Latest SDS Exam Pass4sure & Vce SDS Download

BTW, DOWNLOAD part of Lead1Pass SDS dumps from Cloud Storage: https://drive.google.com/open?id=1Gh4cKQsftAGgbTXK-yW2phRt270JXrbC

In general Lead1Pass SDS exam simulator questions are practical, knowledge points are clear. According to candidates' replying, our exam questions contain most of real original test questions. You will not need to waste too much time on useless learning. SDS Exam Simulator questions can help you understand key knowledge points and prepare easily and accordingly. Candidates should grasp this good opportunity to run into success clearly.

Once you ensure your grasp on the SDS Questions and answers, evaluate your learning solving the SDS practice tests provided by our testing engine. This innovative facility provides you a number of practice questions and answers and highlights the weak points in your learning. You can improve the weak areas before taking the actual test and thus brighten your chances of passing the exam with an excellent score. Moreover, doing these practice tests will impart you knowledge of the actual exam format and develop your command over it.

Vce SDS Download, Learning SDS Mode

In order to evaluate the performance in the real exam like environment, the candidates can easily purchase our quality SDS preparation software. Our SDS exam software will test the skills of the customers in a virtual exam like situation and will also highlight the mistakes of the candidates. The free SDS exam updates feature is one of the most helpful features for the candidates to

get their preparation in the best manner with latest changes. The DASCA introduces changes in the SDS format and topics, which are reported to our valued customers. In this manner, a constant update feature is being offered to SDS exam customers.

DASCA Senior Data Scientist Sample Questions (Q45-Q50):

NEW QUESTION # 45
Which of the following is NOT used to implement Agile?

- A. Extreme Programming (XP)
- B. Scrum
- C. Six Sigma
- D. Kanban

Answer: C

Explanation:
Agile is a project management and product development methodology that emphasizes flexibility, iterative development, collaboration, and adaptability. Common frameworks that implement Agile principles include:
Scrum (Option A): A widely used Agile framework where work is divided into time-boxed sprints, roles are clearly defined (Scrum Master, Product Owner, Development Team), and progress is tracked via tools like burn down charts.
Kanban (Option B): A visual Agile method that manages workflow using a pull-based system with Kanban boards to visualize tasks and control work in progress (WIP).
Extreme Programming (XP, Option D): Another Agile method that focuses on high-quality software through technical practices like continuous integration, test-driven development (TDD), and pair programming.
By contrast:
Six Sigma (Option C): Six Sigma is a process improvement methodology that emphasizes reducing defects and improving quality through statistical analysis. It is not considered an Agile implementation framework.
Thus, the correct answer is Six Sigma (C).

NEW QUESTION # 46
Spark programs can be written in:

- A. Java
- B. Python
- C. All of the above
- D. Scala
- E. None of the above

Answer: C

Explanation:
Apache Spark supports multiple programming languages for developing distributed applications:
Java (Option A): Supported through Spark's JVM-based APIs.
Scala (Option B): Spark is natively written in Scala, and Scala APIs provide full functionality.
Python (Option C): Supported via PySpark, enabling Python developers to leverage Spark.
Additionally, Spark also supports R and SQL-like queries, making it versatile for data scientists and engineers.
Thus, the correct answer is Option D (All of the above).

DASCA Data Scientist Knowledge Framework (DSKF) - Programming Tools: Spark APIs for Java, Scala, Python, and R.

NEW QUESTION # 47
Which of the following is NOT a valid section of Big Data Strategy document?

- A. Key business entities
- B. Key business initiatives
- C. Key decisions
- D. Business decisions

- E. Business strategy

Answer: D

Explanation:
A Big Data Strategy document provides a framework for aligning data initiatives with organizational objectives. It typically includes:
Business strategy (Option A): Ensures that big data initiatives align with overall corporate strategy.
Key decisions (Option B): Identifies the decisions data will help optimize or automate.
Key business initiatives (Option D): Links big data projects with critical organizational initiatives.
Key business entities (Option E): Defines the core entities (customers, products, channels) around which data will be organized.
However:
Business decisions (Option C): This is redundant and not a standard section; "key decisions" covers this aspect already.
Thus, the correct answer is Option C (Business decisions).
Reference:
DASCA Data Scientist Knowledge Framework (DSKF) - Big Data Strategy and Business Alignment.

NEW QUESTION # 48
Which of the following is TRUE about Avro?

- A. Avro is based on Remote Procedure Call (RPC)
- B. Both A and B
- C. None of the above
- D. Avro is a data serialization framework

Answer: B

Explanation:
Apache Avro is a widely used framework within the Hadoop ecosystem for data serialization and data exchange.
Option A (Correct): Avro is a compact, fast, binary data serialization format. It allows efficient storage and exchange of structured data.
Option B (Correct): Avro supports Remote Procedure Call (RPC). It provides a framework for RPC communication, making it easier for distributed applications to exchange data across systems.
Option C: Correct, since both statements are true.
Option D: Incorrect because Avro is indeed both a serialization framework and RPC-based.
In data engineering workflows, Avro is valuable because it is schema-based (defined using JSON), highly interoperable, and ensures compatibility across different programming languages. This makes it essential in big data pipelines, Kafka messaging, and Hadoop ecosystem tools.
Thus, the correct answer is Option C (Both A and B).
Reference:
DASCA Data Scientist Knowledge Framework (DSKF) - Big Data Ecosystem Tools & Data Serialization Techniques.

NEW QUESTION # 49
HDFS supports which quotas?

- A. Space quotas
- B. Both A and B
- C. None of the above
- D. Name quotas

Answer: B

Explanation:
HDFS (Hadoop Distributed File System) provides quota management to control and monitor resource usage across directories:
Name Quotas (Option A): Limits the number of files and directories that can be created in a given HDFS directory. Helps prevent excessive metadata growth.
Space Quotas (Option B): Limits the total disk space consumed by files within a directory. Helps in capacity planning and avoiding storage overuse.
Since HDFS supports both types, the correct answer is Option C (Both A and B).
