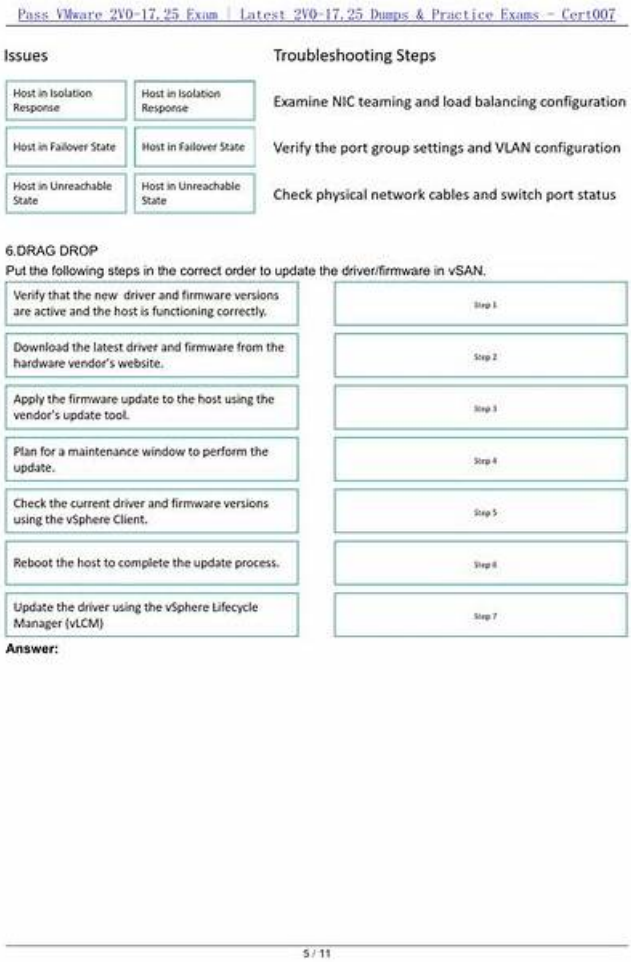
New 2V0-17.25 Test Topics & Passing 2V0-17.25 Score Feedback



Pass VMware 2V0-17.25 Exam | Latest 2V0-17.25 Dumps & Practice Exams - Cert007

Issues

Troubleshooting Steps

Host in Isolation Response	Host in Isolation Response	Examine NIC teaming and load balancing configuration
Host in Failover State	Host in Failover State	Verify the port group settings and VLAN configuration
Host in Unreachable State	Host in Unreachable State	Check physical network cables and switch port status

6.DRAG DROP

Put the following steps in the correct order to update the driver/firmware in vSAN.

Verify that the new driver and firmware versions are active and the host is functioning correctly.	Step 1
Download the latest driver and firmware from the hardware vendor's website.	Step 2
Apply the firmware update to the host using the vendor's update tool.	Step 3
Plan for a maintenance window to perform the update.	Step 4
Check the current driver and firmware versions using the vSphere Client.	Step 5
Reboot the host to complete the update process.	Step 6
Update the driver using the vSphere Lifecycle Manager (vLCM)	Step 7

Answer:

5 / 11

P.S. Free 2026 VMware 2V0-17.25 dumps are available on Google Drive shared by PracticeDump: https://drive.google.com/open?id=1PGMlQydI0tPzKfHC68zFAAkiiQIVHceH

The VMware 2V0-17.25 certification exam also enables you to stay updated and competitive in the market which will help you to gain more career opportunities. Do you want to gain all these 2V0-17.25 certification exam benefits? Looking for the quick and complete VMware Cloud Foundation 9.0 Administrator (2V0-17.25) exam dumps preparation way that enables you to pass the VMware Cloud Foundation 9.0 Administrator in 2V0-17.25 certification exam with good scores?

We have free demos of our 2V0-17.25 exam questions for your information and the demos offer details of real exam contents. All contents of 2V0-17.25 practice quiz contain what need to be mastered. And not only the content is contained that you can free download from the website, also you can find that the displays of the 2V0-17.25 Study Materials can be tried as well for we have three versions, according we also have three kinds of free demos.

Passing 2V0-17.25 Score Feedback - 2V0-17.25 Download

The top personal and professional VMware 2V0-17.25 certification exam benefits are recognition of skills, updated knowledge, more career opportunities, instant promotion, and increase in salary, etc. If your answer is yes first of all you have to enroll in the

VMware Cloud Foundation 9.0 Administrator (2V0-17.25) certification exam and put all your efforts to pass this career advancement certification exam. Are you looking for the right and recommended way to pass the VMware 2V0-17.25 exam?

VMware 2V0-17.25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments.
Topic 2	• VMware Cloud Foundation Fundamentals: This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment.
Topic 3	• Deploy, Configure, and Operate VMware Cloud Foundation (VCF): This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation.
Topic 4	• IT Architectures, Technologies, Standards: This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q74-Q79):

NEW QUESTION # 74
An administrator has been tasked to create a new cluster in an existing VMware Cloud Foundation (VCF) instance. The hosts within the cluster have different generation Intel processors.
What feature must be configured on the cluster to ensure VMware Distributed Resource Scheduler (DRS) is able to automatically move Virtual Machines within the cluster?

- A. vSphere Availability
- B. Enhanced vMotion Compatibility
- C. Host Affinity Rules
- D. vSphere Fault Tolerance

Answer: B

Explanation:
The vSphere 9.0 Resource Management Guide describes Enhanced vMotion Compatibility (EVC) as the mechanism that masks CPU instruction set differences across ESXi hosts, presenting a consistent baseline to VMs.
The documentation states:
"EVC ensures vMotion compatibility across hosts with different CPU generations by exposing a uniform set of CPU features to all virtual machines in the cluster." vSphere Fault Tolerance (A): Provides continuous availability for individual VMs but does not address CPU instruction compatibility.
vSphere Availability (B): Refers to HA (High Availability) which handles VM failover, not CPU feature alignment.

Host Affinity Rules (C): Control placement of VMs but cannot solve compatibility between mixed CPU generations.
Enhanced vMotion Compatibility (D): Specifically addresses the requirement for vMotion and DRS across mixed CPU generations, making it the correct answer.

NEW QUESTION # 75
A Cloud Administrator has been tasked with verifying all of the prerequisites are in place prior to deploying VMware Aria Suite Lifecycle.
The following information has been provided for the Aria Suite Lifecycle implementation:
- hostname: lcm
- domain: vcf.company.com
- IP address: 10.0.0.150 /24 -
- IP gateway: 10.0.0.1 -
Which three items must the Cloud Administrator ensure are available prior to deploying VMware Aria Suite Lifecycle? (Choose three.)

- A. Connectivity between Application Virtual Networks, Management Network, and network services (DNS and NTP)
- B. A DNS PTR Record for 10.0.0.1 that points to lcm.vcf.company.com
- C. A CA-signed SSL certificate for Aria Suite Lifecycle added to SDDC Manager
- D. A DNS A Record for lcm.vcf.company.com that points to 10.0.0.150
- E. The IP address for the Standalone Tier 1 Load Balancer for VMware Aria components is prepared

Answer: A,D,E

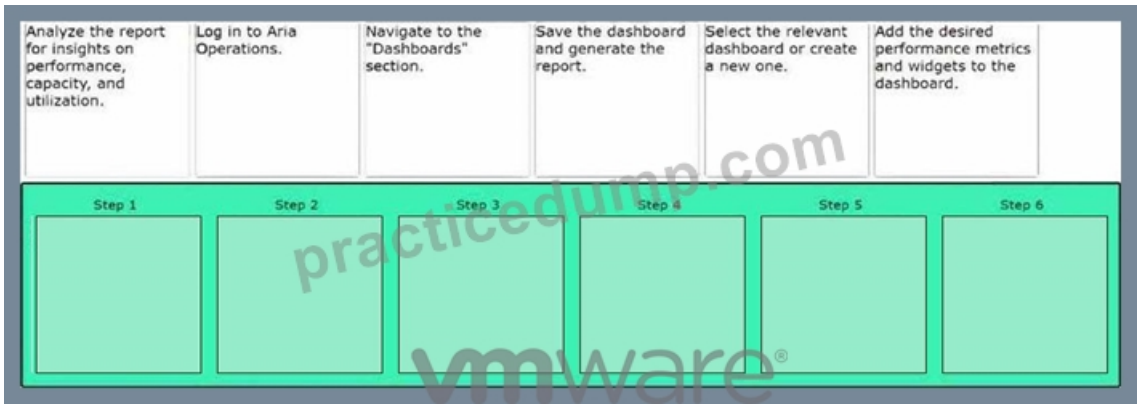
NEW QUESTION # 76
A Cloud Administrator has been tasked with verifying all of the prerequisites are in place prior to deploying VMware Aria Suite Lifecycle.
The following information has been provided for the Aria Suite Lifecycle implementation:
hostname: lcm
domain: vcf.company.com
IP address: 10.0.0.150/24
IP gateway: 10.0.0.1
Which two items must the Cloud Administrator ensure are available prior to deploying VMware Aria Suite Lifecycle? (Choose two.)

- A. A DNS PTR Record for 10.0.0.1 that points to lcm.vcf.company.com
- B. A CA-signed SSL certificate for Aria Suite Lifecycle added to SDDC Manager
- C. An Application Virtual Network is configured in SDDC Manager
- D. A DNS A Record for lcm.vcf.company.com that points to 10.0.0.150
- E. An allocated IP address for the NSX standalone Tier-1 Gateway

Answer: D,E

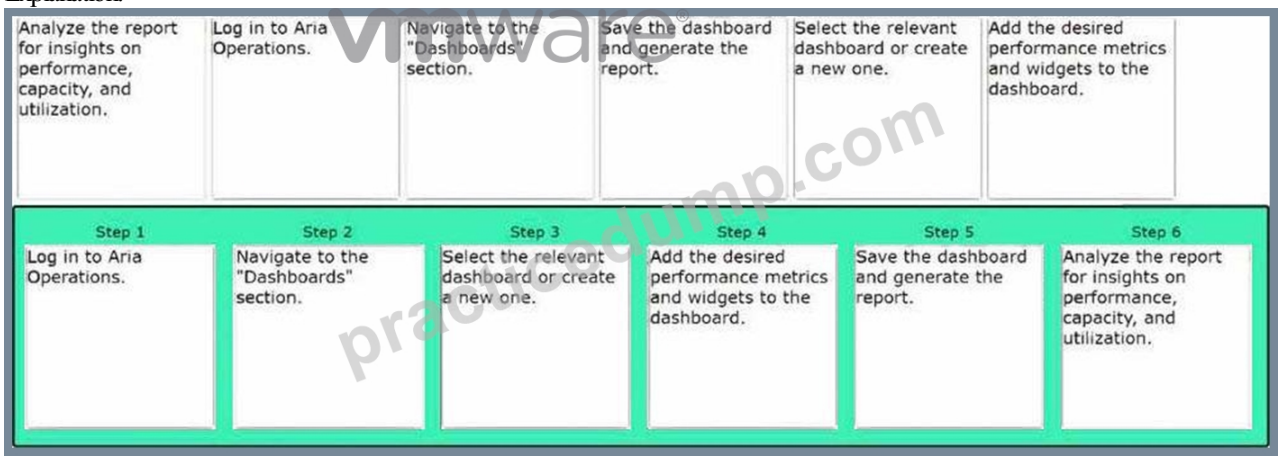
Explanation:
A DNS A record is necessary to resolve the hostname (lcm.vcf.company.com) to the specified IP address (10.0.0.150) so that it can be correctly accessed during the deployment.
A DNS PTR record is required for reverse DNS lookup, which ensures proper identification of the IP address (10.0.0.1) to the hostname (lcm.vcf.company.com), which is important for network validation during the deployment process.

NEW QUESTION # 77
DRAG DROP
Arrange the steps in the correct order to generate a performance report in Aria Operations.



Answer:

Explanation:



NEW QUESTION # 78
An administrator has been tasked with creating a real-time view of key performance indicators for their VMware Cloud Foundation private cloud and an automated monthly report that shows the capacity consumed by each development team who use the environment. Which VCF component should the administrator configure to complete their objectives?

- A. VMware Aria Operations for Logs
- B. VMware Aria Operations
- C. VMware Aria Operations for Networks
- D. VMware Aria Operations for Applications

Answer: B

Explanation:
VMware Aria Operations provides comprehensive monitoring, analytics, and performance management for the entire VMware Cloud Foundation environment. It enables real-time views of key performance indicators (KPIs) and can be configured to generate automated reports on capacity consumption, which aligns with the administrator's objectives.

NEW QUESTION # 79
