

100% Pass 2026 Cisco Newest 300-635: Automating Cisco Data Center Solutions (DCAUTO) Reliable Exam Preparation

With the rapid market development, there are more and more companies and websites to sell 300-635 guide torrent for learners to help them prepare for 300-635 exam. If you have known before, it is not hard to find that the 300-635 study materials of our company are very popular with candidates, no matter students or businessman. Welcome your purchase for our 300-635 Exam Torrent. As is an old saying goes: Client is god! Service is first! It is our tenet, and our goal we are working at!

Will you feel nervous for your exam? If you do, you can choose us, and we will help you reduce your nerves. 300-635 exam braindumps can stimulate the real exam environment, so that you can know the procedure for the real exam, and your confidence for the exam will also be strengthened. In addition, in order to build up your confidence for 300-635 Exam Materials, we are pass guarantee and money back guarantee, and if you fail to pass the exam, we will give you full refund. You can receive your downloading link and password for 300-635 training materials within ten minutes after payment.

New 300-635 Test Duration & Certification 300-635 Training

Just download the Automating Cisco Data Center Solutions (DCAUTO) (300-635) PDF dumps file and start the Automating Cisco Data Center Solutions (DCAUTO) (300-635) exam questions preparation right now. Whereas the other two Automating Cisco Data Center Solutions (DCAUTO) (300-635) practice test software is concerned, both are the mock Cisco 300-635 Exam Dumps and help you to provide the real-time Automating Cisco Data Center Solutions (DCAUTO) (300-635) exam environment for preparation.

Domain #3. Data Center Device-Centric Networking

Weightage Carried – 30%

The information under the third exam domain is focused on concepts like NX-OS iPXE and Cisco POAP. A huge part of this module is dedicated to the ways to implement On-Box automation and programmability with NX-OS. Within this subsection, the candidates should learn more about Bash, NX-OS guest shell On-box Python scripting, and Linux containers.

Before this domain ends, Embedded Event Manager, the differences between YANG Push, SYSLOG, and Netflow are explained as well. Nexus NX-API or NETCONF (through native & OpenConfig), and NX-OS (Ansible) compatible Network configuration tools are not at all ignored.

Cisco Automating Cisco Data Center Solutions (DCAUTO) Sample Questions (Q31-Q36):

NEW QUESTION # 31

Refer to the exhibit.

What results from the EEM script that runs on a Cisco Nexus 9000 switch?

- A. The message "reload module 1" is printed if one of the specified syslog patterns occurs within 120 seconds

- B. Module 1 is reloaded if one of the specified syslog patterns occurs within 120 seconds.
- C. Module 1 is reloaded if all of the specified syslog patterns occur within 120 seconds.
- D. Module 1 is reloaded if one of the specified console patterns occurs within 120 seconds.

Answer: B

Explanation:

The EEM script in the exhibit is designed to monitor for specific syslog messages. If any of the patterns specified ("copy bootflash:* running-config", "copy run start", or "Hello") occur within a 120-second window, the script will trigger the reload of module 1 on the Cisco Nexus 9000 switch.

This action is based on the occurrence of any one of the patterns, not all, which aligns with option B.

NEW QUESTION # 32

Refer to the exhibit.

Which two Cisco UCS PowerTool commands provide this output? (Choose two.)

- A. Get-UcsRackUnit | Select-Object Dn
- B. Get-UcsRack Systems | Select-Object Dn
- C. Get-UcsSystems | Select-Object Dn
- D. Get-UcsBlade | Select-Object Dn
- E. Get-UcsServer | Select-Object Dn

Answer: D,E

Explanation:

Section: Data Center Compute

NEW QUESTION # 33

Refer to the exhibit.

How often is the subscription stream for sys/bgp going to be sent?

- A. 5000 sec
- B. 5 sec
- C. 5 min
- D. 5 msec

Answer: B

Explanation:

Section: Data Center Device-centric Networking

NEW QUESTION # 34

Which two benefits of using network configuration tools such as Ansible and Puppet to automate data center platforms are valid? (Choose two)

- A. automation of repetitive tasks
- B. removal of network protocols such as Spanning Tree
- C. ability to create device and interface groups
- D. consistency of systems configuration
- E. ability to add VLANs and routes per device

Answer: A,D

Explanation:

- * Consistency of Systems Configuration: Network configuration tools like Ansible and Puppet ensure that configurations across

* **Automation of Repetitive Tasks:** These tools automate routine tasks such as deploying updates, applying configurations, and provisioning systems. By automating these tasks, data center operations become more efficient, reducing the time and effort required for manual configuration and increasing productivity
