Qualification

Format
Proctored, closed book exam

Credential
Hitachi Vantara Qualified Professional - VSP 5000 Series Installation

Validity 3 years

Delivery
Korston Webassessor System*

Questions 35

Passing Score 65%

Duration 60 minutes

Cost
US \$100 or equivalent in local currency (plus local tax, depending on location)

Supporting Material
• 1090PI - Installing and Configuring the Hitachi VSP 5000 Series (5 day-ILT)

This test is designed for Hitachi Vantara employees and partners who install Hitachi Virtual Storage Platform (VSP) 5000 series systems. The test will validate that the successful candidate has knowledge and skills in installing, configuring and supporting VSP 5000 series systems at customer sites. This includes strong knowledge of the systems' hardware and associated program products, thorough understanding of installation and configuration procedures, and associated support activities. This test covers Hitachi Virtual Storage Platform models VSP 5100(H), VSP 5500(H), VSP 5200(H) and VSP 5600(H).

Audience: Hitachi Vantara Employee and Partner Installation Professionals

Hitachi VSP 5000 series installation professionals should have strong knowledge and skills in installing and supporting storage systems deployed as part of VSP 5000 series solutions implementation. They perform pre-installation checks and install, configure and test the systems so they can be handed over in an operational state to customers. They also provide post-installation services, including support, maintenance, updates and upgrades, and have knowledge of problem-determination and incident-resolution procedures, tools and techniques.

Test Objectives	
Section 1 System Architecture	
1.1	Describe the different VSP 5000 models and their specifications.
1.2	Describe the VSP 5000 systems architecture, their components and their functions.
1.3	Describe the front-end design and layout of VSP 5000 systems and the supported Channel Boards (CHBs).
1.4	Describe the back-end design and layout of VSP 5000 systems and the supported Disk Adapters (DKAs).
Section 2 System Pre-installation and Installation	
2.1	Describe the VSP 5000 storage systems pre-installation procedures and documentation.
2.2	Describe the VSP 5000 disk controllers (DKCs) interconnections.
2.3	Describe the "New Installation" procedure for VSP 5000 storage systems and when it is appropriate to use.
2.4	Describe the VSP 5000 storage systems network settings.
2.5	Describe the VSP 5000 storage microcode upgrade procedures.
Section 3 System Configuration	
3.1	Describe the key steps involved in the installation of VSP 5000 storage systems.
3.2	Describe how to create Parity Groups on VSP 5000 storage systems.

* Depending on the location and course delivery format, this closed-book, proctored qualification test may also be offered and administered by the instructor at the conclusion of the supporting course.

Exam Hitachi HQT-4160 Questions Fee & HQT-4160 Valid Test Registration

Hitachi HQT-4160 practice materials are highly popular in the market compared with other materials from competitors whether on the volume of sales or content as well. All precise information on the Hitachi Vantara Qualified Professional - VSP 5000 Series Installation HQT-4160 Exam Questions and high accurate questions are helpful. To help you have a thorough understanding of our HQT-4160 training prep, free demos are provided for your reference.

Hitachi Vantara Qualified Professional - VSP 5000 Series Installation Sample Questions (Q49-Q54):

NEW QUESTION # 49

You need to upgrade the cache of a VSP 5500 online. How do you accomplish this task?

- A. Use the Web Console to block the controllers one at the time, and add the extra cache to the blocked controller.
- B. Use the VSP GUI and click on Change Configuration and follow the instructions on the screen to add the extra cache.
- C. Use Storage Navigator to put the CHB Adapters offline one controller at a time, and add the extra cache to the inactive controller.
- **D. Use the Maintenance Utility to block the controllers one at the time, and add the extra cache to the blocked controller.**

Answer: D

Explanation:

To upgrade the cache online, you must use the Maintenance Utility to sequentially block each controller, add the extra cache modules to the blocked controller, and then unblock it, ensuring system availability throughout the process.

NEW QUESTION # 50

You need to perform a microcode upgrade on a VSP 5500H and you first want to backup the configuration. How do you accomplish this task?

- **A. Use Copy Config Files under the Initial Setting menu of the SVP GUI.**
- B. Connect the maintenance laptop to the SVP port and use Copy Config Files.
- C. Connect a USB drive to the SVP and use Copy Config Files.
- D. Use Copy Config Files under the Maintenance Utility.

Answer: A

Explanation:

To back up the configuration before a microcode upgrade on a VSP 5500H, you should use the "Copy Config Files" option available under the Initial Setting menu in the SVP GUI. This ensures a proper backup of system settings and configuration.

NEW QUESTION # 51

What are the key benefits of correctly performing a "New Installation" procedure for VSP 5000 storage systems? (Choose Three)

- **A. Reduced risk of installation-related issues**
- **B. Optimal system performance**
- C. Increased storage capacity
- D. Extended hardware lifespan
- **E. Enhanced system security**

Answer: A,B,E

Explanation:

Performing a proper new installation procedure for the Hitachi VSP 5000 ensures that the system is set up correctly and ready for reliable operation. Key benefits include:

Optimal system performance (B)

Correct configuration of storage controllers, network connections, and RAID groups ensures efficient I/O handling and system throughput.

Enhanced system security (C)

Properly configuring access controls, user permissions, and network settings helps protect data and prevent unauthorized access.

Reduced risk of installation-related issues (D)

Following the recommended steps minimizes errors such as connectivity problems, misconfigured storage, or hardware misalignment, which could lead to downtime.

NEW QUESTION # 52

Which three RAID Group configurations are supported on a VSP 5000 system? (Choose three.)

- A. RAID6 (7D+2P)
- B. RAID1 (2D+2D)
- C. RAID5 (4D+1P)
- D. RAID6 (6D+2P)
- E. RAID5 (7D+1P)

Answer: A,B,C

Explanation:

RAID1 (2D+2D)

RAID1 (2D+2D) is a supported RAID1 configuration providing mirroring for high availability.

RAID5 (4D+1P)

RAID5 (4D+1P) is a commonly supported RAID5 layout with four data drives and one parity drive.

RAID6 (7D+2P)

RAID6 (7D+2P) is a supported RAID6 configuration, offering double parity and improved fault tolerance.

NEW QUESTION # 53

In a VSP 5100 a drive in a RAID5 Parity Group has failed and has been blocked by the microcode. As a result, which process gets automatically started?

- A. Copy Back
- B. Correction Copy
- C. Sparing Copy
- D. Dynamic Sparing

Answer: B

Explanation:

When a drive in a RAID5 Parity Group fails and is blocked by the microcode in a VSP 5100, the Correction Copy process is automatically started to rebuild the data onto a spare drive.

NEW QUESTION # 54

.....

The language in our Hitachi HQT-4160 test guide is easy to understand that will make any learner without any learning disabilities, whether you are a student or a in-service staff, whether you are a novice or an experienced staff who has abundant experience for many years. It should be a great wonderful idea to choose our HQT-4160 Guide Torrent for sailing through the difficult test.
