

2V0-13.25 Latest Braindumps Book | Mock 2V0-13.25 Exam

DOWNLOAD the newest TestKingIT 2V0-13.25 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1_gaNzZRDCAZU7ecX3NiPJbhV3fNplFc1

It is known to us that the error correction is very important for these people who are preparing for the 2V0-13.25 exam in the review stage. It is very useful and helpful for a lot of people to learn from their mistakes, because many people will make mistakes in the same way, and it is very bad for these people to improve their accuracy. If you want to correct your mistakes when you are preparing for the 2V0-13.25 Exam, the study materials from our company will be the best choice for you. Because our 2V0-13.25 reference materials can help you correct your mistakes and keep after you to avoid the mistakes time and time again. We believe that if you buy the 2V0-13.25 exam prep from our company, you will pass your exam in a relaxed state.

In compliance with syllabus of the exam, our 2V0-13.25 preparation materials are determinant factors giving you assurance of smooth exam. Our 2V0-13.25 actual exam comprise of a number of academic questions for your practice, which are interlinked and helpful for your exam. And there are all key points in the 2V0-13.25 Exam Questions. Our 2V0-13.25 study guide will be the best choice for your time, money and efforts.

Quiz 2026 Pass-Sure VMware 2V0-13.25: VMware Cloud Foundation 9.0 Architect Latest Braindumps Book

If you have interests with our 2V0-13.25 practice materials, we prefer to tell that we have contacted with many former buyers of our 2V0-13.25 exam questions and they all talked about the importance of effective 2V0-13.25 learning prep playing a crucial role in your preparation process. Our practice materials keep exam candidates motivated and efficient with useful content based wholly on the real 2V0-13.25 Guide materials.

VMware Cloud Foundation 9.0 Architect Sample Questions (Q15-Q20):

NEW QUESTION # 15

How do Broadcom's network solutions enhance VMware NSX-T functionality?

- A. Seamless integration with VMware tools
- B. High throughput
- C. Low latency networking
- D. Hardware offloading

Answer: A,B,C,D

Explanation:

Broadcom network solutions enhance VMware NSX-T by ensuring low-latency, high throughput, offloading tasks to hardware, and integrating with VMware tools.

NEW QUESTION # 16

An architect is working with a service provider to design a VMware Cloud Foundation (VCF) solution that is required to host workloads for multiple tenants.

The following requirements were gathered:

Each tenant requires full access to their own vCenter.

Each tenant will utilize and manage their own identity provider for access.

A total of 28 tenants are expected to be onboarded.

Each tenant will have their own independent VCF lifecycle maintenance schedule.

Which VCF architecture option will meet these requirements?

- A. Two VCF instances with standard architecture model and 14 isolated SSO domains each
- B. A single VCF instance consolidated architecture model with 28 tenant clusters
- C. A single VCF instance standard architecture model and 28 isolated SSO domains
- D. Two VCF instances consolidated architecture model with 14 tenant clusters each

Answer: D

Explanation:

To determine the appropriate VMware Cloud Foundation (VCF) architecture for this scenario, we need to evaluate each option against the provided requirements and the capabilities of VCF 5.2 as outlined in official documentation.

Requirement Analysis:

Each tenant requires full access to their own vCenter: This implies that each tenant needs a dedicated vCenter Server instance for managing their workloads, ensuring isolation and administrative control.

Each tenant will utilize and manage their own identity provider: This requires separate Single Sign-On (SSO) domains or identity sources per tenant, as tenants must integrate their own identity providers (e.g., Active Directory, LDAP) independently.

A total of 28 tenants: The solution must scale to support 28 isolated environments.

Independent VCF lifecycle maintenance schedule: Each tenant's environment must support its own lifecycle management (e.g., upgrades, patches) without impacting others, implying separate VCF instances or fully isolated workload domains.

VCF Architecture Models Overview (Based on VCF 5.2 Documentation):

Standard Architecture Model: A single VCF instance with one vCenter Server managing all workload domains under a single SSO domain. Additional workload domains share the same vCenter and SSO infrastructure.

Consolidated Architecture Model: A single VCF instance where the management domain and workload domains are managed by one vCenter Server, but workload domains can be isolated at the cluster level.

Multiple VCF Instances: Separate VCF deployments, each with its own management domain, vCenter Server, and SSO domain, enabling full isolation and independent lifecycle management.

Option Analysis:

A). A single VCF instance consolidated architecture model with 28 tenant clusters:

In a consolidated architecture, a single vCenter Server manages the management domain and all workload clusters. While 28 tenant clusters could be created, all would share the same vCenter and SSO domain. This violates the requirements for each tenant having their own vCenter and managing their own identity provider, as a single SSO domain cannot support 28 independent identity providers. Additionally, lifecycle management would be tied to the single VCF instance, conflicting with the independent maintenance schedule requirement. This option does not meet the requirements.

B). A single VCF instance standard architecture model and 28 isolated SSO domains:

In a standard architecture, a single VCF instance includes one vCenter Server and one SSO domain for all workload domains. While workload domains can be created for isolation, VMware Cloud Foundation 5.2 does not support multiple isolated SSO domains within a single vCenter instance. The vSphere SSO architecture allows only one SSO domain per vCenter Server. Even with creative configurations (e.g., identity federation), managing 28 independent identity providers within one SSO domain is impractical and unsupported. Furthermore, all workload domains share the same lifecycle schedule under one VCF instance, failing the independent maintenance requirement. This option is not viable.

C). Two VCF instances consolidated architecture model with 14 tenant clusters each:

With two VCF instances, each instance has its own management domain, vCenter Server, and SSO domain. Each instance operates in a consolidated architecture, where tenant clusters (workload domains) are managed by the instance's vCenter. However, the key here is that each VCF instance can be fully isolated from the other, allowing:

Each tenant cluster to be assigned a dedicated vCenter (via separate workload domains or vSphere clusters with permissions).

Independent SSO domains per instance, with tenant-specific identity providers configured through federation or external identity sources.

Independent lifecycle management, as each VCF instance can be upgraded or patched separately.

Splitting 28 tenants into 14 per instance is feasible, as VCF 5.2 supports up to 25 workload domains per instance (per the VCF Design Guide), and tenant isolation can be achieved at the cluster level with proper permissions and NSX segmentation. This option meets all requirements.

D). Two VCF instances with standard architecture model and 14 isolated SSO domains each:

In a standard architecture, each VCF instance has one vCenter Server and one SSO domain. While having two instances provides lifecycle independence, the mention of "14 isolated SSO domains each" is misleading and unsupported. A single vCenter Server (and thus a single VCF instance) supports only one SSO domain. It's possible this intends to mean 14 tenants with isolated identity configurations, but this would still conflict with the single-SSO limitation per instance. Even with two instances, achieving 14 isolated SSO domains per instance is not architecturally possible in VCF 5.2. This option fails the identity provider and vCenter requirements.

Conclusion:

Option C (Two VCF instances consolidated architecture model with 14 tenant clusters each) is the only architecture that satisfies all requirements. It provides tenant isolation via separate clusters, supports dedicated vCenter access through permissions or additional vCenter deployments, allows independent identity providers via SSO federation, scales to 28 tenants across two instances, and ensures independent lifecycle management.

NEW QUESTION # 17

As part of an initial stakeholder meeting, one of the stakeholders has stated the following:

* The initial design must be completed within the next 3 months so that hardware can be ordered within the current budget cycle.

How would the architect classify and record this statement?

- A. A requirement
- B. An assumption
- C. A constraint
- D. A risk

Answer: C

Explanation:

This is a constraint, as it defines a non-negotiable time limit imposed by the customer's budgeting timeline.

It restricts the design phase's schedule and deliverables. In VMware conceptual modeling, timing constraints are explicitly captured as constraints rather than requirements or assumptions.

Reference: VMware Cloud Foundation Conceptual Design Guide - Project Timeline and Constraints

NEW QUESTION # 18

An architect is designing a VMware Cloud Foundation (VCF)-based solution. The company policy mandates that all VCF patches and upgrades must be tested in a development environment before applying to production.

Which VCF construct design decision would comply with this mandate?

- A. Deploy two VCF Domains within a VCF Instance.
- B. Deploy two VCF Instances within a VCF Fleet.
- C. Deploy two VCF Fleets within a VCF Private Cloud.
- D. Deploy two VCF vSphere Clusters within a VCF Domain.

Answer: B

Explanation:

Deploying two VCF Instances allows isolation between environments. One instance can serve as development

/testand the other asproduction.

This separation enables patch/upgrade validation without impacting production. VCF architecture supports managing multiple VCF instances in aFleetfor centralized visibility and policy enforcement.

VMware explicitly recommends separating environments for lifecycle testing in environments with strict change control policies.

NEW QUESTION # 19

Which Broadcom products support the configuration of a highly available VMware environment?

- A. Broadcom 25GbE Ethernet Adapter
- B. vSphere HA
- C. Broadcom RAID Controller
- D. vSAN

Answer: B,C,D

Explanation:

Broadcom RAID Controllers, vSphere HA, and vSAN support high availability in VMware environments.

NEW QUESTION # 20

.....

As is known to us, if there are many people who are plugged into the internet, it will lead to unstable state of the whole network, and you will not use your study materials in your lunch time. If you choose our 2V0-13.25 exam question as your study tool, you will not meet the problem. Because the app of our 2V0-13.25 Exam Prep supports practice offline in anytime. If you buy our products, you can also continue your study when you are in an offline state. You will not be affected by the unable state of the whole network. You can choose to use our 2V0-13.25 exam prep in anytime and anywhere.

Mock 2V0-13.25 Exam: <https://www.testkingit.com/VMware/latest-2V0-13.25-exam-dumps.html>

VMware 2V0-13.25 Latest Braindumps Book Comprehensive study with version SOFT, Largest international companies in the world bring about some lever standard into the sphere of IT field like VMware 2V0-13.25 exams, TestKingIT Mock 2V0-13.25 Exam offers an absolutely free demo version to test the product with sample features before actually buying it, We have clear data collected from customers who chose our 2V0-13.25 actual tests, the passing rate is 98-100 percent.

Securing routing protocols and the control plane, So if you choose to buy 2V0-13.25 test questions and dumps it is more efficient for you to pass the test exam.

Comprehensive study with version SOFT, Largest international companies in the world bring about some lever standard into the sphere of IT field like VMware 2V0-13.25 Exams.

Perfect VMware - 2V0-13.25 Latest Braindumps Book

TestKingIT offers an absolutely free demo version to test the product with sample features before actually buying it, We have clear data collected from customers who chose our 2V0-13.25 actual tests, the passing rate is 98-100 percent.

By practicing and remember the points 2V0-13.25 in them, your review preparation will be highly effective and successful.
