WGU C190 Introduction to Biology Final Exam Questions and Answers

- Abiotic Non-living, may be within or made by a living organism.
- Biotic Living. Matter is considered _____ if it was ever alive at some point in time
- Atom Smallest level. The basic unit of matter. Consists of a dense nucleus surrounded by electrons.
- Molecule Second level. A chemical structure consisting of at least two atoms held together by a chemical bond.
- Macromolecule Third level. Biologically important molecules that are technically polymers. Example: DNA.
- Cell Fourth level. The fundamental unit of life. Essentially a tiny droplet of water and other molecules enclosed by a fluid "skin" or membrane. The smallest and simplest entity that possesses all the characteristics of life.
- Organelle Fifth level. Compartments inside the cell that contain specific groups of macromolecules and carry out specific cellular functions. One of these organelles is the nucleus; it encloses the DNA within the cell.
- Microorganism Sixth level. Single-celled life form. Consists of just one cell and include unicellular organisms such as bacteria and protists.
- Tissue Seventh level. Formed when similar cells work together to fulfill the same detailed function.
- Organ Eighth level. Collections of tissues that work together to carry out a common general function. Present not only in higher level animals but also in plants.
- Organ System Ninth level. Consists of functionally related organs. Mammals have many.
- Organism Tenth Level. Individual living entities that survive and reproduce as a unit. For example, each tree in a forest.
- Population Eleventh level. Consists of all the individuals of a species living within a specific area.
