Different age groups prefer different kinds of learning methods. In order to meet the requirements of all people, we have diversified our CDCP exam questions to suit a wider range of lifestyles and tastes. At present, we have PDF version, online engine and software version. You can choose which CDCP test guide version suits you best. Generally, young people are inclined to purchase online engine or software version because they like experiencing new things. Middle aged people are more likely to choose PDF version because they get used to learning the printed Certified Data Centre Professional (CDCP) test questions. Of course, the combination use of different version of the CDCP Test Guide is also a good choice. You can purchase according to your own tastes.

In order to serve you better, we have a complete system for you if you choose us. We have free demo for CDCP training materials for you to have a try. If you have decided to buy CDCP exam dumps of us, just add them to your cart, and pay for it, our system will send the downloading link and password to you within ten minutes, and if you don't receive, just contact us, we will solve this problem for you as quickly as possible. For CDCP Training Materials, we also have after-service, if you have questions about the exam dumps, you can contact us by email.

2026 CDCP: Trustable Certified Data Centre Professional (CDCP) Latest Exam Price

Candidates may have different ways to practice the CDCP study materials, some may like to practice in paper, and some may like to practice it in the computer. We have three versions for you to meet your different needs. If you like to practice in the paper, CDCP PDF version will be your choice, which can be printed into the hard one. If you like to practice on your computer, CDCP Soft test engine will be your best, choice, besides it also stimulates the exam environment, you can experience the exam environment through this.

EXIN CDCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Physical Security and Safety: Sub-topics are about physical security considerations and physical safety considerations.
Topic 2	<ul style="list-style-type: none">Light: This topic covers light fixture types and placement, emergency lighting, and emergency Power Supply (EPS).
Topic 3	<ul style="list-style-type: none">Raised FloorSuspended Ceiling: The topic discusses applicable standards, signal reference grid, and disability act and regulations.
Topic 4	<ul style="list-style-type: none">Auxiliary Systems: The topic covers water leak detection systems, data centre monitoring requirements, EMS, BMS and DCIM.
Topic 5	<ul style="list-style-type: none">Cooling Infrastructure: The topic focuses on liquid immersion cooling, supplemental cooling options, sensible and latent heat definitions, and temperature and humidity recommendations.
Topic 6	<ul style="list-style-type: none">Equipment Racks: It discusses power railstrip options, security considerations, and rack standards, properties and selection criteria.

EXIN Certified Data Centre Professional (CDCP) Sample Questions (Q67-Q72):

NEW QUESTION # 67

Which Class of Fires involves energized electrical equipment?

- A. Class B
- B. Class A
- C. Class K
- **D. Class C**

Answer: D

Explanation:

Class C fires involve energized electrical equipment, such as computers, servers, switches, cables, and wiring.

These fires require the use of non-conductive extinguishing agents, such as carbon dioxide, dry chemical, or clean agent, to prevent electrical shock and damage to the equipment. Water-based extinguishers, such as Class A or K, are not suitable for Class C fires, as water can conduct electricity and cause electrocution or short circuits.

NEW QUESTION # 68

Which one of the following is a Natural Disaster?

- A. Human Error
- **B. Hurricanes**
- C. Blackouts
- D. Grid Failure

Answer: B

Explanation:

According to the CDCP® Preparation Guide, a natural disaster is a catastrophic event that is caused by natural forces and has a significant impact on human lives, property, and environment. Hurricanes are examples of natural disasters, as they are powerful storms that form over warm ocean waters and produce strong winds, heavy rain, storm surges, and flooding. Grid failure, blackouts, and human error are not natural disasters, but rather man-made or technological disasters that result from failures or errors in human

systems or activities.

NEW QUESTION # 69

A fire extinguisher in the data centre is found which is classed as ABC.
Is this suitable?

- A. No
- B. Yes
- C. Only for fires not related to electrical power
- D. Depends on the brand

Answer: A

Explanation:

A fire extinguisher in the data centre that is classed as ABC is not suitable, because it contains dry chemical powder that can damage the ICT equipment and the data. ABC fire extinguishers are designed to fight Class A, B, and C fires, which are fueled by combustible materials, flammable liquids or gases, and electrical equipment, respectively. However, the dry chemical powder can leave a corrosive residue on the ICT equipment, which can cause short circuits, data loss, or malfunction. Moreover, the dry chemical powder can be difficult to clean, especially from the small spaces and crevices of the ICT equipment. Therefore, ABC fire extinguishers are not recommended for data centres, and should be replaced with more suitable fire extinguishers, such as clean agent fire extinguishers, which use gas or liquid that does not leave any residue or harm the ICT equipment.

NEW QUESTION # 70

Where should exit/emergency signs be located?

- A. Depends on the policy of the data centre
- B. In the Computer room only
- C. At every escape door and pathways leading to doors (arrows)
- D. At each door

Answer: C

Explanation:

According to the EPI Data Centre Operations Standard (DCOS), exit/emergency signs should be located at every escape door and pathways leading to doors (arrows) to ensure a safe and quick evacuation in case of an emergency¹. This is also consistent with the best practices for data centre emergency preparedness and response, which recommend having a clear and visible signage system for emergency exits²³.

NEW QUESTION # 71

What is the current recommended temperature for ICT equipment as described in the ASHREA TC 9.9 guideline?

- A. 8-18 C (46.4 -64.4 °F)
- B. 18-27 C (64.4 - 80.6°F)
- C. 20-40 °C (68 - 104 °F)
- D. 25-45 °C (77 - 113 °F)

Answer: B

Explanation:
