- A. A user can have only one person id external
- B. Once generated, you CANNOT change a person id external.
- C. Once generated, you CANNOT change a user id.
- D. A user can have multiple user ids.
- E. A user can have only one user id.

Answer: A,C,D

Explanation:

In SAP SuccessFactors Employee Central, employee identifiers are managed as follows:

A . Once generated, you CANNOT change a user id.

The User ID serves as a unique identifier for an employee's employment record. Once assigned, it cannot be altered.

D . A user can have multiple user ids.

An employee may possess multiple User IDs, especially in scenarios involving concurrent employment or global assignments. Each employment instance is associated with a distinct User ID.

E . A user can have only one person id external.

The Person ID External uniquely identifies an individual across all employment records within the system. An employee is assigned a single Person ID External, regardless of the number of employments.

Options B and C are incorrect:

B . A user can have only one user id.

This is incorrect because, as mentioned, an employee can have multiple User IDs corresponding to different employment instances.

C . Once generated, you CANNOT change a person id external.

This is incorrect. While the Person ID External is intended to be a stable identifier, it can be changed if necessary, though such changes should be managed carefully to maintain data integrity.

Event Type: onInit

This event triggers the rule during the initialization phase of the Add New Employee wizard.

Base Object: Standard Hours

The rule applies to the Standard Hours field, pulling data from the Legal Entity record.

Other event types such as `onChange`, `onEdit`, or `onSave` are not appropriate for pre-populating fields during the Add New Employee process.
