## Salesforce Certified Sharing and Visibility Architect Sample Questions (Q26-Q31):

### NEW QUESTION # 26

Universal container (UC) use External Object to retrieve Invoice data from a Legacy ERP. A finance team requested to have access to the Invoice records in the account page.

In addition to object access in the finance users profile, what other feature should a Sales Architect recommend?

- A. Create a criteria-based sharing rule to grant access to the records.
- B. Use APEX managed sharing to grant access to the records.
- C. Create an owner-based sharing rule to grant access to the records.
- D. Include the Invoice Related List On Account Page layout.

**Answer: D**

Explanation:

Explanation

To give access to the invoice records from an external object on the account page, the Sales Architect should recommend including the Invoice Related List on Account Page layout. This will allow the finance users to see the invoice records related to each account, as long as they have access to the account record and the external object<sup>4</sup>. Creating sharing rules or using Apex managed sharing are not applicable for external objects, as they do not support manual or programmatic sharing

### NEW QUESTION # 27

Universal Containers has Controlled by Parent sharing settings on the Contact object and Public Read Only sharing settings on Account, Opportunity, and Case objects. Which two options can the user see while adding Account team members to the Account?

- A. Contact Access
- B. Activity Access
- C. Opportunity Access
- D. Case Access

**Answer: C,D**

Explanation:

Explanation

Two options that the user can see while adding account team members to the account are case access and opportunity access. This is because these are the two objects that have public read only sharing settings and allow users to specify different levels of access for account team members. Contact access and activity access are not options because these objects have controlled by parent sharing settings and inherit their access from the account

### NEW QUESTION # 28

Universal Containers (UC) provides shipment tracking for its customers on a custom Shipment object. The .. yearly by the customers should be available on the Account record to the Marketing team, but the Marketing Shipment records.

What recommend should an Architect provide to accomplish this?

- A. Private organization-wide default on Shipment, trigger, and Lookup relationship to Account,

- B. Private organization-Wide default on Shipment, rollup summary, and Master-Detail relationship to Account.
- C. Controlled by Parent (Account) on Shipment, trigger, and trigger, and Master-Detail relationship to Account.
- D. Public organization-wide default on Shipment, process builder, and lookup relationship to Account.

**Answer: A**

#### NEW QUESTION # 29

Sales Operations at Universal Container (UC) wants to create the opens to fiber appropriates for center.

In which two ways can UC hide list that are not relevant to an individual use since there will be Choose 2 answers.

- A. Share the list views with the appropriate role in the role hierarchy
- B. Share the list views with the appropriate individual users.
- C. Share the list views with the appropriate queue.
- D. Share the list views with the appropriate public group.

**Answer: A,D**

#### NEW QUESTION # 30

Universal Container has a set of Account management users that should only see accounts once the account becomes a customer.

The type field on the Account identifies whether the account is a prospect, customer, partner, or other. Which two methods could an Architect use to enable this sharing requirement, assuming a private sharing model for accounts? Choose two:

Architect use to enable this sharing requirement, assuming a private sharing model for accounts? Choose two:

- A. Create an account sharing rule that shares all accounts owned by sales to be shared with account management roles and subordinates
- B. Institute a business process that calls for the account manager to be added to the account team once the account becomes a customer
- C. Create a criteria-based sharing rule that shares the account to the account management group when the type is customer
- D. Create a public list view, where accounts of type customer are included and share the list view with account management public group

**Answer: B,C**

Explanation:

Explanation

Instituting a business process that calls for the account manager to be added to the account team once the account becomes a customer, and creating a criteria-based sharing rule that shares the account to the account management group when the type is customer are two methods that could be used to enable this sharing requirement, assuming a private sharing model for accounts. These methods would ensure that only accounts with type customer are shared with the account management users, and only when they are involved in the account team. Creating a public list view, where accounts of type customer are included and share the list view with account management public group is not a method to enable sharing, as it only filters the records that are already visible to the users, not grant access to new ones. Creating an account sharing rule that shares all accounts owned by sales to be shared with account management roles and subordinates is not a method to enable this sharing requirement, as it would share all accounts regardless of their type

#### NEW QUESTION # 31

.....

The person who has been able to succeed is because that he believed he can do it. Real4Prep is able to help each IT person, because it has the capability.
