

# Trustworthy FCSS\_SDW\_AR-7.4 Practice - Quiz 2026

## Fortinet Realistic Reliable FCSS - SD-WAN 7.4 Architect

### Braindumps Questions

P.S. Free & New FCSS\_SDW\_AR-7.4 dumps are available on Google Drive shared by PDFDumps:  
<https://drive.google.com/open?id=1l6eSp0zNk4LqGs3KEpSCvyB9vUUD-hqn>

It will improve your skills to face the difficulty of the FCSS\_SDW\_AR-7.4 exam questions and accelerate the way to success in IT filed with our latest study materials. Free demo of our FCSS\_SDW\_AR-7.4 dumps pdf can be downloaded before purchase and 24/7 customer assisting support can be access. Well preparation of FCSS\_SDW\_AR-7.4 Practice Test will be closer to your success and get authoritative certification easily.

### Fortinet FCSS\_SDW\_AR-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>SD-WAN Configuration: This section of the exam measures the skills of network engineers and covers configuring a basic SD-WAN setup. Candidates are expected to demonstrate their ability to define SD-WAN members and zones effectively, ensuring foundational network segmentation and management.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Rules and Routing: Targeted at network engineers, this section assesses the ability to configure SD-WAN rules and routing policies. Candidates will be tested on managing traffic flow and prioritization across the SD-WAN infrastructure.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>SD-WAN Troubleshooting: This part assesses the troubleshooting skills of network support specialists. Candidates should be able to diagnose and resolve issues related to SD-WAN rules, session behaviors, routing inconsistencies, and ADVPN connectivity problems to maintain seamless network operations.</li></ul>

### FCSS\_SDW\_AR-7.4 Study Practice Guide Give Customers Best FCSS - SD-WAN 7.4 Architect Exam Materials

We provide our customers with the most reliable learning materials about FCSS\_SDW\_AR-7.4 certification exam and the guarantee of pass. We assist you to prepare the key knowledge points of FCSS\_SDW\_AR-7.4 actual test and obtain the up-to-dated exam answers. All FCSS\_SDW\_AR-7.4 Test Questions offered by us are tested and selected by our senior experts in IT filed, which only need little time to focus on the practice and the preparation.

### Fortinet FCSS - SD-WAN 7.4 Architect Sample Questions (Q51-Q56):

#### NEW QUESTION # 51

You are tasked with configuring ADVPN 2.0 on an SD-WAN topology already configured for ADVPN. What should you do to implement ADVPN 2.0 in this scenario?

- A. Update the IPsec tunnel configuration on the branches.
- B. Update the SD-WAN configuration on the branches.
- C. Update the IPsec tunnel configurations on the hub.
- D. Delete the existing ADVPN configuration and configure ADVPN 2.0.

**Answer: C**

**NEW QUESTION # 52**

Refer to the exhibits.

An administrator is testing application steering in SD-WAN. Before generating test traffic, the administrator collected the information shown in the first exhibit. After generating GoToMeeting test traffic, the administrator examined the corresponding traffic log on FortiAnalyzer, which is shown in the second exhibit.

The administrator noticed that the traffic matched the implicit SD-WAN rule, but they expected the traffic to match rule ID 1. Which two reasons explain why some log messages show that the traffic matched the implicit SD-WAN rule? (Choose two.)

- A. No configured SD-WAN rule matches the traffic related to the collaboration application GoToMeeting
- B. Full SSL inspection is not enabled on the matching firewall policy.
- C. FortiGate could not refresh the routing information on the session after the application was detected.
- D. The session 3-tuple did not match any of the existing entries in the ISDB application cache.

**Answer: C,D**

**NEW QUESTION # 53**

Refer to the exhibits. An administrator is testing application steering in SD-WAN. Before generating test traffic, the administrator collected the information shown in the first exhibit. After generating GoToMeeting test traffic, the administrator examined the corresponding traffic log on FortiAnalyzer, which is shown in the second exhibit.

The administrator noticed that the traffic matched the implicit SD-WAN rule, but they expected the traffic to match rule ID 1. Which two reasons explain why some log messages show that the traffic matched the implicit SD-WAN rule? (Choose two.)

- A. No configured SD-WAN rule matches the traffic related to the collaboration application GoToMeeting
- B. Full SSL inspection is not enabled on the matching firewall policy.
- C. FortiGate could not refresh the routing information on the session after the application was detected.
- D. The session 3-tuple did not match any of the existing entries in the ISDB application cache.

**Answer: C,D**

**NEW QUESTION # 54**

Refer to the exhibits. You use FortiManager to configure SD-WAN on three branch devices.

When you install the device settings, FortiManager prompts you with the error "Copy Failed" for the device branch1\_fat. When you click the log button, FortiManager displays the message shown in the exhibit.

Based on the exhibits, which statement best describes the issue and how you can resolve it?

- A. Gateways for all members in a zone must be defined the same way. Specify the gateway of the SD-WAN member port1 without metadata variables.
- B. Remove the installation target for the SD-WAN member port4. You cannot combine metadata variable and installation targets.
- C. Check the connection between branch1\_fgt and FortiManager
- D. Check the metadata variable definitions, and review the per-device mapping configuration.

**Answer: D**

Explanation:

The error message clearly states invalid ip addr for the metadata variable \${sdwan\_port1\_gw}, which means the per-device value for this variable is not defined or is incorrectly mapped. You must verify the metadata mapping for branch1\_fgt to ensure that \${sdwan\_port1\_gw} is assigned a valid IP address.

**NEW QUESTION # 55**

Refer to the exhibit. The administrator configured the IPsec tunnel VPN1 on a FortiGate device with the parameters shown in exhibit.

Based on the configuration, which three conclusions can you draw about the characteristics and requirements of the VPN tunnel?

(Choose three.)

- A. The administrator must manually assign the tunnel interface IP address on the hub side
- B. The remote end must support IKEv2.
- C. The tunnel interface IP address on the spoke side is provided by the hub.
- D. This configuration allows user-defined overlay IP addresses.
- E. The remote end can be a third-party IPsec device.

Answer: A,D,E

## NEW QUESTION # 56

.....

"There is no royal road to learning." Learning in the eyes of most people is a difficult thing. People are often not motivated and but have a fear of learning. However, the arrival of FCSS\_SDW\_AR-7.4 study materials will make you no longer afraid of learning. FCSS\_SDW\_AR-7.4 study material provides you with a brand-new learning method that lets you get rid of heavy schoolbags, lose boring textbooks, and let you master all the important knowledge in the process of making a question. Please believe that with FCSS\_SDW\_AR-7.4 Study Materials, you will fall in love with learning.
