

# ServiceNow CAD Valid Exam Vce Free | Exam CAD Study Guide

What's more, part of that PassLeaderVCE CAD dumps now are free: [https://drive.google.com/open?id=1LCBFf2632YHaG9Q4hVMDTSWN5on63K\\_](https://drive.google.com/open?id=1LCBFf2632YHaG9Q4hVMDTSWN5on63K_)

There are a lot of the functions on our CAD exam questions to help our candidates to reach the best condition before they take part in the real exam. I love the statistics report function and the timing function most. The statistics report function helps the learners find the weak links and improve them accordingly. The timing function of our CAD training quiz helps the learners to adjust their speed to answer the questions and keep alert and our CAD study materials have set the timer.

ServiceNow is a software company that provides cloud-based solutions for IT service management, IT operations management, and IT business management. The ServiceNow platform helps organizations automate and streamline their IT workflows, resulting in increased efficiency and productivity. To become proficient in ServiceNow platform development, one must attain the Certified Application Developer-ServiceNow (CAD) certification. The ServiceNow CAD Certification evaluates an individual's understanding of ServiceNow platform development concepts, features, and functionality.

## CAD Valid Exam Vce Free: Certified Application Developer-ServiceNow - Valid ServiceNow Exam CAD Study Guide

We have three different versions of our CAD exam questions which can cater to different needs of our customers. They are the versions: PDF, Software and APP online. The PDF version of our CAD exam simulation can be printed out, suitable for you who like to take notes, your unique notes may make you more profound. The Software version of our CAD Study Materials can simulate the real exam. And the APP online version can be applied to all electronic devices.

## ServiceNow Certified Application Developer-ServiceNow Sample Questions (Q73-Q78):

### NEW QUESTION # 73

Which roles grant access to source control repository operations such as importing applications from source control, or linking an application to source control? (Choose two.)

- A. admin
- B. source\_control\_admin
- C. source\_control
- D. git\_admin

Answer: A,C

Explanation:

Explanation/Reference: [https://docs.servicenow.com/bundle/orlando-application-development/page/build/applications/task/\\_LinkAnApplicationToSourceControl.html](https://docs.servicenow.com/bundle/orlando-application-development/page/build/applications/task/_LinkAnApplicationToSourceControl.html)

#### NEW QUESTION # 74

What are the benefits of storing the majority of an Application's server-side script logic in a Script Include?

- a) This makes execution faster.
  - b) Only run when called from a script.
  - c) The script logic can be hidden when the Application is installed from the ServiceNow Store.
  - d) For some changes to application logic there is only one place to make edits.
- A. a, b, c, and d
  - B. a, b, and d
  - C. a, b, and c
  - D. b, c, and d

**Answer: D**

Explanation:

[https://developer.servicenow.com/dev.do#!/learn/courses/tokyo/app\\_store\\_learnv2\\_scripting\\_tokyo\\_scripting\\_in](https://developer.servicenow.com/dev.do#!/learn/courses/tokyo/app_store_learnv2_scripting_tokyo_scripting_in)

#### NEW QUESTION # 75

Which Application Access configuration field(s) are NOT available if the Can read configuration field is NOT selected?

- A. All access to this table via web services
- B. Can read does not affect the availability of other Application Access fields
- C. Can create, Can update, and Can delete
- D. Allow configuration

**Answer: C**

Explanation:

"You must first select read access to grant any other API record operation." [https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/reference/r\\_TableApplicationAccessFields.html](https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/reference/r_TableApplicationAccessFields.html) The Application Access configuration fields control the access level for an application and its tables. The following Application Access configuration fields are not available if the Can read configuration field is not selected:

Can create. This field determines whether users can create records on the application tables.

Can update. This field determines whether users can update records on the application tables.

Can delete. This field determines whether users can delete records on the application tables.

These fields are not available because they depend on the Can read field, which determines whether users can view records on the application tables. If users cannot read records, they cannot create, update, or delete them either.

The following Application Access configuration fields are available regardless of the Can read configuration field:

All access to this table via web services. This field determines whether users can access the application tables using web services, such as REST or SOAP.

Allow configuration. This field determines whether users can configure the application tables, such as adding or modifying fields, views, or indexes. References: Application Access, Certified Application Developer (CAD) Learning Path

#### NEW QUESTION # 76

Here is the Business Rule script template:

☐ This type of JavaScript function is known as:

- A. Anonymous
- B. Scoped
- C. Self-invoking
- D. Constructor

**Answer: B**

### NEW QUESTION # 77

Which objects can you use in a Scheduled Script Execution (Scheduled Job) script?

- A. GlideSystem and current
- **B. GlideSystem and GlideRecord**
- C. GlideRecord and current
- D. GlideUser and GlideRecord

**Answer: B**

Explanation:

[https://developer.servicenow.com/dev.do#!/learn/learning-plans/quebec/servicenow\\_administrator/app\\_store\\_learn](https://developer.servicenow.com/dev.do#!/learn/learning-plans/quebec/servicenow_administrator/app_store_learn) The objects that you can use in a Scheduled Script Execution (Scheduled Job) script are GlideSystem and GlideRecord. GlideSystem provides methods for performing system operations, such as logging, running background scripts, or getting system information. GlideRecord provides methods for working with records in the database, such as querying, updating, inserting, or deleting records. The current object is not available in Scheduled Script Execution scripts, as it refers to the current record on a form or list. The GlideUser object is also not available, as it refers to the current user session. Reference: Scheduled Script Execution, GlideSystem, GlideRecord

### NEW QUESTION # 78

.....

Our PassLeaderVCE CAD exam certification training materials are real with a reasonable price. After you choose our CAD exam dumps, we will also provide one year free renewal service.
