## 最有效的CIPT題庫最新資訊，真實還原IAPP CIPT考試內容

伴隨著 IAPP 認證，越來越多的客戶注意到 IAPP 的重要性，目前是經濟衰退的時期，找一份工作不容易，考取 IAPP 認證的證書當然是有用的，能夠幫助你穩定你的位置，增加求職的法碼。如果你正在準備 CIPT 考試題目和答案的電子圖書的形式或自我測試軟體，以獲得適當的知識和技能，急需通過 CIPT 考試，可以憑藉 Testpdf 考題網最新的題庫順利通過該考試。

## 最新的 Information Privacy Technologist CIPT 免費考試真題 (Q85-Q90):

### 問題 #85

#### SCENARIO

Kyle is a new security compliance manager who will be responsible for coordinating and executing controls to ensure compliance with the company's information security policy and industry standards. Kyle is also new to the company, where collaboration is a core value. On his first day of new-hire orientation, Kyle's schedule included participating in meetings and observing work in the IT and compliance departments.

Kyle spent the morning in the IT department, where the CIO welcomed him and explained that her department was responsible for IT governance. The CIO and Kyle engaged in a conversation about the importance of identifying meaningful IT governance metrics. Following their conversation, the CIO introduced Kyle to Ted and Barney. Ted is implementing a plan to encrypt data at the transportation level of the organization's wireless network. Kyle would need to get up to speed on the project and suggest ways to monitor effectiveness once the implementation was complete. Barney explained that his short-term goals are to establish rules governing where data can be placed and to minimize the use of offline data storage.

Kyle spent the afternoon with Jill, a compliance specialist, and learned that she was exploring an initiative for a compliance program to follow self-regulatory privacy principles. Thanks to a recent internship, Kyle had some experience in this area and knew where Jill could find some support. Jill also shared results of the company's privacy risk assessment, noting that the secondary use of personal information was considered a high risk.

By the end of the day, Kyle was very excited about his new job and his new company. In fact, he learned about an open position for someone with strong qualifications and experience with access privileges, project standards board approval processes, and application-level obligations, and couldn't wait to recommend his friend Ben who would be perfect for the job.

Which data practice is Barney most likely focused on improving?

- A. Sharing
- B. Retention.
- C. Inventory.
- **D. Deletion**

**答案： D**

解題說明：

Barney is leading a project to improve the organization's data practices and has implemented a new policy that requires all employees to delete any data that is no longer needed for business purposes. This suggests that Barney is most likely focused on improving the organization's data deletion practices.

**問題 #86**

Which is likely to reduce the types of access controls needed within an organization?

- A. Increased number of remote employees.
- **B. Standardization of technology.**
- C. Regular data inventories.
- D. Decentralization of data.

**答案： B**

**問題 #87**

Which of the following are the mandatory pieces of information to be included in the documentation of records of processing activities for an organization that processes personal data on behalf of another organization?

- **A. Time limits for erasure of different categories of data.**
- B. Descriptions of the processing activities and relevant data subjects.
- C. Contact details of the processor and Data Protection Officer (DPO).
- D. Copies of the consent forms from each data subject.

**答案： A**

**問題 #88**

Which of the following statements is true regarding software notifications and agreements?

- A. Website visitors must view the site's privacy statement before downloading software.
- B. "Just in time" software agreement notifications provide users with a final opportunity to modify the agreement.
- **C. It is a good practice to provide users with information about privacy prior to software installation.**
- D. Software agreements are designed to be brief, while notifications provide more details.

**答案： C**

### 問題 #89

What risk is mitigated when routing video traffic through a company's application servers, rather than sending the video traffic directly from one user to another?

- A. The user is protected against phishing attacks.
- B. The user is assured that stronger authentication methods have been used.
- C. The user's identity is protected from the other user.
- **D. The user's approximate physical location is hidden from the other user.**

答案： D

解題說明：

- \* Option A: Phishing attacks are typically related to email or messaging security rather than direct video traffic.
- \* Option B: While identity protection can be a factor, routing through company servers primarily obfuscates the user's IP address and other metadata, which reveals physical location rather than identity specifics.
- \* Option C: Routing video traffic through a company's servers hides the users' IP addresses from each other, which prevents them from determining each other's physical location.
- \* Option D: Stronger authentication methods are related to access control but not necessarily to the routing of video traffic.
