Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q46-Q51):

NEW QUESTION # 46

You work for a small company and are creating new Workspace accounts for 100 temporary users. These temporary users do not currently have any user accounts in your LDAP directory. Also, you want to add a work address to each users' account. You want to do this task quickly and efficiently. What should you do?

- A. Sync the new accounts by using the Google Cloud Directory Sync (GCDS) server.
- **B. Ensure that the account information is properly added into the CSV file created from the downloaded template. Upload the file in the Admin console by using the Bulk update users process.**
- C. Write and deploy a server-side script by using the Admin SDK Directory API.
- D. Manually create each new user account in the Admin console. Then add the work address to each new user.

Answer: B

NEW QUESTION # 47

An employee has left your organization and their Drive data must be retained for three years. The retention rule has been set for three years. You must ensure the employee's data is visible in Vault and accessible to the Vault Administrator in the most cost-effective way. What should you do?

- A. Change ownership of the Drive data to the user's Manager, then delete the user.
- B. Export the user's Drive data from Vault, then delete the user.
- **C. Assign an Archive User (AU) license to the user.**
- D. Suspend the user until the end of the three-year period.

Answer: C

Explanation:

Step by Step Comprehensive Detailed Explanation

Navigate to Users: Go to the Google Admin console and navigate to the 'Users' section.

Select the User: Find and select the user who has left the organization.

Assign Archive User License: Assign an Archive User (AU) license to the user, ensuring their data is retained and accessible in Vault.

Verify Access in Vault: Go to Google Vault and verify that the data is visible and accessible to the Vault Administrator.

Cost-effective Data Retention: Using an AU license is cost-effective as it retains the data without needing an active Google Workspace license.

Google Vault Archive User

NEW QUESTION # 48

You are the administrator of a domain that requires iOS mobile device management. What initial steps should be taken to ensure that you can properly manage end-user iOS devices?

- A. Configure an Apple Push Certificate, and select "certificate never expires."
- B. In the Admin console, navigate to iOS management, and enable the Apple Push Certificate connector.
- C. Follow the prompts under "company owned devices," and select "iOS Management." Select the option to "enforce management on iOS devices."
- **D. Configure an Apple Push Certificate, and be sure to use a work address that can be accessed in the future.**

Answer: D

Explanation:

To ensure proper management of iOS devices, follow these steps:

* Sign in to the Google Admin console: Use an account with super administrator privileges.

* Navigate to Device Management: Go to Devices > Mobile and endpoints > Settings > iOS settings.

* Configure Apple Push Certificate:

* Click on "Apple Push Certificate."

* Follow the instructions to create and upload an Apple Push Certificate. Ensure that you use a work email address that will be accessible in the future for renewal purposes.

* Enable iOS Management:

* Once the Apple Push Certificate is configured, enable iOS device management.

* Optionally, enforce push management on iOS devices to ensure all devices are compliant.

NEW QUESTION # 49

A user accessing sensitive data is experiencing repeated issues with accessing certain files in Google Drive from their laptop by using the Chrome browser. When you contact Google support, the support representative asks to review an HTTP archive file recording (HAR). You need to share logs with Google support without compromising data privacy. What should you do?

- A. Open the HAR file in a text editor and delete sensitive information. Upload the HAR file to Google Drive and share the file only with the Google support representative
- B. Ask the Google support representative for access to a Google Drive folder used by the Google support team. Upload the HAR file.
- C. Upload the HAR file to Google Drive and share the file with the Google support representative.
- D. Share your screen with the Google support representative so they can view the file without having a copy of the file.

Answer: A

Explanation:

The HAR (HTTP Archive) file can contain sensitive information, such as URLs, request headers, cookies, or other data that could expose personal or confidential information. To ensure privacy and security, you should review the HAR file, remove any sensitive information manually using a text editor, and then upload the file to Google Drive for sharing with the Google support representative. This approach allows you to provide the necessary logs for troubleshooting without compromising data privacy.

NEW QUESTION # 50

Your organization has hired a recruiting firm that is responsible for reviewing resumes and job descriptions of prospective summer interns. Employees at your organization need to collaborate with the external firm on these documents. You must set permissions and ensure the recruiting firm employees can't remove the files. What should you do?

- A. Enable client-side encryption for the organizational unit (OU) for which the HR team are members.
- B. Create a Shared Drive and grant Content Manager access to the HR team.
- C. Create a Google Group, add the HR team, and create a shared folder for content storage and editing.
- D. Create a Shared Drive and grant Contributor access to the HR team

Answer: D
