## SAP Certified Associate - Positioning SAP Business Suite via SAP Financial Management Solutions Sample Questions (Q44-Q49):

### NEW QUESTION # 44

Which of the following SAP solutions are designed to support Implementation of Business Controls and monitoring Compliance?  
Note: There are 3 correct answers to this question.

- A. SAP S/4HANA Finance for Group Reporting
- B. SAP Process Control
- C. SAP Business Integrity Screening
- D. SAP Global Trade Management
- E. SAP Entitlement Management

**Answer: B,C,D**

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

SAP's Governance, Risk, and Compliance (GRC) portfolio provides a comprehensive suite of tools designed to safeguard the organization through automated controls. SAP Process Control is central to this effort, offering a framework for implementing and

continuously monitoring internal business controls. It moves organizations away from manual, sample-based audits toward automated, continuous monitoring of processes, ensuring that compliance is maintained in real-time. SAP Business Integrity Screening complements this by scanning large volumes of transactional data to detect anomalies that might indicate fraud or errors. By identifying these "red flags" early, CFOs can prevent financial loss and protect the organization's reputation. Furthermore, SAP Global Trade Management (within the context of SAP GTS) ensures that all international trade activities comply with complex global regulations, managing everything from sanctioned party screening to license management. Together, these three solutions provide the transparency and oversight necessary for modern risk management. While SAP S/4HANA Finance for Group Reporting is essential for consolidation, it is a closing tool rather than a monitoring control solution. SAP Entitlement Management focuses on rights management, which is distinct from the core financial business controls described here.

## Answer: C

### Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

SAP structures its Financial Management portfolio around five strategic pillars designed to cover the end-to-end responsibilities of the modern CFO. These pillars include:

\* Accounting & Financial Close: Focused on the "Record-to-Report" process, ensuring a fast, accurate, and compliant closing cycle using the Universal Journal.

\* Financial Planning & Analysis (FP&A): Enabling continuous planning, budgeting, and forecasting combined with real-time performance analysis.

\* Governance, Risk & Compliance (GRC): Protecting the business by embedding automated controls, identity governance, and international trade compliance into operations.

\* Quote-to-Cash: Managing the entire lifecycle of a sale, from initial offer to revenue recognition and cash collection, supporting modern subscription-based models.

\* Treasury & Working Capital: Optimizing liquidity, managing financial risks, and ensuring efficient bank connectivity and cash flow. These pillars represent the holistic "Office of the CFO" strategy. Options like Field Service Management (A), Inventory Management (C), or Integrated Business Planning (D) are important operational areas within the broader SAP ERP ecosystem, but they are not categorized as the five core pillars specifically defined for Financial Management Solutions when positioning the suite to finance leadership.
