

New HPE7-A06 Mock Test | HPE7-A06 Exam Pass4sure

DOWNLOAD the newest Exam4Labs HPE7-A06 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1LgR6Wweyy7gGcXWweFnLA5mKPHRQP7iw>

Therefore, you must stay informed as per these changes to save time, money, and mental peace. As was already discussed, Exam4Labs satisfies the needs of HPE Campus Access Switching Expert Written Exam (HPE7-A06) exam candidates. The customer will receive updates of HPE Campus Access Switching Expert Written Exam (HPE7-A06) real dumps for up to 365 days after buying the product. Our offers don't stop here. If our customers want to evaluate the HPE Campus Access Switching Expert Written Exam (HPE7-A06) exam dumps before paying us, they can download a free demo as well.

We update our HPE7-A06 Test Prep within one year and you will download free which you need. After one year, we provide the client 50% discount benefit if buyers want to extend their service warranty so you can save much money. If you are the old client, you can enjoy some certain discount when buying HPE7-A06 exam torrent so you can enjoy more service and more benefits. Our update can provide the latest and most useful HPE Campus Access Switching Expert Written Exam prep torrent to you and you can learn more and master more. Because we update frequently, the client can understand the latest change and trend in the theory and the practice. So you will benefit from the update a lot.

HPE7-A06 Exam Pass4sure - Reliable HPE7-A06 Study Materials

When you first contacted us with HPE7-A06 quiz torrent, you may be confused about our HPE7-A06 exam question and would like to learn more about our products to confirm our claims. We have a trial version for you to experience. If you choose to purchase our HPE7-A06 quiz torrent, you will have the right to get the update system and the update system is free of charge. We do not charge any additional fees. Once our HPE7-A06 Learning Materials are updated, we will automatically send you the latest information about our HPE7-A06 exam question. We assure you that our company will provide customers with a sustainable update system.

HPE Campus Access Switching Expert Written Exam Sample Questions (Q16-Q21):

NEW QUESTION # 16

Match the AOS-CX switch BGP keepalive and holddown timersto the default.

Answer:

Explanation:

Explanation:

The question requires matching the default BGP keepalive and hold-down timers on AOS-CX switches to their respective values.

* **Analysis of Options:**

* **Keepalive Timer:**The keepalive timer determines how often BGP keepalive messages are sent to maintain a session. The default value on AOS-CX switches is 60 seconds.

* **Hold-down Timer:**The hold-down timer specifies the maximum time a BGP session can remain active without receiving a keepalive or update message before it is considered down. The default value on AOS-CX switches is 180 seconds.

* **Why This Mapping is Correct:**Per BGP standards (RFC 4271) and HPE Aruba Networking AOS-CX documentation, the default BGP keepalive timer is 60 seconds, and the hold-down timer is 180 seconds (three times the keepalive interval). These timers ensure BGP sessions remain stable while allowing timely detection of peer failures. The AOS-CX implementation adheres to these defaults unless explicitly configured otherwise.

* **Relevance to Certification Objectives:**

* **Routing (16%):**Involves designing and troubleshooting BGP routing topologies, including timer configurations.

* **Troubleshooting (10%):**Includes diagnosing BGP session issues related to timers.

References:

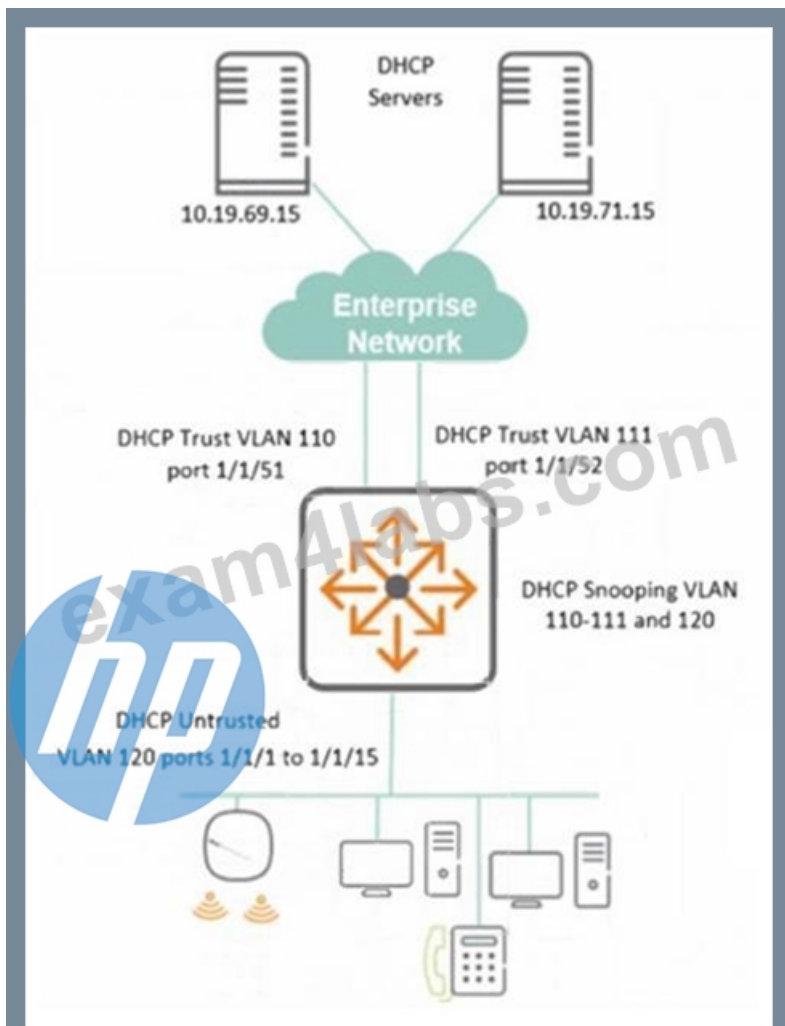

HPE Aruba Networking AOS-CX Configuration Guide: BGP Configuration, detailing default timer values.

HPE7-A06 Study Guide: Covers BGP session management and timers.

RFC 4271: A Border Gateway Protocol 4 (BGP-4), specifying default keepalive and hold-down timers.

NEW QUESTION # 17

Refer to the exhibit.

```

dhcpv4-snooping
dhcpv4-snooping authorized-server 10.19.69.15
dhcpv4-snooping authorized-server 10.19.71.15
vlan 110
  description uplink
  dhcpv4-snooping
vlan 111
  description uplink
  dhcpv4-snooping
vlan 120
  description User
  dhcpv4-snooping
interface 1/1/1
  no shutdown
  description User
  vlan access 120
...

```

When enabling DHCPv4-snooping on an AOS-CX access switch, which change has to be made to be able to get an IP from the DHCP-servers?

- A.
- B.
- C.
- D. dhcpv4-snooping trust interface 1/1/51-1/1/52

Answer: A

Explanation:

To allow clients in VLAN 120 to obtain IP addresses, the switch must trust the interfaces connected to the upstream DHCP servers.

The correct configuration is:

```
interface 1/1/51-1/1/52
```

```
dhcpv4-snooping trust
```

This ensures DHCP offers and acknowledgments from the servers on those ports are not dropped by DHCP snooping.

NEW QUESTION # 18

A client uses HPE Aruba Networking Central to manage and monitor wired and wireless networks. What are two advanced options in HPE Aruba Networking Central to troubleshoot wireless performance? (Choose two.)

- A. live events with packet capture
- B. AirWave performance dashboard
- C. iPerf tests
- D. spectrum analysis
- E. ping test

Answer: A,D

Explanation:

In HPE Aruba Networking Central, advanced wireless troubleshooting includes:

Live events with packet capture → allows real-time analysis of client association, authentication,
□ and data traffic.

Spectrum analysis → detects RF interference and channel utilization issues impacting wireless
□ performance.

NEW QUESTION # 19

Refer to the exhibits.

□ An engineer has applied the above configuration to R1 and R2, however, the router's OSPF adjacency never progresses past the "EXSTART/DR" state.

□ Which configuration action on either router will allow R1 and R2 to progress past the "EXTART/DR" state?

- A. Change R1 and R2 to a network type of point-to-point.
- B. Change the IP address and mask applied to interface 1/1/1 to a valid mask supported by RFC 2328.
- C. Remove the L3 MTU configuration.
- D. Ensure the OSPF process is not configured with passive-interface default.

Answer: A

Explanation:

The OSPF adjacency is stuck in the EXSTART/DR state because the broadcast network type is being used by default on the /31 link. On a /31 point-to-point link, OSPF neighbors should not attempt DR/BDR election. Changing the OSPF network type to point-to-point on either R1 or R2 ensures correct adjacency formation and allows the routers to progress to the FULL state.

NEW QUESTION # 20

Drag and Drop Question

Identify the required configuration steps to enable DHCP Endpoint Profiling with HPE Aruba Networking ClearPass. (Not all will be used)

□

Answer:

Explanation:

□

NEW QUESTION # 21
