

Sample 2V0-11.25 Questions & New 2V0-11.25 Test Answers

P.S. Free 2026 VMware 2V0-11.25 dumps are available on Google Drive shared by ActualVCE: <https://drive.google.com/open?id=1oMCHPcYRb1haJt5mpq09Uv9gCekX0NaR>

ActualVCE has designed VMware Cloud Foundation 5.2 Administrator (2V0-11.25) pdf dumps format that is easy to use. Anyone can download the VMware 2V0-11.25 pdf questions file and use it from any location or at any time. VMware PDF Questions files can be used on laptops, tablets, and smartphones. Moreover, you will get actual VMware Cloud Foundation 5.2 Administrator (2V0-11.25) exam questions in this VMware 2V0-11.25 pdf dumps file. These VMware 2V0-11.25 exam questions have a high chance of coming in the actual 2V0-11.25 test. You have to memorize these 2V0-11.25 questions and you will pass the VMware Cloud Foundation 5.2 Administrator (2V0-11.25) test with brilliant results.

VMware 2V0-11.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Troubleshoot and Optimize the VMware by Broadcom Solution: This section of the exam measures skills of the cloud infrastructure support engineer and covers diagnosing and resolving technical issues related to VMware Cloud Foundation deployment and operations. It includes troubleshooting the deployment process, vSphere, networking, vSAN, SDDC Manager, and Aria Suite. The section also evaluates the ability to optimize infrastructure performance, manage resources, and ensure efficient operation, focusing on the practical aspects of maintaining and enhancing VMware Cloud Foundation environments.
Topic 2	<ul style="list-style-type: none">• Plan and Design the VMware by Broadcom Solution: There are no testable objectives in this section. Still, it is intended for solution architects who need to plan and design VMware Cloud Foundation deployments, focusing on sizing, architecture selection, and network• storage design.

Topic 3	<ul style="list-style-type: none"> IT Architectures, Technologies, Standards: There are no testable objectives in this section. However, this area establishes the foundational knowledge expected of cloud administrators, such as understanding basic IT infrastructure, virtualization, and cloud models. This section is relevant for cloud administrators and infrastructure engineers.
Topic 4	<ul style="list-style-type: none"> VMware by Broadcom Solution: This section of the exam measures skills of the cloud administrator and covers identifying VMware Cloud Foundation components like vSphere, vSAN, and NSX, as well as their architecture, including stretched configurations. It also assesses knowledge of requirements for implementing private cloud solutions, use cases for VMware Aria Suite components, vSphere IaaS control plane, Data Services Manager, and VMware Cloud Foundation Add-Ons. The focus is on the ability to recognize and apply the correct VMware solutions for various enterprise scenarios.
Topic 5	<ul style="list-style-type: none"> Install, Configure, Administrate the VMware by Broadcom Solution: This section of the exam measures skills of the VMware Cloud Foundation administrator and covers the installation and configuration processes for VMware Cloud Foundation components, deploying and configuring management domains, NSX Edge Clusters, and the VMware Aria Suite Lifecycle. It assesses the ability to deploy workload domains, enable vSphere IaaS control plane, create vSphere namespaces, manage stretched clusters, and use VMware Cloud Foundation APIs. Candidates are also tested on scaling deployments, performing Day 2 operations like backup, recovery, lifecycle management, VM lifecycle management, configuring networking and storage, managing ESXi hosts, implementing encryption, and operationalizing VMware NSX, vSAN, and Aria Suite. The section is comprehensive, targeting those responsible for the ongoing administration and optimization of VMware environments.

New 2V0-11.25 Test Answers & 2V0-11.25 Flexible Learning Mode

We provide varied functions to help the learners learn our 2V0-11.25 study materials and prepare for the exam. The self-learning and self-evaluation functions of our 2V0-11.25 exam questions help the learners check their learning results and the statistics and report functions help the learners find their weak links and improve them promptly. And you will be more confident as you know the inform of the 2V0-11.25 Exam and the questions and answers.

VMware Cloud Foundation 5.2 Administrator Sample Questions (Q97-Q102):

NEW QUESTION # 97

An administrator is deploying a new VMware Cloud Foundation (VCF) environment. After uploading the completed Deployment Parameter Workbook, the validation task fails and an error message is displayed within the VMware Cloud Builder GUI. Which log file can the administrator use to identify the cause of the validation error?

- A. sos.log
- B. domainmanager.log
- C. vcf-bringup-debug.log
- D. jsongenerator-`<timestamp>`.log

Answer: C

Explanation:

According to the official VMware Cloud Foundation Deployment Guide and VMware Cloud Builder troubleshooting documentation, the primary log file used for tracking and diagnosing bring-up and validation errors in a new VCF deployment is:

A). vcf-bringup-debug.log

Exact Extract from VMware Documentation:

"The vcf-bringup-debug.log file records detailed information about all bring-up operations, including parameter validation checks, environment checks, and errors encountered during the deployment process.

When a validation task fails in the Cloud Builder GUI, this log file provides the necessary diagnostic information to identify the cause of the error." Why Not the Other Options?

B). sos.log Used for SDDC Manager service health and not specific to Cloud Builder validation or deployment tasks.

- C). domainmanager.log:Used for ongoing domain management and operations within SDDC Manager, not for Cloud Builder or bring-up process.
- D). jsongenerator-<timestamp>.log:Related to the generation of JSON files from the parameter workbook, but not the source for in-depth validation or deployment errors.

Summary:

When a validation task fails during the deployment of a new VMware Cloud Foundation environment in Cloud Builder, the administrator should review thevcf-bringup-debug.logfile to diagnose and resolve the error, as directed by official VMware documentation.

NEW QUESTION # 98

An Administrator is tasked with setting up a new workload domain with VMware Cloud Foundation. The workload domain will have the following configuration:

vSphere with Tanzu to support Kubernetes workloads

NSX for container and virtual machine networking

Aria Operations will be configured for monitoring of the infrastructure Which three steps should be taken to complete the installation and configuration of this workload domain? (Choose three.)

- A. Deploy the Supervisor Cluster for IaaS Control Plane.
- B. Enable workload management in vCenter Server.
- C. Integrate IaaS Control Plane with the existing vCenter Server.
- D. Configure NSX segments for Kubernetes namespaces.
- E. Install Aria Operations agents on all ESXi hosts.

Answer: A,B,D

Explanation:

NSX segments need to be configured for Kubernetes namespaces to provide network connectivity and isolation for the Kubernetes workloads that will be deployed.

The Supervisor Cluster must be deployed as part of the IaaS Control Plane to manage the Kubernetes workloads and enable vSphere with Tanzu.

Enabling workload management in vCenter Server allows the deployment and management of Kubernetes workloads alongside virtual machines, utilizing vSphere with Tanzu.

NEW QUESTION # 99

To help troubleshoot an issue with the vSphere Supervisor, an administrator must log into the Supervisor Control Plane VMs. Which three actions should the administrator take to meet the objective? (Choose three.)

- A. Update the <password> by running /usr/lib/vmware/auth/bin/chpw admin.
- B. Log into the Supervisor Control Plane VM using the root user and <password>.
- C. Obtain the <password> by running /usr/lib/vmware-wcp/decryptK8Pwd.py.
- D. Log into the vCenter Server Appliance using SSH.
- E. Log into the SDDC Manager appliance using SSH.
- F. Log into the Supervisor Control Plane VM using the admin user and <password>.

Answer: C,D,E

Explanation:

<https://knowledge.broadcom.com/external/article/323407/troubleshooting-vsphere-with-tanzu-tkgs.html> First SSH into vCenter and run /usr/lib/vmware-wcp/decryptK8Pwd.py

NEW QUESTION # 100

An administrator logged into NSX Manager to view host details. The administrator noticed that the "Tunnel" status for the ESXi hosts, in the VI workload domain, is showing down.

What is a possible reason the ESXi host tunnels are showing down in NSX?

- A. The IGMP has been disabled on the network.
- B. The MTU setting for the host TEPS has been set to 1500.

- C. The overlay traffic is being blocked by the gateway firewall.
- D. The host TEP IP addresses are being dynamically assigned through DHCP instead of being statically assigned.

Answer: B

Explanation:

The "Tunnel" status in NSX indicates the status of the VXLAN tunnels used for communication between ESXi hosts. If the MTU setting for the host Tunnel Endpoint (TEP) is incorrectly set to 1500, this can cause issues with VXLAN encapsulation, as VXLAN packets typically require an MTU of at least 1600 bytes to function correctly. Setting the MTU too low can cause packet drops and result in the tunnel status being down.

NEW QUESTION # 101

A virtual private cloud administrator is regularly tasked to provision and manage new application workloads with dedicated subnets. Which two capabilities of VMware Cloud Foundation (VCF) can be used to alleviate the workload of the administrator with minimal interaction with the networking team? (Choose two.)

- A. Configure vSAN storage policies for each application.
- **B. Deploy Aria Automation to enable self-service provisioning.**
- **C. Use of NSX overlay networks.**
- D. Use vSphere Resource Pools to allocate networking resources to different applications.

Answer: B,C

Explanation:

Deploying VMware Aria Automation enables self-service blueprints that allow the administrator or application owners to provision workloads, including dedicated networks, without direct requests to the networking team.

NSX overlay networks decouple the virtual network from the physical underlay, enabling the creation of tenant-specific subnets on demand without changes to the physical network.

NEW QUESTION # 102

.....

Our 2V0-11.25 quiz torrent boost 3 versions and they include PDF version, PC version, App online version. Different version boosts different functions and using method. For example, the PDF version is convenient for the download and printing our 2V0-11.25 exam torrent and is easy and suitable for browsing learning. And the PC version of 2V0-11.25 Quiz torrent can stimulate the real exam's scenarios, is stalled on the Windows operating system. You can use it any time to test your own Exam stimulation tests scores and whether you have mastered our 2V0-11.25 exam torrent.
