CASPO-001 Test Valid & Pdf CASPO-001 Free

Our PDF version of CASPO-001 training materials is legible to read and remember, and support printing request. Software version of CASPO-001 practice materials supports simulation test system, and give times of setup has no restriction. Remember this version support Windows system users only. App online version of CASPO-001 Exam Questions is suitable to all kinds of equipment or digital devices and supportive to offline exercise on the condition that you practice it without mobile data.

GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q45-Q50):

NEW QUESTION # 45

Which of the following are roles on a Scrum Team? (Choose the best three answers)

- A. Users
- B. Developers
- C. Product Owner
- D. Scrum Master
- E. Customers

Answer: B,C,D

Explanation:

The Scrum Guide defines the Scrum Team as consisting of three roles: "The Scrum Team consists of one Scrum Master, one Product Owner, and Developers." Option A (Developers) is the group responsible for building the Increment. Option D (Product Owner) manages the Product Backlog and value delivery. Option E (Scrum Master) facilitates Scrum adoption and team effectiveness. Options B (Users) and C (Customers) are external stakeholders, not Scrum Team roles—they interact with the product but aren't part of the team.

Thus, A, D, and E are the correct roles.

NEW QUESTION # 46

What is a Product Backlog? (Choose the best answer)

- A. It is a detailed list of functionalities from which the Developers draw items, to be complemented by a separate Technology Backlog managed by the Developers.
- **B. It is a living artifact of product requirements that exists and evolves as long as a product exists.**
- C. It is a formally approved list of requirements to be implemented over a set period.
- D. It is a list of references to Use Case documents that are stored in a central repository. The references should be viewable and clickable by anybody to enhance transparency.

Answer: B

Explanation:

The Product Backlog is dynamic and evolves with the product. The Scrum Guide defines it as: "The Product Backlog is an emergent, ordered list of what is needed to improve the product." Option A captures its living, evolving nature.

* B: "Formally approved" and "set period" suggest rigidity, unlike Scrum's adaptability.

* C: A separate "Technology Backlog" isn't in Scrum; all work is in one backlog.

NEW QUESTION # 47

When many Scrum Teams are working on the same product, should all of their Increments be integrated every Sprint? (Choose the best answer)

- **A. Yes, otherwise the Product Owners and stakeholders may not be able to accurately inspect what is done.**
- B. Yes, but only for Scrum Teams whose work has dependencies.
- C. No, each Scrum Team stands alone.
- D. No, that is far too hard and must be done in a hardening Sprint.

Answer: A

Explanation:

The Scrum Guide mandates that when multiple Scrum Teams work on one product, they produce a single integrated Increment:

"Multiple Scrum Teams often work together on the same product... The Increment must be integrated and usable so that it can provide value." This ensures transparency and stakeholder feedback at the Sprint Review. Option A (hardening Sprint) is a misconception—Scrum rejects separate phases for integration. Option B contradicts the single-product focus. Option C limits integration to dependencies, but the Scrum Guide requires full integration regardless. Option D correctly emphasizes the need for a cohesive, inspectable Increment, making it the best answer.

Option A (hardening Sprint) is a misconception—Scrum rejects separate phases for integration. Option B contradicts the single-product focus. Option C limits integration to dependencies, but the Scrum Guide requires full integration regardless. Option D correctly emphasizes the need for a cohesive, inspectable Increment, making it the best answer.

NEW QUESTION # 48

If the Product Owner is not collaborating with the Developers during the Sprint, what should the Scrum Master do? (Choose the best answer)

- **A. Coach the Product Owner on the values and benefits of Scrum and incremental delivery**
- B. Escalate to senior management
- C. Cancel Scrum until a better Product Owner is identified

Answer: A

Explanation:

The Scrum Master serves the Product Owner by fostering Scrum adoption: "The Scrum Master serves the Product Owner in several ways, including... Helping find techniques for effective Product Goal definition and Product Backlog management." If

collaboration is lacking, coaching (C) aligns with this role, emphasizing Scrum's collaborative nature and incremental value delivery.

* A: Escalation bypasses the Scrum Master's responsibility to resolve issues.

NEW QUESTION # 49

What is the Product Owner accountable for in Scrum? (Choose the best answer)

- A. Refining the top-level Product Backlog items until they are ready to be handed over to the Developers
- B. Writing the User Stories so they are understandable to stakeholders
- **C. Creating and sustaining a Product Backlog that maximizes value and represents the needs of the stakeholders**
- D. Describing an Increment at the Sprint Planning and making sure that the Developers deliver it by the end of the Sprint

Answer: C

Explanation:

The Product Owner's core accountability is maximizing value through the Product Backlog. The Scrum Guide states: "The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team." Option B encapsulates this fully.

* A: The Developers deliver the Increment; the Product Owner doesn't ensure it.

* C: Refinement is part of management, but not the sole accountability.

NEW QUESTION # 50

.....

Through the feedback of many examinees who have used VCE4Dumps's training program to pass some IT certification exams, it proves that using VCE4Dumps's products to pass IT certification exams is very easy. Recently, VCE4Dumps has developed the newest training solutions about the popular GAQM Certification CASPO-001 Exam, including some pertinent simulation tests that will help you consolidate related knowledge and let you be well ready for GAQM certification CASPO-001 exam.
