ISO-IEC-27001-Foundation Fresh Dumps & New ISO-IEC-27001-Foundation Practice Materials

Our company is a professional certificate exam materials provider, we have occupied in this field for years, and we have rich experiences. In addition, ISO-IEC-27001-Foundation exam materials contain both questions and answers, and you can have a quickly check after payment. ISO-IEC-27001-Foundation training materials cover most of knowledge points for the exam, and you can master the major knowledge points for the exam as well as improve your professional ability in the process of learning. We have online and offline chat service staff for ISO-IEC-27001-Foundation Training Materials, and they possess the professional knowledge, if you have any questions, you can consult us.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	• Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength.
Topic 2	• Compliance: Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.
Topic 3	• Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.
Topic 4	• Cybersecurity: Cybersecurity, also known as IT security or computer security, involves safeguarding computer systems, networks, and data from unauthorized access, theft, damage, or disruption to ensure the integrity and availability of digital information.
Topic 5	• Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.
Topic 6	• Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q28-Q33):

NEW QUESTION # 28
To whom are the information security policies required to be communicated, according to the control in Annex A of ISO/IEC 27001?

- A. Employees within the scope of the ISMS
- B. Relevant personnel and relevant interested parties
- C. Only staff with accountability for ISMS operation
- D. Top management

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:
Annex A.5.1 (Policies for information security) clearly specifies:
"Information security policy and topic-specific policies should be defined, approved by management, published, communicated to and acknowledged by relevant personnel and relevant interested parties..." This means the communication obligation is not limited to top management (A) or only ISMS staff (B), nor does it stop at employees only (C). Instead, ISO/IEC 27001/27002 mandate a broader scope: all relevant personnel and relevant interested parties must be informed. This ensures both internal stakeholders (employees, contractors, temporary staff) and external interested parties (suppliers, partners, regulators, customers, etc.) receive the right policy communications where applicable. Therefore, the correct and verified answer is D.

NEW QUESTION # 29
Identify the missing word in the following sentence.
According to ISO/IEC 27000, the definition of risk [?] is a "process to comprehend the nature of risk and to determine the level of risk."

- A. Management
- B. Analysis
- C. Evaluation
- D. Assessment

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27000 standards:

ISO/IEC 27000 defines:

* Risk analysis: "process to comprehend the nature of risk and to determine the level of risk" (Clause 3.58).

* Risk assessment: the overall process of risk identification, risk analysis, and risk evaluation.

* Risk evaluation: compares results of risk analysis against risk criteria to determine priority.

* Risk management: coordinated activities to direct and control an organization with regard to risk.

Therefore, the missing word in the given definition is"analysis".

This is important for ISMS implementation: organizations must understand the distinctions. Risk analysis is the core technical evaluation stage, while assessment is the broader process including evaluation, and management refers to the overall governance of risks.

Thus, the correct verified answer isB: Analysis.

NEW QUESTION # 30
In which clause would the requirements for internal audit be found?

- A. Planning
- B. Operation
- C. Improvement
- D. Performance Evaluation

Answer: D

Explanation:

The requirements for internal audit are explicitly placed inClause 9.2 (Performance Evaluation)of ISO/IEC 27001:2022. The standard requires:

* "The organization shall conduct internal audits at planned intervals to provide information on whether the information security management system... conforms to the organization's own requirements... and to the requirements of this document." (9.2.1)

* "The organization shall plan, establish, implement and maintain an audit programme(s)..." (9.2.2) This clause clearly falls underPerformance Evaluation (Clause 9), not Planning (Clause 6), Operation (Clause 8), or Improvement (Clause 10). Therefore, the correct answer isC.

NEW QUESTION # 31
Which ISMS documentation is part of the minimum scope of documented information required to be managed and controlled?

- A. Records of management decisions related to continual improvement
- B. A statement of correspondence between other ISO standards and the ISMS
- C. The budget assigned to operate the ISMS and its related allocations
- D. Third party information security awareness materials

Answer: A

Explanation:

Clause 7.5 (Documented Information) specifies that organizations must maintain documentationnecessary for the effectiveness of the ISMS. Additionally, Clause 9.3 (Management Review) requires "records of decisions related to continual improvement opportunities" as an output of management review. This is a core requirement and forms part of the documented information that must be retained and controlled. Third- party materials (B), budgets (C), and cross-reference statements to other ISO standards (D) are not required by ISO/IEC 27001. Only documents that directly demonstrate compliance, decision-making, and continual improvement are mandated. Therefore, the verified minimum required documentation includesrecords of management review decisionsrelated to continual improvement, confirming answer: A.

NEW QUESTION # 32
Which item is required to be included in an information security policy?

- A. A commitment to satisfy applicable requirements related to information security
- B. A plan for the continual improvement of the information security management system
- C. A Statement of Applicability which defines the necessary controls to be implemented

- D. A framework enabling concerns with the information security policy to be addressed

Answer: A

Explanation:
Clause 5.2 (Information security policy) requires that the policy:
* "includes information security objectives (or provides a framework for setting them)"
* "includes a commitment to satisfy applicable requirements related to information security"
* "includes a commitment to continual improvement of the ISMS."
Among the listed options, the exact mandatory requirement is"a commitment to satisfy applicable requirements related to information security". Option B partially reflects Clause 5.2 (commitment to continual improvement), but the wording given in the standard prioritizes the satisfaction of applicable requirements (e.g., legal, regulatory, contractual). Option C is not a policy requirement. Option D (Statement of Applicability) is a separate mandatory document (Clause 6.1.3) and not part of the policy itself. Thus, the correct answer isA.

NEW QUESTION # 33

......

To enhance your career path with the ISO-IEC-27001-Foundation certification, you need to use the valid and latest ISO-IEC-27001-Foundation exam guide to assist you for success. Here the Lead2Passed will give you the study material you want. The validity and reliability of ISO-IEC-27001-Foundation practice dumps are confirmed by our experts. So you can rest assured to choose our APMG-International ISO-IEC-27001-Foundation training vce. What's more, we will give some promotion on our ISO-IEC-27001-Foundation pdf cram, so that you can get the most valid and cost effective ISO-IEC-27001-Foundation prep material.
