## 156-215.82 Valid Torrent, Testking 156-215.82 Learning Materials

If you want to become a future professional person in this industry, getting qualified by CheckPoint certification is necessary. Now, pass your 156-215.82 actual exam in your first time by the help of TestPDF study material. Our 156-215.82 pdf torrent contains the best relevant questions and verified answers which exactly matches with the 156-215.82 Actual Exam and surely helps you to pass the exam. Besides, one year free update of 156-215.82 practice torrent is available after purchase.

## CheckPoint Check Point Certified Security Administrator - R82 Sample Questions (Q104-Q109):

### NEW QUESTION # 104

Which deployment adds a Security Gateway to an existing environment without changing IP routing?

- A. Distributed
- **B. Bridge Mode**
- C. Remote
- D. Standalone

**Answer: B**

Explanation:

The answer is B because bridge mode deployment adds a Security Gateway to an existing environment without changing IP routing. Bridge mode is a transparent mode that does not require assigning IP addresses to the Security Gateway interfaces. Distributed deployment is a deployment where the Security Management Server and the Security Gateway are installed on separate machines. Remote deployment is a deployment where the Security Gateway is installed on a remote site and connects to the Security Management Server over a VPN tunnel. Standalone deployment is a deployment where the Security Management Server and the Security Gateway are installed on the same machine.[Check Point R81 Bridge Mode], [Check Point R81 Deployment Scenarios]

### NEW QUESTION # 105

What licensing feature is used to verify licenses and activate new licenses added to the License and Contracts repository?

- **A. Automatic licensing and Verification tool**
- B. Automatic licensing
- C. Verification tool
- D. Verification licensing

**Answer: A**

Explanation:

The licensing feature that is used to verify licenses and activate new licenses added to the License and Contracts repository is Automatic licensing and Verification tool, p. 8. Automatic licensing is a feature that allows the Security Management Server to automatically attach licenses to Security Gateways. Verification tool is a feature that allows the Security Management Server to verify the validity of licenses and contracts. Check Point CCSA - R81: Practice Test & Explanation, Check Point Licensing and Contract Administration Guide R81

### NEW QUESTION # 106

Fill in the blank: It is Best Practice to have a \_\_\_\_\_ rule at the end of each policy layer.

- A. Explicit Drop
- **B. Explicit Cleanup**
- C. Implicit Drop
- D. Implied Drop

**Answer: B**

Explanation:

It is Best Practice to have an Explicit CleanUp rule at the end of each policy layer. This rule will log and drop any traffic that does not match any of the preceding rules in the layer. Check Point CCSA - R81: Practice Test & Explanation

### NEW QUESTION # 107

What is the purpose of the Clean-up Rule?

- A. To eliminate duplicate log entries in the Security Gateway
- B. To remove all rules that could have a conflict with other rules in the database

- C. To log all traffic that is not explicitly allowed or denied in the Rule Base
- D. To clean up policies found inconsistent with the compliance blade reports

**Answer: C**

Explanation:

The purpose of the Clean-up Rule is to log all traffic that is not explicitly allowed or denied in the Rule Base<sup>78</sup>. The Clean-up Rule is the last rule in the rulebase and is used to drop and log explicitly unmatched traffic<sup>97</sup>. To improve the rulebase performance, noise traffic that is logged in the Clean-up rule should be included in the Noise rule so it is matched and dropped higher up in the rulebase<sup>8</sup>. The other options are not valid purposes of the Clean-up Rule.

#### NEW QUESTION # 108

Gaia includes Check Point Upgrade Service Engine (CPUSE), which can directly receive updates for what components?

- A. The Gaia operating system only.
- B. The Security Gateway (SG) and Security Management Server (SMS) software and the CPUSE engine.
- C. Licensed Check Point products for the Gaia operating system and the Gaia operating system itself.
- D. The CPUSE engine and the Gaia operating system.

**Answer: C**

Explanation:

Gaia includes Check Point Upgrade Service Engine (CPUSE), which can directly receive updates for licensed Check Point products for the Gaia operating system and the Gaia operating system itself. CPUSE is an advanced tool that automates software updates and upgrades on Gaia platforms. It can download and install packages such as hotfixes, Jumbo Hotfix Accumulators, minor versions, major versions, and OS updates.[CPUSE - Gaia Software Updates (including Gaia Software Updates Agent)], [Check Point R81]

#### NEW QUESTION # 109

.....
