   a. 17   c. 18
   b. 16   d. 15

8. Isang komedya o melodramang may kasamang awit at tugtog.
   a. Sarsuwela   c. Senakulo
   b. Moro-moro   d. Tibag

9. Isang pagtatanghal kung buwan ng Mayo.

In fact, in real life, we often use performance of high and low to measure a person's level of high or low, when we choose to find a good job, there is important to get the AD0-E725 certification as you can. Our society needs to various comprehensive talents, rather than a man only know the book knowledge but not understand the applied to real bookworm, therefore, we need to get the AD0-E725 Certification, obtain the corresponding certifications. What a wonderful news it is for everyone who wants to pass the certification exams. There is a fabulous product to prompt the efficiency--the AD0-E725 exam prep, as far as concerned, it can bring you high quality learning platform to pass the variety of exams.

Our AD0-E725 study materials provide free trial service for consumers. If you are interested in our AD0-E725 study materials, and you can immediately download and experience our trial question bank for free. Through the trial you will have different learning experience on AD0-E725 exam guide , you will find that what we say is not a lie, and you will immediately fall in love with our products. As a key to the success of your life, the benefits that our AD0-E725 Study Materials can bring you are not measured by money. AD0-E725 test torrent can help you pass the exam in the shortest time.

AD0-E725 Training Online & AD0-E725 Latest Dumps Free

Elaborately designed and developed AD0-E725 test guide as well as good learning support services are the key to assisting our customers to realize their dreams. Our AD0-E725 study braindumps have a variety of self-learning and self-assessment functions to detect learners' study outcomes, and the statistical reporting function of our AD0-E725 Test Guide is designed for students to figure out their weaknesses and tackle the causes, thus seeking out specific methods dealing with them. Our AD0-E725 exam guide have

also set a series of explanation about the complicated parts certificated.

Adobe Commerce Developer Expert Sample Questions (Q15-Q20):

NEW QUESTION # 15
An Adobe Commerce Developer is tasked with adding a custom tax calculation to the checkout process. In addition to core tax calculations, a legacy code extending core tax calculation classes is also found. The Developer wants to utilize Magento's dependency injection system effectively to meet requirements, ensuring the solution works without modifying the existing core and legacy classes.
What should the Developer implement to achieve this?

- A. Preferences
- B. Virtual types
- C. Constructor arguments

Answer: B

Explanation:
The correct approach is Virtual types.
Virtual types allow developers to configure existing classes with different constructor arguments and create multiple variations of the same class without modifying the core or legacy code.
Preferences (C) would replace one class with another entirely, which could break the legacy functionality.
Constructor arguments (A) are part of DI but don't allow multiple variants of the same class like virtual types do.
Reference:
Adobe Commerce DevDocs - Virtual types

NEW QUESTION # 16
A Developer is notified that custom API results are not cached, which is causing additional delays.
What are two potential causes for this behavior? (Choose two.)

- A. The request is using HTTP PUT.
- B. The request is using HTTP HEAD.
- C. The request is using HTTP GET.
- D. The request is using HTTP POST.

Answer: A,D

NEW QUESTION # 17
A client reports an issue with indexers that are failing and remain stuck. The client asks a Developer to solve this issue.
What recommended solution should the Developer use?

- A. Run bin/magento indexer:set-mode realtime <indexer_list>.
- B. In app/etc/env.php set indexer_sync_mode -> false under the indexer node.
- C. Create a cron job that runs bin/magento indexer:reindex periodically.

Answer: B

Explanation:
Adobe Commerce recommends running indexers in asynchronous (scheduled) mode, not realtime mode.
This is because:
* Realtime mode (Option C) updates indexers every time related data changes, which causes performance issues and potential indexer lockups under high load.
* Manual cron job (Option A) is not recommended since Adobe Commerce already has a built-in cron system that manages indexers efficiently when properly configured.
* Setting indexer_sync_mode -> false in app/etc/env.php (Option B) ensures that indexers run in "scheduled" mode, meaning they are updated via cron jobs in the background. This prevents them from becoming stuck in the "processing" state and aligns with Adobe's best practices for production environments.
This configuration change tells Magento to defer indexing operations to scheduled jobs, which helps avoid race conditions and long-running lock issues.

Official Documentation Extracts:

* "Adobe recommends running indexers on schedule (asynchronous mode). This is controlled by the indexer configuration in the app/etc/env.php file."- Adobe Commerce DevDocs: Configure indexers

* "To enable scheduled (asynchronous) indexing, set indexer_sync_mode to false in app/etc/env.php.

This is the recommended mode for production systems."- Adobe Commerce Configuration Reference

NEW QUESTION # 18

A Developer is working on a new controller in the admin panel. Per requirements, it must be accessible only for specific admin users. According to best practices, how should the Developer secure access to the new controller?

- A. Override _isAllowed method and check the authorization result for a custom ACL resource.
- B. Implement isAllowed method from AuthorizationInterface and check the result for a custom ACL resource.
- C. Override ADMIN_RESOURCE constant with a value for a custom ACL (Access Control List) resource.

Answer: C

Explanation:

The best practice is to use the ADMIN_RESOURCE constant in the controller. This constant defines the ACL resource that controls access to the controller. Magento automatically checks the ACL resource against the current admin user's permissions.

A is unnecessary because ACL checking is built-in and tied to ADMIN_RESOURCE.

C is a legacy method (_isAllowed) used in Magento 1; in Magento 2, the constant override is the proper way.

Adobe Commerce DevDocs - Admin controllers and ACL

NEW QUESTION # 19

A customer wants to create a set of CMS blocks to be used on their website but does not wish to create these manually. An Adobe Commerce Developer is tasked to install the CMS blocks programmatically.

How should the Developer achieve this?

- A. Implement the InstallSchemaInterface, then use the block repository in the execute() function to create the blocks.
- B. Implement the DataPatchInterface, then use the block repository in the apply() function to create the blocks.
- C. Implement the SchemaSetupInterface, then use the block repository in the apply() function to create the blocks.

Answer: B

Explanation:

The correct approach for creating CMS blocks programmatically is to use a Data Patch (DataPatchInterface).

Data Patches are used for creating or modifying data programmatically (e.g., CMS blocks, CMS pages, configuration values).

InstallSchemaInterface (B) and SchemaSetupInterface (C) are used for modifying database schema, not data.
