Answer: B

NEW QUESTION # 31

One of the uses of the ServiceNow REST API Explorer is:

- A. Practice using REST to interact with public data providers
- **B. Create sample code for sending REST requests to ServiceNow**
- C. Convert SOAP Message functions to REST methods
- D. Find resources on the web for learning about REST

Answer: B

Explanation:

One of the uses of the ServiceNow REST API Explorer is to create sample code for sending REST requests to ServiceNow. The REST API Explorer is a tool that allows you to discover and test the ServiceNow REST APIs. You can select an API endpoint, set the HTTP method, parameters, headers, and body, and then execute the request. The REST API Explorer will show you the response status, headers, and body, as well as generate sample code for various languages and frameworks, such as cURL, Java, JavaScript, Node.js, Python, Ruby, and more.
