ZertSoft ist eine Website, die Prüfungsressourcen den IT-leuten, die sich an der SAP C_S4PM_2504 Zertifizierungsprüfung (SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects) beteiligen, bieten. Es gibt verschiedene Schulungsmethoden und Kurse für verschiedene Studenten. Mit der Ausbildungsmethode von ZertSoft können die Studenten die Prüfung ganz leicht bestehen. Viele Kandidaten, die sich an der IT-Zertifizierungsprüfung beteiligt haben, haben die SAP C_S4PM_2504 Zertifizierungsprüfung (SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects) mit Hilfe der Prüfungsfragen und Antworten von ZertSoft sehr erfolgreich abgelegt. So genießt ZertSoft einen guten Ruf in der IT-Branche.

SAP C_S4PM_2504 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• SAP Activate Methodology: This section of the exam measures skills of Business Process Architects and covers the structure and practical application of SAP Activate. It includes understanding the phases of the methodology: Discover, Prepare, Explore, Realize, Deploy, and Run, and the use of supporting tools such as SAP Roadmap Viewer and SAP Best Practices. Candidates are expected to demonstrate the ability to apply this methodology to streamline cloud implementation processes and ensure agile delivery.

Thema 2	• SAP S • 4HANA Cloud Public Edition Implementation: This section of the exam measures the skills of Implementation Consultants and covers the foundational aspects of deploying SAP S • 4HANA Cloud Public Edition in a business environment. It focuses on understanding system architecture, scope definition, and the technical and functional setup required for a successful implementation. The candidate is expected to have a strong grasp of how to execute the necessary configuration and adoption tasks that align with customer-specific requirements.
Thema 3	• Project Management • Organizational Change Management (OCM): This section of the exam measures the skills of Project Managers and covers the key principles of managing SAP cloud implementation projects, including team coordination, stakeholder communication, and change management. It evaluates the ability to lead project activities, manage expectations, and handle resistance during digital transformation. Emphasis is placed on aligning organizational goals with implementation strategies to ensure effective user adoption and project success.

C_S4PM_2504 Übungsfragen: SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects & C_S4PM_2504 Dateien Prüfungsunterlagen

ZertSoft ist eine Website, die den Traum der IT-Fachleute erfüllen kann. ZertSoft bietet den Kandidaten die gewünschte Materialien, mit den Sie die Prüfung bestehen können. Machen Sie sich noch Sorgen um die SAP C_S4PM_2504 Zertifizierungsprüfung? Haben Sie schon mal gedacht, die relevanten Kurse von ZertSoft zu kaufen? Die Schulungsunterlagen von ZertSoft wird Ihnen helfen, die Prüfung effizienter zu bestehen. Die Fragen von ZertSoft sind den realen Prüfungsfragen ähnlich, fast mit ihnen identisch. Mit den genauen Prüfungsfragen und Antworten zur SAP C_S4PM_2504 Zertifizierungsprüfung können Sie die Prüfung leicht bestehen.

SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects C_S4PM_2504 Prüfungsfragen mit Lösungen (Q68-Q73):

68. Frage

You have assigned a deployment target in SAP Central Business Configuration, but have not yet completed the Confirm Scoping milestone. Which of the following tasks can you complete? Note: There are 2 correct answers to this question.

- A. Define the group currency.
- B. Assign a different deployment target.
- C. Create a company code.
- D. Rename the deployment target.

Antwort: A,D

Begründung:

SAP Central Business Configuration (CBC) is used to configure organizational structures and scope items for SAP S/4HANA Cloud Public Edition. The Confirm Scoping milestone marks the completion of scoping decisions, after which certain configurations are locked.

* Option A: Rename the deployment target. Correct. Before the Confirm Scoping milestone, the deployment target can be renamed in CBC. The SAP Central Business Configuration Guide states, "The deployment target can be renamed or adjusted prior to the Confirm Scoping milestone to align with project requirements."

* Option B: Assign a different deployment target. Incorrect. Assigning a different deployment target after one has been selected is restricted before Confirm Scoping, as it requires significant reconfiguration. The CBC Guide notes, "Once a deployment target is assigned, changing it requires administrative intervention and is not supported before scoping confirmation."

* Option C: Create a company code. Incorrect. Creating a company code is a configuration task that occurs after the Confirm Scoping milestone, as it depends on finalized scoping decisions. The SAP S

/4HANA Cloud Implementation Guide explains, "Company code creation is part of the configuration phase, post-scoping."

* Option D: Define the group currency. Correct. Defining the group currency is a preliminary task that can be completed before

Confirm Scoping to establish financial settings. The CBC Guide confirms,

"Group currency can be defined early in the CBC process to support financial scoping." Extract from Official Documentation:

* SAP Central Business Configuration Guide(<https://help.sap.com>): "Tasks such as renaming the deployment target and defining the group currency are available before the Confirm Scoping milestone, allowing flexibility in initial setup."

* SAP S/4HANA Cloud Implementation Guide: "The Confirm Scoping milestone locks certain configurations, but preliminary tasks like group currency definition can be completed earlier." Additional Context:

The flexibility to rename the deployment target and define the group currency before Confirm Scoping allows project teams to refine their setup without impacting downstream configurations.

SAP Help Portal: SAP Central Business Configuration Guide (<https://help.sap.com>).

SAP S/4HANA Cloud Implementation Guide: Details CBC milestones.

SAP Activate Methodology: Outlines scoping and configuration tasks.

69. Frage

How does identity and access management work in SAP S/4HANA Cloud Public Edition?

- A. Through predefined business roles and catalogs assigned to users
- B. Through an AI-driven security model that adjust permissions dynamically by analyzing user behavior patterns
- C. Through a matrix-based permission system where each user is assigned to specific organizational levels and functional areas
- D. Through departmental security tokens that are issued to organizational units rather than individual users

Antwort: A

70. Frage

In the SAP Activate prepare phase, the cloud project is set up and officially launched. Which change management activities are usually started in this phase?

Note: There are 3 correct answers to this question.

- A. Conduct a detailed change impact analysis
- B. Develop and align the change network strategy
- C. Identify the key stakeholders and conduct a stakeholder analysis
- D. Develop an initial change plan for the cloud project
- E. Facilitate the role mapping process

Antwort: B,C,D

71. Frage

In which phase do you verify the SAP Best Practices content that meets the customer's business needs, and capture delta requirements? Note: There are 2 correct answers to this question.

- A. Prepare
- B. Discovery
- C. Realize
- D. Explore

Antwort: B,D

Begründung:

Verifying SAP Best Practices content and capturing delta requirements are critical activities in the SAP Activate methodology to ensure the SAP S/4HANA Cloud Public Edition solution aligns with customer needs. These activities occur in specific phases to set the project scope and identify gaps.

* Option A: Explore/Correct. The Explore phase involves Fit-to-Standard workshops where SAP Best Practices are verified against customer needs, and delta requirements (gaps) are captured. The SAP S

/4HANA Cloud Implementation Guide states, "In the Explore phase, Fit-to-Standard workshops verify SAP Best Practices content to meet customer business needs and capture delta requirements for further configuration."

* Option B: Discovery/Correct. The Discovery phase uses tools like the Digital Discovery Assessment to initially verify Best

Practices and identify high-level delta requirements. The SAP Activate Methodology Guide explains, "During the Discovery phase, customers verify SAP Best Practices content through assessments like the Digital Discovery Assessment, capturing preliminary delta requirements to define the project scope."

* Option C: RealizeIncorrect. The Realize phase focuses on configuring the solution and addressing delta requirements, not verifying Best Practices. The SAP S/4HANA Cloud Study Guide notes, "Realize phase activities build on the delta requirements captured in Explore, not verifying Best Practices content."

* Option D: PrepareIncorrect. The Prepare phase sets up the project and initiates change management, not verifies Best Practices or captures delta requirements. The SAP Activate Methodology Guide clarifies, "The Prepare phase focuses on project setup and planning, with Best Practices verification occurring in Discovery and Explore." Extract from Official Documentation:

* SAP S/4HANA Cloud Implementation Guide (SAP Help Portal, <https://help.sap.com>): "The Explore phase verifies SAP Best Practices content through Fit-to-Standard workshops, capturing delta requirements, while the Discovery phase initiates this process with tools like the Digital Discovery Assessment."

* SAP Activate Methodology Guide (SAP Community, <https://community.sap.com>): "In the Discovery phase, customers use assessments to verify Best Practices and identify delta requirements, followed by detailed validation and gap capture in the Explore phase's Fit-to-Standard process." Additional Context:

The Discovery phase provides a high-level validation of Best Practices to scope the project, while the Explore phase dives deeper through Fit-to-Standard workshops, ensuring a comprehensive understanding of gaps. This two-phase approach aligns with SAP's cloud mindset, emphasizing standard processes and early identification of necessary customizations to streamline implementation.

72. Frage

In which deployment models is application management the responsibility of the customer? Note: There are 3 correct answers to this question.

- A. Infrastructure as a Service
- **B. Platform as a Service**
- C. Software as a Service
- **D. On premise**
- **E. Private Cloud**

Antwort: B,D,E

Begründung:

Application management responsibilities vary across deployment models, with customers taking on more responsibility in less managed environments.

* Option A: Private CloudCorrect. In the Private Cloud model (e.g., SAP S/4HANA Cloud Private Edition), customers are responsible for application management, including configuration and maintenance, as SAP provides the infrastructure but not full application management.

* Option B: Platform as a ServiceCorrect. In PaaS (e.g., SAP Business Technology Platform), customers manage the applications they develop and deploy, while SAP manages the underlying platform.

* Option C: Software as a ServiceIncorrect. In SaaS (e.g., SAP S/4HANA Cloud Public Edition), SAP handles application management, including updates and maintenance, relieving customers of this responsibility.

* Option D: On premiseCorrect. In on-premise deployments, customers are fully responsible for application management, including updates, configurations, and maintenance.

* Option E: Infrastructure as a ServiceIncorrect. In IaaS, customers manage applications, but the question focuses on deployment models for SAP S/4HANA, where IaaS is less relevant compared to Private Cloud or PaaS.

:

SAP S/4HANA Cloud Deployment Models Guide: Details responsibilities in Private Cloud, PaaS, and on- premise (<https://help.sap.com>).

SAP BTP Documentation: Explains PaaS application management.

SAP S/4HANA Cloud Public Edition Study Guide: Clarifies customer responsibilities across deployment models.

73. Frage
