SAP Certified Associate - Positioning SAP Business Suite via SAP Financial Management Solutions Sample Questions (Q34-Q39):

NEW QUESTION # 34

Scenario: A retail company wants to accelerate its financial closing process and improve reporting accuracy. The company is currently facing delays due to manual reconciliation, decentralized financial data, and lack of automation in closing tasks. Which SAP solutions should they implement to improve their financial closing process?

- A. SAP SuccessFactors
- B. SAP S/4HANA Finance
- C. SAP Business Workflow
- D. SAP Financial Closing Cockpit
- E. SAP Asset Management

Answer: B,C,D

NEW QUESTION # 35

Which of the following is a benefit of using SAP Analytics Cloud?

- A. Manual data integration
- B. Limited data visualization
- C. No support for financial reporting
- D. Real-time insights and predictive analytics

Answer: D

NEW QUESTION # 36

Which essential capabilities are needed to effectively support subscriptions and recurring revenue models in the Quote-to-Cash process?

Note: There are 2 correct answers to this question.

- A. Automated proposal generation for potential customers.
- B. Flexible creation of bundled offerings with varied pricing plans.
- C. Real-time inventory tracking and management.
- D. Automated payment collection and handling of receivables.

Answer: B,D

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

As companies transition from traditional one-time product sales to "As-a-Service" models, the Quote-to-Cash (Q2C) process must evolve to handle significantly higher complexity. Two essential capabilities for this transition are flexible creation of bundled offerings and automated payment collection.

The ability to create bundled offerings is critical because subscription models often involve a mix of physical goods, digital services, and professional maintenance, all with varied pricing plans (e.g., flat fees, usage-based, or tiered pricing). SAP S/4HANA enables the "Monetize" capability, allowing businesses to configure these complex bundles quickly to meet market demand.

Furthermore, because subscription models generate a high volume of frequent, lower-value transactions, automated payment collection and handling of receivables is vital. Manual processing of thousands of monthly subscription payments is impossible at scale. SAP's Q2C solutions automate the entire lifecycle - from recurring billing and credit card processing to the reconciliation of payments and the management of

"dunning" (collection) processes for failed payments. This automation ensures high cash flow predictability and reduces the administrative overhead associated with managing a large-scale recurring revenue stream.

While inventory tracking (A) and proposal generation (C) are relevant to general commerce, they are not the specific "Subscription-enabling" capabilities emphasized in the SAP Financial Management Q2C framework.

NEW QUESTION # 37

Which solution helps multi-ERP system clients centralize their accounting and reporting system?

- A. SAP Analytics Cloud
- B. SAP Integration Suite
- C. SAP Advanced Financial Closing
- D. SAP S/4HANA Cloud for central finance

Answer: D

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

Many large enterprises operate in a fragmented IT landscape where multiple ERP systems (both SAP and non- SAP) are used across different subsidiaries or regions. SAP S/4HANA Cloud for central finance is the specific deployment option designed to bridge these gaps without requiring a full-scale migration of all local systems at once. It allows organizations to replicate financial transactions from various source systems into a single, centralized SAP S/4HANA instance in real-time.

By using Central Finance, a company can create a centralized accounting and reporting system that serves as a "Single Source of Truth" for the entire group. This enables centralized processes such as "Central Payments," "Central Credit Management," and "Centralized Reporting." Instead of waiting for period-end extracts from dozens of different systems, the group finance team can see the total financial position of the company at any moment. This significantly simplifies the consolidation process and provides a clear path for digital transformation. It allows the CFO to harmonize data and processes at the corporate level while local entities continue to operate on their existing legacy systems, providing a low-risk, high-value approach to modernizing the finance function.

NEW QUESTION # 38

Which key area of Financial Management has a central focus on funding the business and supporting sustainable growth?

- A. Governance, Risk, & Compliance
- B. Financial Planning & Analysis
- C. Treasury & Working Capital
- D. Accounting & Financial Close

Answer: C

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

The Treasury & Working Capital pillar is uniquely positioned to focus on the liquidity and financial health required to fund business operations and long-term growth. While Accounting & Financial Close records what has happened and FP&A plans for what will happen, Treasury Management ensures the company has the actual capital available to execute those plans. This involves managing cash positions, optimizing bank relations, and mitigating financial risks such as currency fluctuations or interest rate volatility.

Sustainable growth is supported through efficient working capital management, which minimizes the amount of capital tied up in the "Cash Conversion Cycle." By optimizing accounts receivable and accounts payable through SAP's integrated tools, the CFO can free up internal cash flow to reinvest in the business without relying solely on external debt. Furthermore, modern SAP Treasury solutions include features for sustainable finance, helping organizations track and manage green bonds or ESG-linked loans. By providing real-time visibility into global cash across all entities, SAP Treasury & Working Capital enables the CFO to act as a strategic "Chief Value Officer," ensuring that the organization remains solvent, resilient, and ready to capitalize on new market opportunities.

NEW QUESTION # 39

.....

If your job is very busy and there is not much time to specialize, and you are very eager to get a C_BCFIN_2502 certificate to prove yourself, it is very important to choose a very high C_BCFIN_2502 learning materials like ours that passes the rate.
