

# C\_ADBTP\_2601 Latest Braindumps Free | Reliable C\_ADBTP\_2601 Test Simulator

Our SAP experts also guarantee that anyone who studies well enough from the prep material will pass the SAP Exams on the first try. We have kept the price of our Adminstrating SAP Business Technology Platform(C\_ADBTP\_2601) (C\_ADBTP\_2601) exam prep material very reasonable compared to other platforms so as not to stretch your tight budget further. And we also offer up to 1 year of free updates. A demo version of the preparation material is available on the website so that you can verify the validity of the product before obtaining them.

Getting a SAP C\_ADBTP\_2601 trusted certification is a way to prove your expertise and show you that you are ready all the time to take the additional responsibilities. The Adminstrating SAP Business Technology Platform(C\_ADBTP\_2601) C\_ADBTP\_2601 certification exam assists you to climb the corporate ladder easily and helps you to achieve your professional career objectives. With the Adminstrating SAP Business Technology Platform(C\_ADBTP\_2601) C\_ADBTP\_2601 certification exam you can get industry prestige and a significant competitive advantage. To attain all these you just need to enroll in the SAP C\_ADBTP\_2601 Certification Exam and put in all your efforts and prepare well to crack the Adminstrating SAP Business Technology Platform(C\_ADBTP\_2601) C\_ADBTP\_2601 exam easily. For the perfect and instant Adminstrating SAP Business Technology Platform(C\_ADBTP\_2601) C\_ADBTP\_2601 exam preparation, you can get help from SAP C\_ADBTP\_2601 Exam Questions. The RealValidExam C\_ADBTP\_2601 exam questions are real and will entirely assist you in C\_ADBTP\_2601 exam preparation and you can easily pass the final Adminstrating SAP Business Technology Platform(C\_ADBTP\_2601) C\_ADBTP\_2601 certification exam.

## Reliable C\_ADBTP\_2601 Test Simulator & Certification C\_ADBTP\_2601 Questions

Nowadays the test C\_ADBTP\_2601 certificate is more and more important because if you pass it you will improve your abilities and your stocks of knowledge in some certain area and find a good job with high pay. If you buy our C\_ADBTP\_2601 exam materials you can pass the exam easily and successfully. Our C\_ADBTP\_2601 Exam Materials boost high passing rate and if you are unfortunate to fail in exam we can refund you in full at one time immediately. The learning costs you little time and energy and you can commit yourself mainly to your jobs or other important things.

## SAP Adminstrating SAP Business Technology Platform(C\_ADBTP\_2601) Sample Questions (Q10-Q15):

### NEW QUESTION # 10

#### SIMULATION

Establish Shared Services

Task 1: Create a Shared Services Directory and Subaccounts

In your SAP BTP cockpit, create the directory Shared Services (Description: Shared Accounts) with your global account as the parent.

In the Shared Services directory, create the subaccount SH Dev (Description: Shared Services Development) with subdomain btopps#####-sh-dev in the region Amazon Web Services (AWS) → Europe (Frankfurt) cf-eu10.

In the Shared Services directory, create the subaccount SH Ops (Description: Shared Services Operations) with subdomain btpops#####-sh-ops in the region Amazon Web Services (AWS) → Europe (Frankfurt) cf-eu10.

**Answer:**

Explanation:

See the Explanation below for complete solution.

Explanation:

Before You Start

Log in to the SAP BTP Cockpit.

Open the correct Global Account.

Make sure you are working in the correct global account before creating anything.

Why this matters:

The new directory and both subaccounts must be created inside the correct global account hierarchy.

Part A - Create the Shared Services Directory

Step 1 - Open Directories

What to do

In the SAP BTP Cockpit, open your Global Account.

In the left navigation menu, click Directories.

Explanation:

This is where you create and manage directory structures under the global account.

What to verify

You should now see the list of existing directories.

Step 2 - Create the Directory Shared Services

What to do

Click Create or Create Directory.

Enter the following values:

Name: Shared Services

Description: Shared Accounts

Parent: your Global Account

Click Create.

**Create Directory**

A screenshot of the 'Create Directory' form in the SAP BTP Cockpit. The form has two main sections: 'Display Name' and 'Description'. The 'Display Name' field contains 'Shared Services'. The 'Description' field contains 'Shared Accounts'. Below these fields is a 'Parent' dropdown menu set to 'BTP Admin Certification'. At the bottom of the form, there are 'Create' and 'Cancel' buttons. A notification banner at the bottom of the form states: 'Cockpit supports multi-level directories in your account structure. You can add your new directory directly to the root global account or to an existing directory by choosing the location under Parent.'

Explanation:

This creates a new top-level directory directly under the global account.

It will be used to hold the shared-services subaccounts.

What to verify

You should now see:

Shared Services

under the global account.

Part B - Create the SH Dev Subaccount

Step 3 - Open the Shared Services Directory

What to do

In the directory list, select Shared Services.

Explanation:

Both required subaccounts must be created inside this directory.

What to verify

You should now be inside the Shared Services directory.

Step 4 - Open Subaccounts

What to do

Inside Shared Services, open Subaccounts.

Click Create → Subaccount.

Explanation:

This opens the subaccount creation screen.

Step 5 - Create SH Dev

What to do

Enter the following:

Display Name / Name: SH Dev

Description: Shared Services Development

Subdomain: btpops#####-sh-dev

Set the region as:

Cloud Provider: Amazon Web Services (AWS)

Region: Europe (Frankfurt)

Technical Region / Environment: cf-eu10

Then click Create.

Explanation:

This creates the shared services development subaccount in the required AWS Frankfurt region.

What to verify

After creation, you should see:

SH Dev

inside the Shared Services directory.

### Create Subaccount

Display Name \*  
SH Dev

Description  
Shared Services Development

Region \*  
Europe (Frankfurt) - AWS

Subdomain \*  
btpops#####-sh-dev

Parent \*  
Shared Services

> Advanced

Cockpit supports multi-level directories in your account structure.  
You can add your new subaccount directly to the root global account or to an existing directory by choosing the location under **Parent**.

Create Cancel

Part C - Create the SH Ops Subaccount

Step 6 - Start a New Subaccount

What to do

Still inside Shared Services, click Create → Subaccount again.

Explanation:

This opens the form for the second required subaccount.

Step 7 - Create SH Ops

What to do

Enter the following:

Display Name / Name: SH Ops

Description: Shared Services Operations

Subdomain: btpops#####-sh-ops

Set the region as:

Cloud Provider: Amazon Web Services (AWS)

Region: Europe (Frankfurt)

Technical Region / Environment: cf-eu10

Then click Create.

**Create Subaccount**

Display Name\* SH Ops

Description Shared Services Operations

Region\* Europe (Frankfurt) - AWS

Subdomain\* btpops #####-sh-ops

Parent\* Shared Services

**SAP** Advanced

Cockpit supports multi-level directories in your account structure.  
You can add your new subaccount directly to the root global account or to an existing directory by choosing the location under **Parent**.

Create Cancel

Explanation:

This creates the shared services operations subaccount in the same required region.

What to verify

After creation, you should see:

SH Ops

inside the Shared Services directory.

Final Expected Result for Task 1

You should now have:

Directory

Shared Services

Description: Shared Accounts

Parent: Global Account

Subaccounts inside Shared Services

SH Dev

Description: Shared Services Development

Subdomain: btpops#####-sh-dev

Region: AWS → Europe (Frankfurt) cf-eu10

SH Ops

Description: Shared Services Operations

Subdomain: btpops#####-sh-ops

Region: AWS → Europe (Frankfurt) cf-eu10

Name	Environment	Provider	Region	Labels	Changed On
BTP Admin Certification	Directory				March 25, 2026, 5:11:2...
Americas	Directory (Managed)				March 26, 2026, 3:27:5...
Partner	Subaccount	Multi-Environment	Microsoft Azure		March 26, 2026, 3:50:1...
AM PA Dev Test	Subaccount	Multi-Environment	Microsoft Azure	US West (WA)	March 26, 2026, 3:35:3...
AM PA Prod	Subaccount	Multi-Environment	Microsoft Azure	US West (WA)	March 26, 2026, 3:39:3...
Europe	Directory				March 26, 2026, 3:28:2...
Human Resources	Directory				March 26, 2026, 3:43:0...
EU HCM Dev	Subaccount	Multi-Environment	Amazon Web Services (AWS)	Europe (Frankfurt) - AWS	March 26, 2026, 3:43:4...
EU HCM Prod	Subaccount	Multi-Environment	Amazon Web Services (AWS)	Europe (Frankfurt) - AWS	March 26, 2026, 3:48:3...
EU HCM Test	Subaccount	Multi-Environment	Amazon Web Services (AWS)	Europe (Frankfurt) - AWS	March 26, 2026, 3:46:5...
Shared Services	Directory				March 26, 2026, 4:14:2...
SH Dev	Subaccount	Multi-Environment	Amazon Web Services (AWS)	Europe (Frankfurt) - AWS	March 26, 2026, 4:15:5...
SH Ops	Subaccount	Multi-Environment	Amazon Web Services (AWS)	Europe (Frankfurt) - AWS	March 26, 2026, 4:17:0...

### Common Mistakes to Avoid

1. Creating the directory in the wrong place

Shared Services must be created with:

parent = Global Account

2. Creating the subaccounts outside the directory

Both subaccounts must be created inside:

Shared Services

3. Wrong subdomain values

Use exactly:

bt pops#####-sh-dev

bt pops#####-sh-ops

Only replace ##### with your global account number.

4. Wrong region

Both subaccounts must use:

Amazon Web Services (AWS)

Europe (Frankfurt)

cf-eu10

5. Mixing up SH Dev and SH Ops

Be careful:

SH Dev = Shared Services Development

SH Ops = Shared Services Operations

### NEW QUESTION # 11

#### SIMULATION

Create a Service Instance in Cloud Foundry

Enable a service instance of the HTML5 Application Repository Service for Cloud Foundry.

Create a Service Instance in a Cloud Foundry Environment

In your SAP BTP cockpit, in the EU HCM Dev subaccount, create the service instance html5-eu-hcm-dev for the HTML5 Application Repository Service with the service plan app-host in the Cloud Foundry space activity-recording

#### Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open Human Resources.

Open the EU HCM Dev subaccount.

This matters because the task must be completed in EU HCM Dev, and the service instance must be created in the specific Cloud Foundry space activity-recording. SAP Help also confirms that the HTML5 Application Repository is used in the Cloud Foundry environment and that the app-host plan is the host service used to store HTML5 application content.

Step 1 - Open the Cloud Foundry space

In EU HCM Dev, go to:

Cloud Foundry

Spaces

Select the space:

activity-recording

SAP Help describes creating Cloud Foundry service instances by first navigating to the subaccount, opening Cloud Foundry Spaces, selecting the target space, and then using that space's Services > Service Instances area.

Step 2 - Open Service Instances in the space

Inside the activity-recording space, go to:

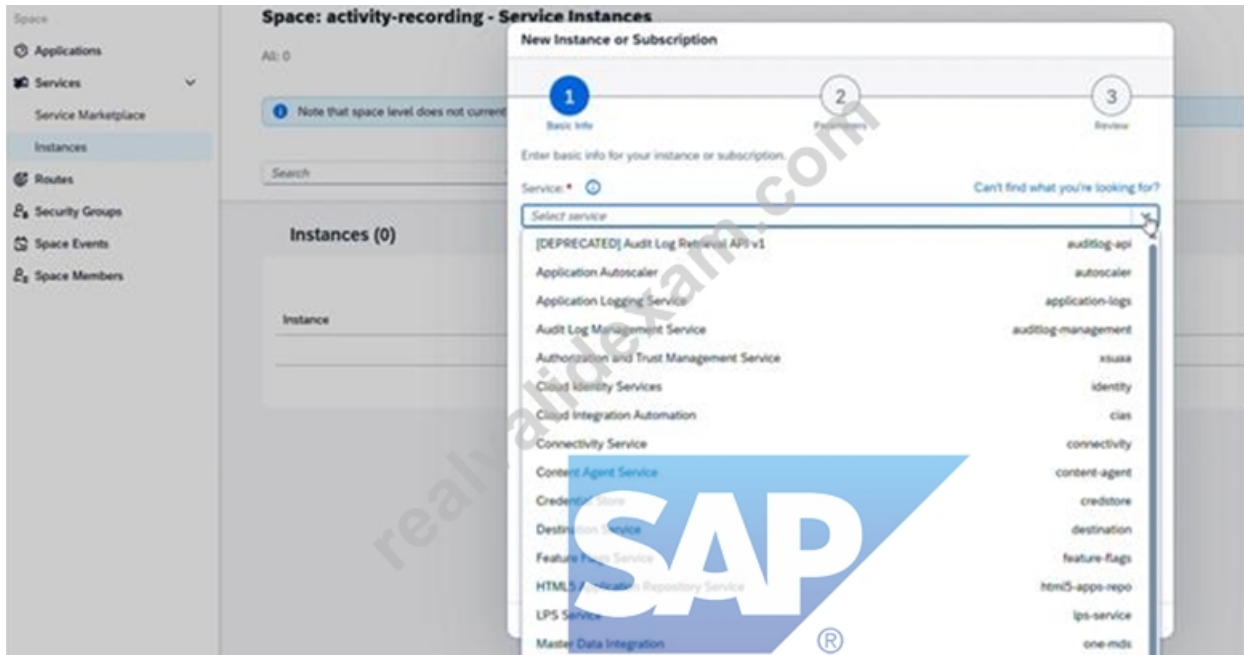

Services

Service Instances

This is the Cloud Foundry-space-level location used for creating service instances in that space.

Step 3 - Start creating the new instance

Click Create.

A wizard opens for the new service instance. SAP Help describes this as the standard cockpit flow for creating service instances in Cloud Foundry spaces.

Step 4 - Choose the required service

In the service selection, choose:

HTML5 Application Repository Service

SAP Help documents the HTML5 Application Repository as the service used for centrally storing HTML5 applications' static content on SAP BTP in the Cloud Foundry environment.

## New Instance or Subscription

1 Basic Info      2 Parameters      3 Review

Enter basic info for your instance or subscription.

Service: \* ⓘ Can't find what you're looking for?

HTML5 Application Repository Service

Plan: \*

app-host

Instance Name: \* ⓘ

html5-eu-hcm-dev

Next > **Create** Cancel

Step 5 - Choose the required service plan

Select the service plan:

app-host

SAP Help states that the app-host service plan is used to deploy applications to the HTML5 Application Repository.

Step 6 - Enter the instance name

Set the service instance name to:

html5-eu-hcm-dev

Then continue and confirm creation.

SAP Help recommends using a CLI-friendly name for service instances, and the task gives the exact required name.

**Space: activity-recording - Service Instances**

Create | v | ☆

All: 1

Note that space level does not currently support label management, instance status, or the display of "created by" and "modified by" information.

Search    Service: All    Plan: All    Status: All

### Instances (1)

Instance	Service	Plan	Credentials	Status	
html5-eu-hcm-dev	HTML5 Application Repository Service	app-host		Created	⋮ >

Step 7 - Verify the space is correct

Before final confirmation, verify the target Cloud Foundry space is:

activity-recording

This is important because Cloud Foundry service instances are created within a specific space, not only at the subaccount level.

Step 8 - Create and confirm

Click Create or Finish.

Wait for the status to change from in-progress to created.

SAP Help notes that after creation, the instance appears in the service instances table and its status can be checked there.

Final expected result

Inside EU HCM Dev, in Cloud Foundry space activity-recording, you should have a service instance with:

Service: HTML5 Application Repository Service

Plan: app-host

Instance Name: html5-eu-hcm-dev

Common mistakes to avoid

Creating the instance in the wrong subaccount; it must be EU HCM Dev.

Creating it in the wrong Cloud Foundry space; it must be activity-recording.

Choosing the wrong service; use HTML5 Application Repository Service.

Choosing the wrong plan; use app-host. SAP Help specifically links app-host with hosting deployed HTML5 app content.

Typing the wrong instance name; use exactly html5-eu-hcm-dev.

Name	Type	Environment	Provider	Region	Labels	Changed On
BTP Admin Certification	Global Account					March 25, 2026, 5:11:2...

## NEW QUESTION # 12

### SIMULATION

Enable Service Subscriptions

In the entitlements of a directory, add a service plan for a service subscription. Assign and create this subscription to/in a subaccount of the directory.

Task 1: Entitle a Service in a Directory

In your SAP BTP cockpit, enable entitlement management for your Partner directory.

In your Partner directory, entitle the standard (Application) service plan for the SAP Build Work Zone, standard edition.

### Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before You Start

Log in to the SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open the Partner directory.

Why this matters:

Both actions in this task must be done at the Partner directory level, not directly in a subaccount.

Step 1 - Open the Partner Directory

What to do

In the left navigation, click Directories.

Select Partner.

Explanation:

This opens the directory where you must manage entitlements for this task.

What to verify

You should now be inside the Partner directory page.

Step 2 - Open Entitlements

What to do

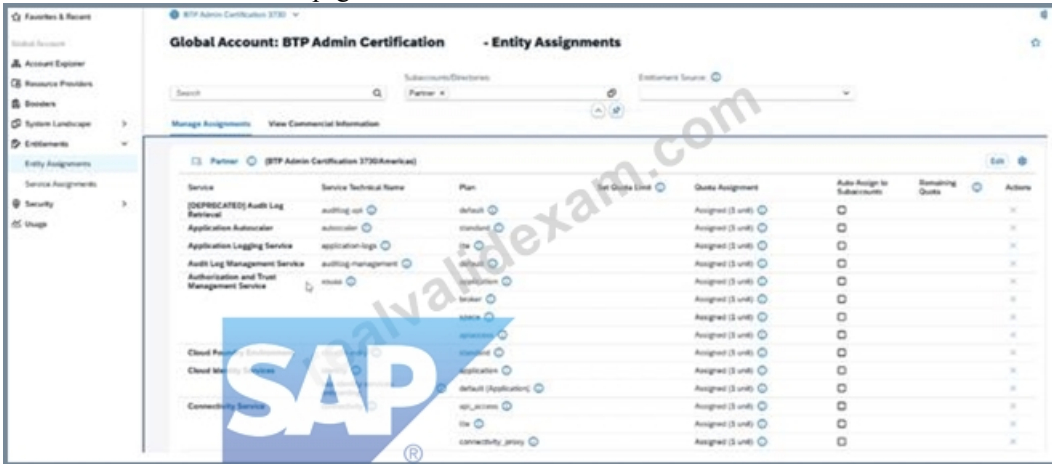

Inside the Partner directory, go to Entitlements.

Explanation:

This is the area where you manage quota and service plan assignments for the directory and its subaccounts.

What to verify

You should see the entitlements page for Partner.

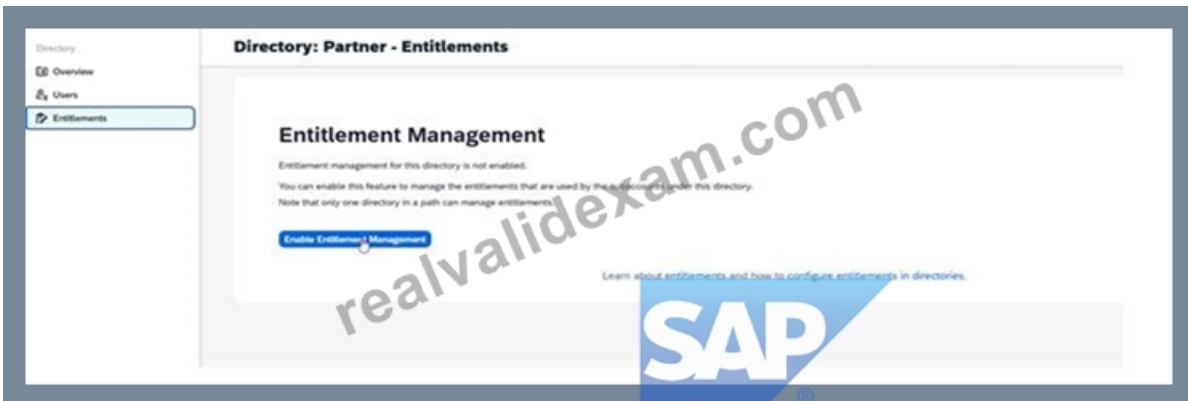

Step 3 - Enable Entitlement Management for the Partner Directory

What to do

In the Entitlements area, look for the option to Enable Entitlement Management.

Click Enable.

Explanation:

A directory must have entitlement management enabled before you can add and manage service plans there.

What to verify

After enabling, the Partner directory should allow entitlement assignment and management.

Step 4 - Start Adding a Service Plan

What to do

In the Entitlements page of the Partner directory, click Configure Entitlements or Add Service Plans.

### Select Subaccounts and Directories

Search  All

Show only subaccounts [Select All](#) [Unselect All](#) [Expand All](#) [Collapse All](#)

Authorization and Trust Management Service	xtsaa	application	<input type="checkbox"/>	Assigned (1 unit)	<input type="checkbox"/>		<input type="checkbox"/>
		broker	<input type="checkbox"/>	Assigned (1 unit)	<input type="checkbox"/>		<input type="checkbox"/>

Explanation:

This opens the service catalog where you can select the service and plan to add.

What to verify

You should see the list of available services and plans.

### Directory Partner: Add Service Plans

Solutions: All  sap

#### Services available to this directory

- business process model connector for SAP Signavio solutions
- Master Data Integration
- SAP Build Work Zone, advanced edition
- SAP Build Work Zone, standard edition
- SAP Master Data Integration Tenant
- SAP Task Center

1 selected plan  
Services: SAP Build Work Zone, standard edition (1 plan)

#### Service Details: SAP Build Work Zone, standard edition

foundation **Always Free**

Sets up the technical requirements for running SAP solutions that utilize the foundation service, such as SAP Start. Please don't manually subscribe to it.

Features: Sets up the technical requirements for running SAP solutions that utilize the foundation service, such as SAP Start. Please don't manually subscribe to it.

- > Availability by Region and Data Center
- > Entitlement Sources
- standard (Application)**
- Build business sites that serve as a unified entry point to applications.
- > Availability by Region and Data Center
- > Entitlement Sources

- Sets up the technical requirements for running SAP solutions that utilize the foundation service, such as SAP Start. Please don't manually subscribe to it.
- > Availability by Region and Data Center
- > Entitlement Sources

[Add 1 Service Plan](#) [Cancel](#)

## Step 5 - Find the Required Service

What to do

Search for or scroll to:

SAP Build Work Zone, standard edition

Select that service.

Explanation:

You must choose the exact service named in the task. Be careful not to select a different SAP Build service by mistake.

What to verify

The selected service should be:

SAP Build Work Zone, standard edition

## Step 6 - Select the Correct Service Plan

What to do

Under the selected service, choose the service plan:

standard (Application)

Add the plan to the entitlement configuration.

Explanation:

This task requires the standard (Application) service plan specifically.

Do not choose another plan if more than one is listed.

What to verify

The selected plan should read exactly:

standard (Application)

## Step 7 - Save the Entitlement Changes

What to do

Click Add, Save, or Confirm depending on the screen.

Then click Save for the entitlement configuration.

Explanation:

This commits the new service plan entitlement to the Partner directory.

What to verify

After saving, the entitlements list for Partner should include:

SAP Build Work Zone, standard edition

plan: standard (Application)

Credential Store	credstore	proxy	Assigned (1 unit)	<input type="checkbox"/>	×
Destination Service	destination	lite	Assigned (1 unit)	<input type="checkbox"/>	×
Feature Flags Service	feature-flags-dashboard	dashboard (Application)	Assigned (1 unit)	<input type="checkbox"/>	×
	feature-flags	standard	Assigned (1 unit)	<input type="checkbox"/>	×
HTML5 Application Repository Service	html5-apps-repo	lite	Assigned (1 unit)	<input type="checkbox"/>	×
		app-host	Assigned (1 unit)	<input type="checkbox"/>	×
Print Service	print	app-runtime	Assigned (1 unit)	<input type="checkbox"/>	×
		receiver	Assigned (1 unit)	<input type="checkbox"/>	×
SaaS Provisioning Service	saas-registry	application	Assigned (1 unit)	<input type="checkbox"/>	×
SAP Build Work Zone, standard edition	SAPLaunchpad	standard (Application)	Assigned (1 unit)	<input checked="" type="checkbox"/>	×
Service Manager	service-manager	service-operator-access	Assigned (1 unit)	<input type="checkbox"/>	×
		global-offerings-audit	Assigned (1 unit)	<input type="checkbox"/>	×
		subaccount-audit	Assigned (1 unit)	<input type="checkbox"/>	×
		subaccount-admin	Assigned (1 unit)	<input type="checkbox"/>	×
		container	Assigned (1 unit)	<input type="checkbox"/>	×

## Final Expected Result for Task 1

Inside the Partner directory:

Entitlement management is enabled

The service SAP Build Work Zone, standard edition is entitled

The plan standard (Application) is added

Common Mistakes to Avoid

1. Working in the wrong level

Do this in:

Partner directory

Not in:

Global Account

Subaccount

Another directory

2. Forgetting to enable entitlement management first

If entitlement management is not enabled for the directory, you may not be able to add the service plan properly.

3. Choosing the wrong service

Be sure you select:

SAP Build Work Zone, standard edition

Not another SAP Build service.

4. Choosing the wrong plan

You must select:

standard (Application)

### **NEW QUESTION # 13**

#### **SIMULATION**

Enable a Cloud Foundry Environment

Add a service plan for Cloud Foundry environment and enable it in a subaccount.

Task 1: Add a Service Plan for Cloud Foundry Environment

In your SAP BTP cockpit, in your EU HCM Dev subaccount, entitle one MEMORY service plan for the Cloud Foundry Runtime.

#### **Answer:**

Explanation:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open your correct Global Account.

Go to the Human Resources directory.

Open the EU HCM Dev subaccount.

This matters because the runtime memory quota must be assigned to the EU HCM Dev subaccount specifically. SAP documents that the MEMORY plan is the quota-bearing plan for Cloud Foundry Runtime.

Step 1 - Open the EU HCM Dev subaccount

In the cockpit, choose Directories.

Open Human Resources.

Select EU HCM Dev.

You should now be on the EU HCM Dev subaccount page.

Step 2 - Open Entitlements

In EU HCM Dev, choose Entitlements.

SAP Help confirms that service plans and quota assignments for a subaccount are configured in the Entitlements area.

Step 3 - Configure entitlements

Click Configure Entitlements or Add Service Plans.

Search for:

Cloud Foundry Runtime

In SAP Help, this appears as Cloud Foundry Runtime (APPLICATION\_RUNTIME), and the relevant plan for assigning runtime memory is MEMORY.

Step 4 - Select the MEMORY plan

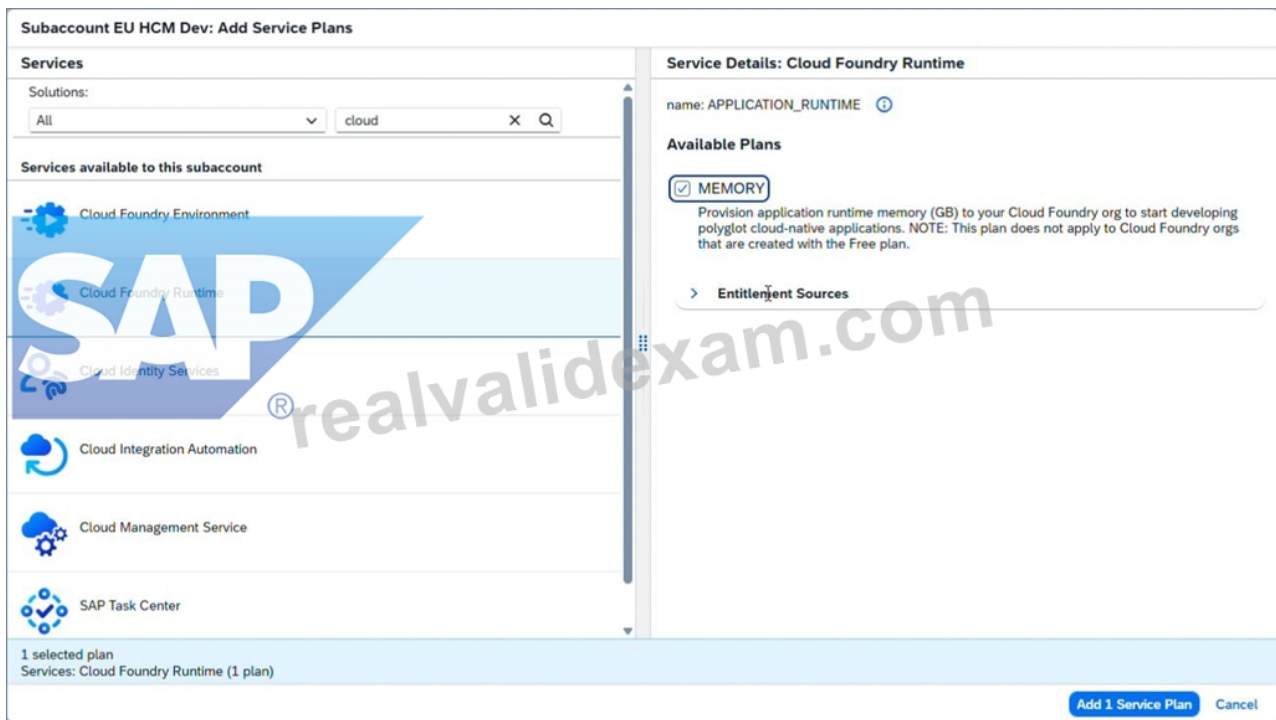

Under Cloud Foundry Runtime, select:

MEMORY

Set the quantity to 1 if the cockpit shows an amount/quota field.

Add the plan to the subaccount.

Save the entitlement changes.

SAP documents that the MEMORY plan is specifically used to assign runtime memory quota to the subaccount, and that 1 unit corresponds to 1 GB of runtime memory when quota is adjusted or assigned.

Step 5 - Verify the result

After saving, check the Entitlements page of EU HCM Dev.

You should see:

Cloud Foundry Runtime

plan: MEMORY

quantity: 1 if shown

Final expected result

Inside EU HCM Dev:

Cloud Foundry Runtime is entitled

the service plan is MEMORY

the assigned amount is 1 if the cockpit displays quantity/quota units

Common mistakes to avoid

Doing this in the wrong subaccount; it must be EU HCM Dev

Choosing the wrong Cloud Foundry plan; the task asks for MEMORY

Forgetting to save the entitlement change after adding the plan

Confusing the runtime memory entitlement with the later step of actually enabling the Cloud Foundry environment; SAP distinguishes the MEMORY runtime quota from enabling the Cloud Foundry org itself.

## NEW QUESTION # 14

.....

You only need 20-30 hours to practice our software materials and then you can attend the exam. It costs you little time and energy.

The C\_ADBTP\_2601 exam questions are easy to be mastered and simplified the content of important information. The C\_ADBTP\_2601 test guide conveys more important information with amount of answers and questions, thus the learning for the examinee is easy and highly efficient. So it is convenient for the learners to master the C\_ADBTP\_2601 Guide Torrent and pass the C\_ADBTP\_2601 exam in a short time.
