation:

Oracle APEX integrates with external AI service providers to power features like Generative AI and text generation. The supported providers are:

OpenAI: A widely recognized AI provider offering models like GPT, integrated via API keys for tasks such as text generation, summarization, or SQL authoring in APEX.

OCI Generative AI: Oracle Cloud Infrastructure's native AI service, optimized for Oracle ecosystems, providing secure, scalable AI capabilities directly within the OCI environment.

DOC Document Generator: This is not an AI service provider; it's a hypothetical or misnamed option unrelated to APEX's AI integration.

Jarvis: While a fictional AI (e.g., from Iron Man), it's not a real provider supported by APEX.

These integrations require configuration in the Instance Administration settings, including credentials and endpoints, enabling APEX to leverage cutting-edge AI for app development and runtime features.

NEW QUESTION # 25

You have an Interactive Grid component and you are enabling the Save Report functionality. As what can end users save the report type?

- A. As Primary
- B. As Private and Primary only
- C. As Private and Public only

Answer: C

Explanation:

In an Interactive Grid, the "Save Report" functionality allows end users to save customizations (e.g., filters, column order). The available options are:

Private: Saved for the individual user only, visible only to them.

Public: Saved and shared with all users of the application, if permitted by the developer.

Primary: This is a developer-defined default report, not an end-user save option. End users cannot overwrite the Primary report; they can only save as Private or Public (if enabled via the "Allow Public Reports" attribute).

This flexibility empowers users to personalize grids while allowing shared configurations, enhancing collaboration and usability.

NEW QUESTION # 26

You need to ensure that "How may I help you today?" is the first message displayed by the AI assistant. Which attribute of the Show AI Assistant Dynamic Action should be configured in the Property Editor to achieve this?

- A. Initial Prompt
- B. Welcome Message
- C. AI Assistant Name

Answer: B

Explanation:

The Show AI Assistant Dynamic Action in Oracle APEX triggers the display of the AI Assistant interface. To customize the first message users see:

Welcome Message: This attribute in the Property Editor defines the initial text displayed when the AI Assistant appears. Setting it to "How may I help you today?" ensures this exact phrase greets users, enhancing user experience by setting a friendly tone. It's a static, developer-defined string, distinct from AI-generated responses.

Initial Prompt: This attribute defines the starting input or context sent to the AI model, not the visible message shown to users. It's typically hidden and used to guide the AI's behavior (e.g., "Act as a support agent").

AI Assistant Name: This sets the assistant's identity (e.g., "Alex"), displayed in the UI, but it's not the greeting message.

This configuration is critical for branding or guiding user interaction from the outset, and it's adjustable per dynamic action instance,

offering flexibility across pages.

NEW QUESTION # 27

Which two statements are true about the APEX_MAIL API?

- A. You can receive emails using the APEX_MAIL package in an Oracle APEX application.
- B. The APEX_MAIL package supports sending emails only to Oracle database users.
- C. You can add files as attachments to your emails using the APEX_MAIL package.
- D. You can send emails using the APEX_MAIL package from an Oracle APEX application.

Answer: C,D

Explanation:

The APEX_MAIL API facilitates email functionality:

A . You can add files as attachments: Using APEX_MAIL.ADD_ATTACHMENT (e.g.,

APEX_MAIL.ADD_ATTACHMENT(p_mail_id, p_attachment, p_filename)), you can attach BLOBs (e.g., PDFs) to emails.

C . You can send emails: APEX_MAIL.SEND (e.g., APEX_MAIL.SEND(p_to => 'user@example.com', p_body => 'Hello')) sends emails from APEX, leveraging the configured mail server.

B . You can receive emails: False; APEX_MAIL is send-only; receiving requires custom integration (e.g., IMAP).

D . Only to Oracle database users: False; emails can go to any valid address, not just database users.

Pitfall: Ensure the mail queue is processed (APEX_MAIL.PUSH_QUEUE) for timely delivery.

NEW QUESTION # 28

Which step is mandatory to make an existing Oracle APEX application Progressive Web App (PWA) enabled?

- A. Enable RESTful Web Services in the application.
- B. Add custom JavaScript to support offline functionality.
- C. Enable the PWA flag in the Application Definition.
- D. Verify that Friendly URLs are turned on in the Application Definition.

Answer: C

Explanation:

To enable an existing APEX application as a Progressive Web App (PWA), the mandatory step is:

Enable the PWA flag in the Application Definition: In the Application Definition attributes under "Progressive Web App," setting "Enable PWA" to "Yes" activates PWA features like installability, push notifications, and service worker generation. This is the foundational step, after which optional customizations (e.g., icons, manifest) can be added.

Friendly URLs: While recommended for modern apps, they're not required for PWA functionality.

Custom JavaScript: Optional for offline capabilities, but not mandatory for basic PWA enablement.

RESTful Web Services: Unrelated to PWA features.

This step transforms the app into a PWA, enhancing user experience on mobile and desktop devices with native-like behavior.

NEW QUESTION # 29

.....

Since our company's establishment, we have devoted mass manpower, materials and financial resources into 1Z0-771 exam materials and until now, we have a bold idea that we will definitely introduce our study materials to the whole world and make all people that seek fortune and better opportunities have access to realize their life value. Our 1Z0-771 Practice Questions, therefore, is bound to help you pass though the exam and win a better future. We will also continuously keep a pioneering spirit and are willing to tackle any project that comes your way.
