## Easy To Use and Compatible Itbraindumps EMC D-PST-DY-23 Questions Formats

The D-PST-DY-23 certification exam is essential for future development, and the right to a successful D-PST-DY-23 exam will be in your own hands. As long as you pass the exam, you will take a step closer to your goal. However, unless you have updated D-PST-DY-23 exam materials, or passing the exam's mystery is quite challenging. Thousands of people tried the D-PST-DY-23 exams, but despite having good professional experience and being well-prepared, the regrettable exam failed. One of the main reasons for the failure may be that since practice and knowledge alone are not enough, people need to practice our Itbraindumps D-PST-DY-23 Exam Materials, otherwise they cannot escape reading. Well, you are in the right place. The D-PST-DY-23 questions on our Itbraindumps are one of the most trustworthy questions and provide valuable information for all candidates who need to pass the D-PST-DY-23 exam.

### EMC Dell PowerStore Deploy 2023 Exam Sample Questions (Q175-Q180):

#### NEW QUESTION # 175

##### SIMULATION

Use the simulator to create a new 100 GB volume. Use a category of Other. Associate the new volume with a protection policy that includes a rule that takes a snapshot every hour Monday-Friday and retains it for 5 days.

When you have finished continue to the next question.

##### Answer:

Explanation:

See explanation below

Explanation:

1. Create the Volume

Navigate to Storage > Volumes.

Click + CREATE.

Enter a name for the volume (e.g., "MyVolume").

Set the volume size to 100 GB.

In the "Category" dropdown, select Other.

Click Add.

2. Create the Protection Policy

Navigate to Protection > Protection Policies.

Click Add Protection Policy.

Enter a name for the policy (e.g., "HourlySnapshots").

Click Next.

3. Configure the Snapshot Rule

In the "Snapshot Rules" section, click Add Rule.

Enter a name for the rule (e.g., "HourlyRule").

Set the Days to Monday through Friday.

Set the Every field to 1 Hour.

Set Retain to 5 Days.

Click Add.

Click Next.

4. Review and Finish

Review the protection policy summary.

Click Finish.

5. Associate the Protection Policy with the Volume

Navigate back to Storage > Volumes.

Locate the 100 GB volume you created.

Click the More Actions button (three vertical dots) and select Edit.

In the "Protection Policy" field, select the newly created HourlySnapshots policy from the dropdown list.

Click Save.

Verification

To verify the configuration, go to Protection > Protection Policies.

Select the HourlySnapshots policy.

You should see the configured snapshot rule ("HourlyRule") with the specified settings.

#### Key Considerations

Snapshot Frequency: The snapshot rule you created will take hourly snapshots of the volume every weekday (Monday to Friday).

Retention Period: The snapshots will be retained for 5 days before being automatically deleted.

Storage Space: Snapshots consume storage space. Ensure you have enough free space to accommodate the snapshots taken based on the frequency and retention period.

By following these steps, you'll successfully create a 100 GB volume, configure a protection policy with the specified snapshot rule, and associate the policy with the volume, fulfilling the requirements of the simulation task.

#### NEW QUESTION # 176

What is the benefit of implementing multipathing in a PowerStore environment?

- A. Automating system updates
