Latest SAP C-S4CPB-2508 Mock Exam | C-S4CPB-2508 Test Collection

Are you bothered by looking for good exam materials of SAP C-S4CPB-2508 test? Don't worry. Dupleader can provide you with everything you need. Should your requirement, Dupleader find an efficient method to help all candidates to pass C-S4CPB-2508 exam. Most candidates are preparing for IT certification exam while they working, which is a painstaking, laborious process. In order to avoid wasting too much time in preparing for the exam, Dupleader provides you with SAP C-S4CPB-2508 Dumps that can help you pass the test in the short period of time. The dumps contain all problems in the actual test. So, as long as you make use of our dumps, C-S4CPB-2508 certificate exam will not a problem.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q12-Q17):

NEW QUESTION # 12

Which of the following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf?

Note: There are 2 correct answers to this question.

- A. The test process failed the execution pre-check.
- B. The process steps have been reordered.
- C. Data marked for deletion is picked for execution.
- D. An execution variant has not been maintained.

Answer: A,D

Explanation:

The following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf:

* An execution variant has not been maintained: An execution variant is a set of test data that is used to execute a test process. It contains the input values and expected results for each test step. If an execution variant is not maintained for a test process, the system cannot run the test automatically and will skip it¹.

* The test process failed the execution pre-check: The execution pre-check is a validation that is performed before the test execution to ensure that the test process and the execution variant are consistent and complete. If the execution pre-check fails, it means that there are some issues or gaps in the test process or the execution variant that need to be resolved before the test can be run².

The following would not prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf:

* Data marked for deletion is picked for execution: Data marked for deletion is data that is no longer relevant or valid for the test process. It can be marked for deletion by the customer or by SAP. However, this does not affect the test execution, as the system will ignore the data marked for deletion and use the available data for the test process³.

* The process steps have been reordered: The process steps are the individual actions that are performed as part of the test process. They can be reordered by the customer or by SAP to reflect the changes in the business process or the user interface. However, this does not affect the test execution, as the system will follow the order of the process steps as defined in the test process⁴.

NEW QUESTION # 13

Where do you enable a customer-specific field to be available for UIs and reports relevant for the same business context?

- A. In the Extensibility Cockpit app
- B. In the Runtime Authoring mode
- C. In the Custom Fields app
- D. In the Maintain SAP Business Technology Platform Extensions app

Answer: C

Explanation:

You enable a customer-specific field to be available for UIs and reports relevant for the same business context in the Custom Fields app. The Custom Fields app allows you to create and manage custom fields for business objects in SAP S/4HANA Cloud, public edition. You can define the properties of the custom fields, such as the label, data type, length, and default value. You can also specify the UIs and reports where you want the custom fields to appear, and the business context that determines the visibility and authorization of the custom fields. The Custom Fields app also enables you to activate the custom fields and generate the corresponding CDS views and OData services for consumption by other applications. NEW QUESTION # 14

Where are the manual test cases created for customer User Acceptance Testing?

- A. SAP Solution Manager
- B. SAP Cloud ALM
- C. SAP Signavio Process Navigator
- D. Test Automation Tool

Answer: B

NEW QUESTION # 15

How can you migrate data to SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. With Core Data Services
- B. With XML or CSV templates
- C. With the zero downtime service
- D. With a separate SAP HANA database

Answer: B,D

NEW QUESTION # 16

Which of the following activities are completed in the Realize phase of the SAP Activate Methodology? Note: There are 2 correct answers to this question.

- A. Demonstrate where to find business process documentation
- **B. Set up manual test cases in SAP Cloud ALM**
- **C. Enter configuration values in SAP Central Business Configuration**
- D. Gather perceived change impact feedback

Answer: B,C

Explanation:

In the Realize phase of the SAP Activate Methodology, the project team uses a series of iterations to build and test a complete business and system environment based on the inputs from the previous steps. The activities in this phase include:

- * Receiving the systems from SAP
 - * Performing configuration in the Q-System using SAP Central Business Configuration
 - * Setting up manual test cases in SAP Cloud ALM
 - * Performing data loads and data migration
 - * Delivering key-user training
 - * Preparing for cutover and go-live
- Therefore, the correct answers are C and D, as they are part of the Realize phase activities.
