What component enables application development and integration in the toolchain?

- A. SAP HANA Studio
- B. SAP S/4HANA
- C. SAP Business Technology Platform and SAP Build
- D. SAP GUI

正解: C

解説:

SAP Business Technology Platform (BTP), together with SAP Build, provides the infrastructure for creating extensions, integrations, and custom applications while preserving a clean core. The other tools do not serve as the primary integration or extension platform in modern cloud transformation.
