

# New 3V0-32.23 New Study Notes Pass Certify | Valid 3V0-32.23 Actualtest: Cloud Management and Automation Advanced Design

REGN NO.:           LEVEL:

O-PR-S32

M3-R5/A3-R5  
(Programming and Problem Solving Through Python)  
Theoretical  
BATCH : S32

Q. 1 Write a Python function that takes two lists and returns True if they have at least one common item. (25)

Q. 2 Write a Python function that takes a string as parameter and returns a string with every successive repetitive character replaced by & e.g. Parameter may become Par&met&r. (25)

Q. 3 Write a Python function to find the sum of all numbers between 100 and 500 which are divisible by 2. (30)

The clients can try out and download our 3V0-32.23 study materials before their purchase. They can immediately use our 3V0-32.23 training guide after they pay successfully. And our expert team will update the 3V0-32.23 study materials periodically after their purchase and if the clients encounter the problems in the course of using our 3V0-32.23 Learning Engine our online customer service staff will enthusiastically solve their problems.

VMware 3V0-32.23 is a certification exam designed for IT professionals who are seeking to validate their skills and knowledge in cloud management and automation. 3V0-32.23 exam is perfect for those who want to demonstrate their expertise in designing and implementing cloud solutions using VMware technologies. It is an advanced-level certification exam that tests the candidate's ability to design and implement VMware cloud management and automation solutions.

VMware 3V0-32.23 exam is a certification test that focuses on Cloud Management and Automation Advanced Design. It is designed for IT professionals who want to demonstrate their skills and knowledge in designing and deploying complex cloud management solutions using VMware technologies. 3V0-32.23 Exam covers various topics, including cloud computing concepts, automation tools, resource management, and security policies.

VMware 3V0-32.23 certification exam is a comprehensive exam that tests the candidate's knowledge of various cloud management

and automation design concepts. 3V0-32.23 exam consists of 60 multiple-choice questions that need to be completed within 120 minutes. 3V0-32.23 exam fee is \$450, and candidates must score at least 300 out of 500 to pass the exam. Cloud Management and Automation Advanced Design certification is valid for two years, after which the candidate needs to recertify to maintain their status.

## Quiz 2026 VMware Reliable 3V0-32.23 New Study Notes

As one of the most professional dealer of practice materials, we have connection with all academic institutions in this line with proficient researchers of the knowledge related with the 3V0-32.23 Practice Exam to meet your tastes and needs, please feel free to choose. We want to specify all details of various versions. You can decide which one you prefer, when you made your decision and we believe your flaws will be amended and bring you favorable results even create chances with exact and accurate content.

### VMware Cloud Management and Automation Advanced Design Sample Questions (Q110-Q115):

#### NEW QUESTION # 110

An architect is designing a VMware Aria Automation solution with the following customer requirements:

The solution must be highly available.

The solution must be resilient to a single ESXi host failure.

Which three design decisions would support a customer requirements? (Choose three.)

- A. Configure a 3-node VMware Identity Manager cluster with an external load balancer.
- B. Configure a 3-node VMware Aria Automation cluster with an external load balancer.
- C. Configure a 3-node VMware Identity Manager cluster with an embedded load balancer.
- D. Configure a 3-node VMware Aria Automation cluster with an embedded load balancer.
- E. Configure vSphere Distributed Resource Scheduler (DRS) affinity rules for all VMware Aria Automation nodes.
- F. Configure vSphere Distributed Resource Scheduler (DRS) anti-affinity rules for all VMware Aria Automation nodes.

**Answer: A,B,F**

Explanation:

A 3-node VMware Aria Automation cluster and a 3-node VMware Identity Manager cluster, both behind external load balancers, provide high availability. DRS anti-affinity rules ensure nodes are distributed across different ESXi hosts, maintaining resilience in the event of a single host failure.

#### NEW QUESTION # 111

An emerging software start-up company is growing rapidly. The Engineering department is looking to quickly scale its testing environment into the cloud. The vRealize Automation architect has been tasked with recommending the appropriate user role for a newly-formed integration team to integrate VMware vCloud Air into the Engineering Tenant.

What is the minimum user role that must be granted to the integration team?

- A. Container Administrator
- B. IaaS Administrator
- C. Tenant Administrator
- D. Fabric Administrator

**Answer: B**

#### NEW QUESTION # 112

What role does VMware Aria Operations play within a Cloud Management logical design?

- A. Analyzing financial data
- B. Managing human resources
- C. Creating marketing campaigns
- D. Monitoring and maintaining IT infrastructure

**Answer: D**

### NEW QUESTION # 113

An architect is designing a VMware Aria Operations for Logs cluster for an organization with the following requirements:

The organization has two main datacenters located in two separate locations.

Two separate clusters are created, one in each datacenter to collect and analyze logs locally.

The organization wants to configure redundancy for their log event data.

The organization must be able to access same data from both the datacenters.

Which one of these defined strategies should the architect follow to satisfy the requirements?

- A. Create a single VMware Aria Operations for Logs cluster to collect and analyze logs from both the datacenters.
- **B. Enable log forwarding with tags on each of the VMware Aria Operations for Logs clusters.**
- C. Configure one datacenter to backup the cluster to the opposite datacenter.
- D. Configure a VMware Aria Operations for Logs stretched cluster spanning both the datacenters.

**Answer: B**

Explanation:

Enabling log forwarding with tags on both clusters ensures that log data is replicated between datacenters, providing redundancy and allowing access to the same data from both locations, while maintaining local analysis capabilities.

### NEW QUESTION # 114

What level of design will contain an automation platform, an operational monitoring platform, and a desktop platform?

- A. Detailed Design
- **B. Logical Design**
- C. Conceptual Design
- D. Physical Design

**Answer: B**

### NEW QUESTION # 115

.....

The competition in today's society is the competition of talents. Can you survive and be invincible in a highly competitive society? Can you gain a foothold in such a complex society? If your answer is "no", that is because your ability is not strong enough. Our 3V0-32.23 test braindumps are in the leading position in the editorial market, and our advanced operating system for 3V0-32.23 Latest Exam torrent has won wide recognition. As long as you choose our 3V0-32.23 exam questions and pay successfully, you do not have to worry about receiving our learning materials for a long time. We assure you that you only need to wait 5-10 minutes and you will receive our 3V0-32.23 exam questions which are sent by our system.
