Salesforce Certified Administrator exam is designed for individuals who have experience with Salesforce and want to prove their expertise. Salesforce Certified Administrator certification demonstrates that an individual has the knowledge and skills necessary to perform various administrative tasks within the Salesforce platform. The Salesforce Certified Administrator exam covers topics such as data management, security and access, reporting, automation, and customization. With this certification, an individual is recognized as a proficient administrator who can efficiently manage the Salesforce platform.

Salesforce Certified Administrator certification exam is an essential certification for individuals who work with Salesforce applications. It validates the knowledge and skills needed to manage and maintain Salesforce implementations effectively. Holding the certification can lead to better career prospects and higher salaries, making it a valuable investment for anyone looking to advance their career in the Salesforce ecosystem.

## Salesforce Certified Administrator Sample Questions (Q28-Q33):

### NEW QUESTION # 28

The administrator at Ursa Major Solar imported records into an object by mistake.

Which two tools should be used to undo this import?

Choose 2 answers

- A. Data Import Wizard
- B. Data Loader
- C. Weekly Data Export
- D. Mass Delete Records

**Answer: B,D**

### NEW QUESTION # 29

An administrator at Universal Containers needs a simple way to trigger an alert to the director of sales when opportunities reach an amount of \$500,000.

What should the administrator configure to meet this requirement?

- A. Opportunity warning in Kanban View.
- B. Set up Big Deal Alerts for the amount.
- C. Enable Opportunity Update Reminders
- D. Key Deals component on the homepage

**Answer: B**

### NEW QUESTION # 30

The administrator at cloud kicks is trying to debug a screen flow that create contacts. One of the variables in the flow is missing on the debug screen.

What could cause this issue?

- A. The field type is unsupported by debugging.
- B. The available for input checkbox was unchecked.
- C. The flow is an inactive version
- D. The available for output checkbox was unchecked.

**Answer: B**

Explanation:

Explanation

To debug a screen flow that creates contacts, one of the possible causes for a variable missing on the debug screen is that the available for input checkbox was unchecked for that variable. This means that variable cannot be set by external sources such as debug inputs or URL parameters. To fix this issue, check this checkbox for any variable that needs to be set externally. The flow version or field type does not affect variable availability for input. The available for output checkbox only affects whether variables can be passed out of flows or subflows. References:

### NEW QUESTION # 31

Northern Trail Outfitters has a new flow that automatically sets the field values when a new account is created. That the flow is launched by a process, But the flow is not working properly.

What should administrator do to identify the problem?

- A. Setup Email logs and review the send error log.
- B. Review debug logs with the login level.
- C. View the setup audit Trail and review for errors.
- **D. Use the native debug feature in the flow builder.**

**Answer: D**

Explanation:

Explanation

Native debug feature is a tool that can be used to identify the problem with the new flow. Native debug feature allows users to test a flow by running it with different input values and inspecting the output values at each element. Users can also see error messages and warnings that indicate where the flow failed or might fail.

### NEW QUESTION # 32

Users at Universal Containers would like to visually see the sales stages on an Opportunity page. The administrator is configuring path for Opportunities.

Which is an important consideration for path configuration?

- **A. Path can include guidance and key fields for each stage.**
- B. The Owner field can be edited in the key fields Panel.
- C. Kanban views for Path must be configured manually.
- D. Celebrations are unable to be added to a path.

**Answer: A**

Explanation:

Explanation

Path is a feature that can be used to visually see the sales stages on an opportunity page. Path can include guidance and key fields for each stage to help users move opportunities along the sales process. Guidance can provide tips, policy information, or best practices for each stage. Key fields can display important fields that users need to fill in or update for each stage. References:
