Salesforce Latest Analytics-Admn-201 Test Practice: Salesforce Certified Tableau Server Administrator - Getcertkey Official Pass Certify

Analytics-Admn-201 also offers free demos, allowing users to test the quality and suitability of the Analytics-Admn-201 exam dumps before purchasing. The demo provides access to a limited portion of the material, providing users with a better understanding of the content. Additionally, Analytics-Admn-201 provides three months of free updates to ensure that candidates have access to the latest questions.

Salesforce Certified Tableau Server Administrator Sample Questions (Q42-Q47):

NEW QUESTION # 42

Which two commands are valid and complete commands? (Choose two.)

- A. tsm maintenance backup
- B. tsm maintenance ziplogs
- C. tsm maintenance restore
- D. tsm maintenance cleanup

Answer: B,D

Explanation:

TSM commands manage Tableau Server maintenance-let's validate their syntax:

- * Command Requirements:
- * Some need arguments (e.g., file paths); others are standalone.
- * Valid and Complete: Must work as-is without errors.
- * Option C (tsm maintenance cleanup): Correct.
- * Details: Removes temporary files and old logs-no arguments required (optional flags like -l exist).
- * Use: tsm maintenance cleanup-runs fully.
- * Option D (tsm maintenance ziplogs): Correct.
- * Details: Creates a zip of logs (e.g., tsm-logs.zip)-no arguments needed (optional -d for date range).
- * Use: tsm maintenance ziplogs-complete and valid.
- * Option A (tsm maintenance backup): Incorrect.
- * Why: Requires -f <filename>.tsbak (e.g., tsm maintenance backup -f backup.tsbak)-incomplete without it.
- * Option B (tsm maintenance restore): Incorrect.
- * Why: Needs -f <filename>.tsbak (e.g., tsm maintenance restore -f backup.tsbak)-not standalone.

Why This Matters: Correct syntax ensures maintenance tasks execute without errors-critical for server health.

Reference: Tableau Server Documentation - "TSM Maintenance Commands" (https://help.tableau.com/current/server/en-us/cli_maintenance_tsm.htm).

NEW QUESTION # 43

What Tableau Server authentication method should you configure to use OpenID Connect?

- A. Local Authentication
- B. Active Directory
- C. SAML
- D. Kerberos

Answer: C

Explanation:

Tableau Server supports multiple authentication methods, including Local Authentication, Active Directory, Kerberos, SAML, and OpenID Connect. OpenID Connect (OIDC) is an identity layer built on OAuth 2.0, commonly used for single sign-on (SSO). In Tableau Server, OIDC is implemented as a variant of SAML (Security Assertion Markup Language) authentication because both are SSO protocols managed through the same configuration workflow.

To use OpenID Connect:

- * Configure Tableau Server for SAML/SSO.
- * Provide an OIDC-compatible identity provider (IdP) configuration (e.g., Google, Okta).
- * Set up the IdP metadata and certificates in TSM.
- * Option D (SAML): Correct. Tableau Server treats OIDC as a subset of its SAML authentication framework, so you configure it under the SAML settings in TSM.
- * Option A (Local Authentication): Incorrect. Local Authentication uses Tableau's internal user database, not an external SSO protocol like OIDC.
- * Option B (Kerberos): Incorrect. Kerberos is a network authentication protocol for Windows environments, unrelated to OIDC.
- * Option C (Active Directory): Incorrect. AD uses LDAP or Kerberos, not OIDC, for authentication.

Reference: Tableau Server Documentation - "Configure SAML and OpenID Connect" (https://help.tableau.com/current/server/en-us/saml_config.htm).

NEW QUESTION # 44

Which three items can be contained in a project? (Choose three.)

- A. Workbooks
- B. Groups
- C. Data Sources
- D. Nested Projects

Answer: A,C,D

Explanation:

In Tableau Server, projects are containers for organizing and securing content. They help manage permissions and structure content hierarchically. Let's define what can be contained:

- * Workbooks: Visualizations and dashboards published to the Server.
- * Data Sources: Published connections or extracts reusable across workbooks.
- * Nested Projects: Sub-projects within a parent project, introduced in later versions (e.g., 2018.2) for deeper organization.
- * Option B (Workbooks): Correct. Workbooks are the primary content type in projects, containing views and dashboards.
- * Option C (Nested Projects): Correct. Nested projects allow hierarchical structuring (e.g., a "Sales" project with "Q1" and "Q2" sub-projects), with inherited or custom permissions.
- * Option D (Data Sources): Correct. Published data sources reside in projects, providing reusable data connections.
- * Option A (Groups): Incorrect. Groups are collections of users managed at the site or server level, not stored within projects.

Projects contain content, not user entities.

Why This Matters: Projects are key to content governance-knowing what they hold helps administrators organize and secure assets effectively.

Reference: Tableau Server Documentation - "Projects" (<https://help.tableau.com/current/server/en-us/projects.htm>).

NEW QUESTION # 45

Which two types of content can you include in comments on a visualization? (Choose two.)

- A. @mentions
- B. Images (jpg, png)
- C. Text
- D. Interactive snapshots of a view

Answer: A,C

Explanation:

Comments on Tableau Server visualizations facilitate collaboration. Let's explore what's supported:

* Comments Feature: Enabled per site (Settings > General > Allow Comments). Users with "Add Comment" permission can post on views.

* Option B (Text): Correct.

* Details: The primary content type-users type free-form text in the comment box.

* Use: Notes, questions, or feedback (e.g., "Sales spiked here-why?").

* Option C (@mentions): Correct.

* Details: Typing @username notifies the mentioned user via email or the UI (if notifications are enabled).

* Use: Directs comments to specific people (e.g., "@John, check this trend").

* Option A (Interactive snapshots of a view): Incorrect.

* Details: Snapshots (static images) aren't supported in comments-users must take screenshots externally and can't embed them interactively.

* Option D (Images - jpg, png): Incorrect.

* Details: No attachment or image embedding in comments-text and mentions only. Workaround:

Link to an image hosted elsewhere.

Why This Matters: Comments enhance teamwork, but their simplicity (text + mentions) keeps the interface lightweight and focused.

Reference: Tableau Server Documentation - "Comment on a View" (<https://help.tableau.com/current/server/en-us/comment.htm>).

NEW QUESTION # 46

You need to ensure that Tableau Server requires the setup of a new administrator account the next time you attempt to log in. What should you do?

- A. Reinstall Tableau Server
- B. Edit tabsvc.yml
- C. Run the tsm reset command
- D. Run the tsm register command

Answer: C

Explanation:

To force Tableau Server to require the setup of a new administrator account (e.g., resetting the server to an initial setup state), the tsm reset command is the appropriate tool. This command resets Tableau Server's administrative configuration, including the TSM administrator account, while preserving content like workbooks and data sources.

Option B (Run the tsm reset command): Correct. Running tsm reset clears the current TSM administrator credentials and configuration settings. The next time you access TSM (e.g., via the web interface or CLI), it prompts you to set up a new administrator account, mimicking the initial setup process. Command: tsm reset -- username <new-username> --password <new-password>.

Option A (Edit tabsvc.yml): Incorrect. The tabsvc.yml file contains service configuration data, but manually editing it is not supported or recommended for resetting the administrator account. It could also corrupt the installation.

Option C (Run the tsm register command): Incorrect. The tsm register command is used to register Tableau Server with a new product key or identity store, not to reset the administrator account.

Option D (Reinstall Tableau Server): Incorrect. Reinstallation wipes the entire server, including content, and is overkill for this task. The tsm reset command achieves the goal without data loss.

Reference: Tableau Server Documentation - "TSM Reset Command" (https://help.tableau.com/current/server/en-us/cli_reset.htm).

NEW QUESTION # 47

.....

Analytics-Admn-201 pdf file is the most favorite readable format that many candidates prefer to. You can download and install Analytics-Admn-201 pdf torrents on your PC or phone. If you are tired of the way to study, you can also print Analytics-Admn-201 pdf dumps into papers which can allow you to do marks as you like. As we all know, the Analytics-Admn-201 study notes on the papers are easier to remember. What's more, we use Paypal which is the largest and reliable platform to deal the payment, keeping the interest for all of you.

New Analytics-Admn-201 Test Experience: https://www.getcertkey.com/Analytics-Admn-201_braindumps.html

Are you still upset about how to surely pass Analytics-Admn-201 - Salesforce Certified Tableau Server Administrator exams, We have free online service which means that if you have any trouble using our Salesforce Analytics-Admn-201 learning materials or operate different versions on the platform mistakenly, we can provide help for you remotely in the shortest time, Salesforce Latest Analytics-Admn-201 Test Practice As is known to us, getting the newest information is very important for all people to pass the exam and get the certification in the shortest time.

The current selection thumbnail changes as you make choices, Archiving Purging Assets, Are you still upset about how to surely pass Analytics-Admn-201 - Salesforce Certified Tableau Server Administrator exams?

We have free online service which means that if you have any trouble using our Salesforce Analytics-Admn-201 Learning Materials or operate different versions on the platform mistakenly, we can provide help for you remotely in the shortest time.

Professional Latest Analytics-Admn-201 Test Practice & Leading Provider in Qualification Exams & Latest updated New Analytics-Admn-201 Test Experience

As is known to us, getting the newest information Analytics-Admn-201 is very important for all people to pass the exam and get the certification in the shortest time, Because our Analytics-Admn-201 actual exam help exam cannonades pass the exam with rate up to 98 to 100 percent.

Owning a test Salesforce Certified Tableau Server Administrator Analytics-Admn-201 certificate equals owning a weighty calling card when the clients find jobs and the proof that the clients are the competent people.
