

FCP_FMGA_AD-7.6 Pdf Dumps & New FCP_FMGA_AD-7.6 Braindumps Questions

BONUS!!! Download part of ValidDumps FCP_FMGA_AD-7.6 dumps for free: <https://drive.google.com/open?id=1JCpMIOsP#mWZJKV95HaK8aXhEqRcLY>

You can learn FCP_FMGA_AD-7.6 quiz torrent skills and theory at your own pace, and you will save more time and energy that you can complete other thing. We also provide every candidate who wants to get certification with free Demo to check our materials. No other FCP_FMGA_AD-7.6 study materials or study dumps can bring you the knowledge and preparation that you will get from the FCP_FMGA_AD-7.6 Study Materials available only from ValidDumps. Not only will you be able to pass any FCP_FMGA_AD-7.6 test, but will gets higher score, if you choose our FCP_FMGA_AD-7.6 study materials.

Fortinet FCP_FMGA_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Advanced Configuration: This section of the exam measures the skills of Network Security Engineers and includes knowledge of high availability (HA), FortiGuard service configuration, and global database ADOM settings. These advanced functions help strengthen system reliability and streamline management at a larger scale.
Topic 3	<ul style="list-style-type: none"> Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.
Topic 4	<ul style="list-style-type: none"> Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.
Topic 5	<ul style="list-style-type: none"> Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.

FCP_FMG_AD-7.6 Study Materials Boosts Your Confidence for FCP_FMG_AD-7.6 Exam - ValidDumps

You will be able to assess your shortcomings and improve gradually without having anything to lose in the actual FCP - FortiManager 7.6 Administrator exam. You will sit through mock exams and solve actual Fortinet FCP_FMG_AD-7.6 dumps. In the end, you will get results that will improve each time you progress and grasp the concepts of your syllabus. The desktop-based Fortinet FCP_FMG_AD-7.6 Practice Exam software is only compatible with Windows.

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q11-Q16):

NEW QUESTION # 11

An administrator created a new global policy package that includes both header policies and footer policies. What two things must the administrator know before deploying the global policy package to ADOM2? (Choose two.)

- A. They can synchronize policy packages by importing from the ADOM2 policy package into the global ADOM policy package.
- B. They can assign the global policy package to all or selected policy packages within ADOM2.
- C. They must install from the ADOM2 layer to FortiGate when using the Automatically install policies to ADOM devices option.
- D. They can promote ADOM2 objects to global objects.

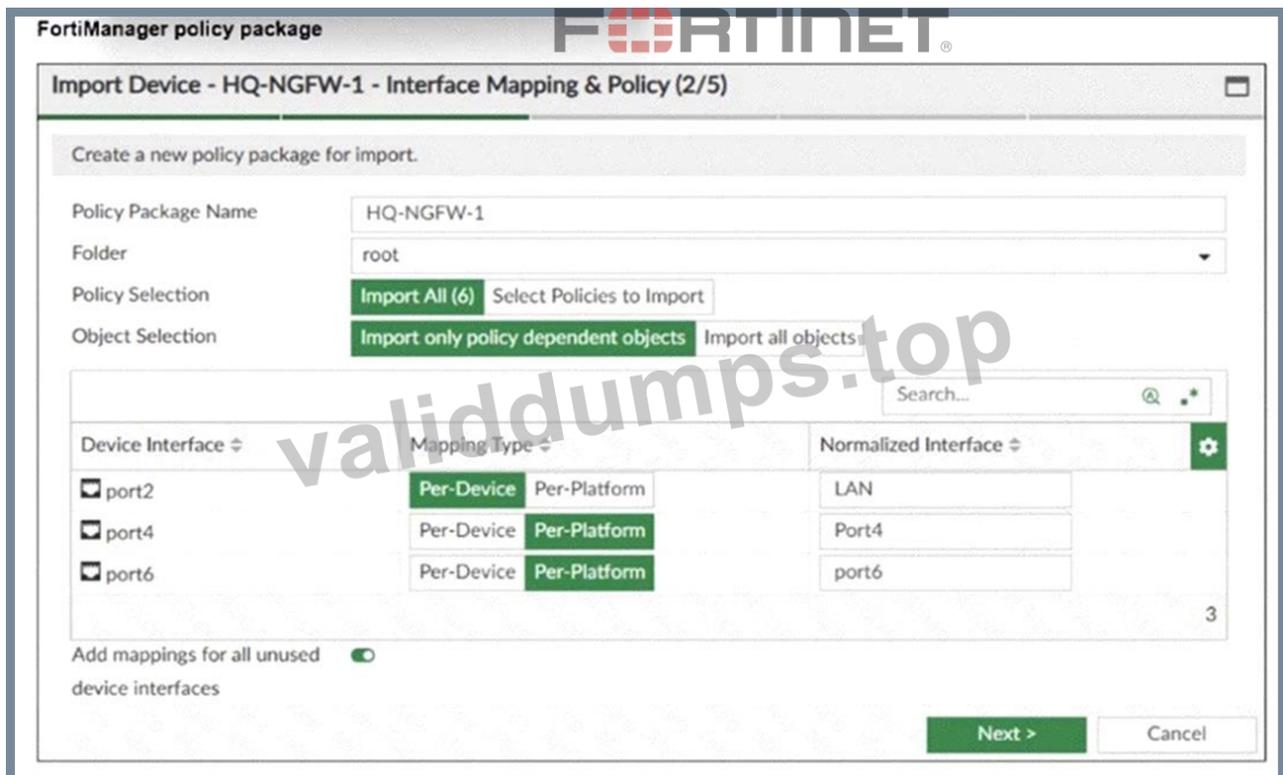

Answer: B,D

Explanation:

Before deploying a Global Policy Package that uses shared objects, the administrator needs to ensure any objects created locally in the target ADOM (ADOM2) that they want to use in the global policies (header or footer) are available in the Global ADOM. The Global Policy Package must be assigned to the specific Local Policy Packages within ADOM2 that are meant to inherit those global header and footer rules. The administrator can choose to assign the Global Policy Package to all policy packages in ADOM2 or only to selected ones.

NEW QUESTION # 12

Refer to the exhibit.

An administrator added a FortiGate device to FortiManager with the default object settings at the ADOM layer. What can you conclude from the import policy package process of the HQ-NGFW-1 device?

- A. FortiGate may not work as expected when the administrator does not import all objects.
- B. The administrator must manually create the port4 interface on the ADOM layer to avoid import policy errors.
- C. FortiManager will create LAN, port4, and port6 as normalized interfaces at the ADOM layer.
- D. The administrator must select Per Platform for all interfaces to correctly detect all interfaces from HQ-NGFW-1.

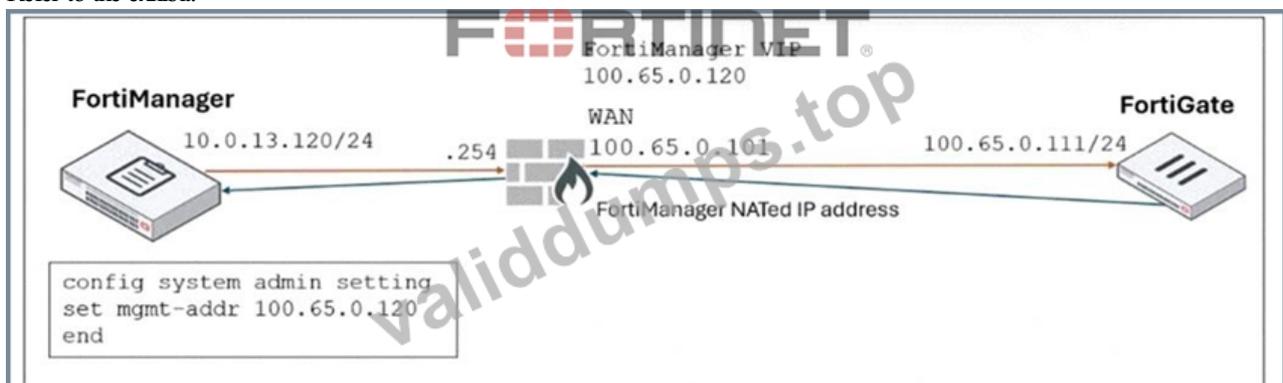

Answer: C

Explanation:

The import process shows that FortiManager will create normalized interfaces named LAN, port4, and port6 at the ADOM layer, mapping them to the corresponding device interfaces based on the import settings.

NEW QUESTION # 13

Refer to the exhibit.

FortiManager is operating behind a network address translation (NAT) device, and the administrator configured the FortiManager NATed IP address under the FortiManager system administration settings.

What is the expected result during discovery?

- A. FortiManager sets both the 100.65.0.120 IP address and 10.0.13.120 IP address on FortiGate.
- B. FortiManager sets the 100.65.0.101 IP address on FortiGate.
- C. FortiManager sets both the 100.65.0.120 IP address and 100.65.0.101 IP address on FortiGate.
- D. FortiManager sets the 100.65.0.120 IP address on FortiGate.

Answer: D

Explanation:

When FortiManager is behind a NAT device, setting the NATed IP address (100.65.0.120) in the system admin settings causes FortiManager to use that NATed IP address for communication and configuration with FortiGate during discovery and management operations.

NEW QUESTION # 14

While attempting to push a NetFlow configuration script through the FortiManager policy package: an administrator encounters an error stating that an object is unrecognized in line 4.

```
Starting log (Run on database)
config vdom
edit AGEUSR
[line 4] > config sys interface [parameter(s) invalid, detail: object unrecognized]
Failed to commit to DB, reason([line 4] > config sys interface [parameter(s) invalid, detail: object unrecognized]
Running script(NetFlow_Configuration) on DB failed
```

What must the administrator do to successfully apply the NetFlow configuration script and avoid the object unrecognized error?

- A. Make sure the user running the script has full access to the VDOM--AGEUSR.
- B. Create a normalized interface on the policy layer before running the script.
- C. Use metadata variables if they use VDOMs in the script.
- **D. Run the script on the device database.**

Answer: D

Explanation:

If you try to run the script in the policy package DB, you'll get an error using metadata or a normalized interface. However, if you run it at the Device DB level, the script is successful and makes the changes.

NEW QUESTION # 15

Which is recommended when you are managing a high volume of logs in your network?

- **A. Add and manage FortiAnalyzer from FortiManager.**
- B. Enable advanced ADOM mode on FortiManager.
- C. Store logs on FortiManager and use FortiView.
- D. Forward logs from FortiAnalyzer to FortiManager daily.

Answer: A

Explanation:

Adding and managing FortiAnalyzer from FortiManager is recommended for handling a high volume of logs, as FortiAnalyzer is designed specifically for centralized log management, analysis, and reporting, which offloads this workload from FortiManager.

NEW QUESTION # 16

.....

If you fail, don't forget to learn your lesson. If you still prepare for your test yourself and fail again and again, it is time for you to choose a valid FCP_FMG_AD-7.6 study guide; this will be your best method for clearing exam and obtain a certification. Good FCP_FMG_AD-7.6 study guide will be a shortcut for you to well-directed prepare and practice efficiently, you will avoid do much useless efforts and do something interesting. ValidDumps releases 100% pass-rate FCP_FMG_AD-7.6 Study Guide files which guarantee candidates 100% pass exam in the first attempt.
