quality, which in turn wastes your time in learning. In fact, you can totally believe in our C-BCSBS-2502 Test Questions for us 100% guarantee you pass exam. If you unfortunately fail in the exam after using our C-BCSBS-2502 test questions, you will also get a full refund from our company by virtue of the proof certificate.

SAP C-BCSBS-2502 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Positioning SAP Business Data Cloud: This section of the exam measures the skills of Enterprise Architects and covers the positioning and strategic use of SAP Business Data Cloud. It involves understanding how data from various sources is managed, governed, and accessed to support intelligent business operations. The section aims to equip professionals with the ability to explain data unification and connectivity through SAP's cloud-based data platform.
Topic 2	<ul style="list-style-type: none">Discovering SAP Business AI: This section of the exam measures the skills of Digital Transformation Specialists and focuses on exploring how SAP Business AI enables smarter decision-making. It includes identifying AI-driven features embedded within SAP solutions and how they contribute to automation, predictions, and enhanced business outcomes. Professionals are expected to understand how to promote AI adoption in business processes using SAP's intelligent technologies.
Topic 3	<ul style="list-style-type: none">Positioning SAP Business Suite: This section of the exam measures the skills of Solution Consultants and covers how to effectively position the SAP Business Suite within various business scenarios. It includes understanding the core value, capabilities, and strategic advantages of SAP's integrated business applications. The focus is on enabling consultants to align SAP Business Suite offerings with customer needs to support end-to-end processes.

SAP Certified Associate - Positioning SAP Business Suite Sample Questions (Q29-Q34):

NEW QUESTION # 29

What is the primary purpose of SAP Business Suite? Please choose the correct answer.

- A. Integrating core business functions across various modules
- B. Managing financial risk and compliance
- C. Automating IT infrastructure monitoring
- D. Enhancing social media engagement

Answer: A

NEW QUESTION # 30

Which SAP Business Suite applications help manage supply chain processes efficiently? There are 2 correct answers to this question.

- A. SAP SuccessFactors
- B. SAP Concur
- C. SAP Transportation Management (TM)
- D. SAP Supply Chain Management (SCM)

Answer: C,D

NEW QUESTION # 31

Which of the following are RISE with SAP journeys? Note: There are 2 correct answers to this question.

- A. New customers move to the public cloud
- B. An ERP transformation to private cloud
- C. Greenfield ERP implementation on Public Cloud

- D. A hybrid two-tier approach

Answer: B,D

Explanation:

RISE with SAP is a guided transformation journey designed for existing SAP ERP customers to modernize their business processes and transition to a cloud ERP landscape, primarily focusing on SAP S/4HANA Cloud Private Edition. It is tailored for organizations with complex, customized on-premises systems, allowing them to move to the cloud at their own pace while preserving existing investments. The question asks which options represent RISE with SAP journeys, with two correct answers. Below, each option is evaluated based on official SAP documentation from sources such as SAP Learning, SAP.com, and related materials.

* Option A: Greenfield ERP implementation on Public Cloud A greenfield ERP implementation involves a new, clean implementation of an ERP system without carrying over existing customizations or data.

While SAP S/4HANA Cloud Public Edition supports greenfield implementations, these are primarily associated with the GROW with SAP journey, which targets new SAP customers or midsize companies adopting standardized, best-practice processes for rapid deployment. RISE with SAP, however, is designed for existing SAP ERP customers transitioning from on-premises systems, often involving complex landscapes and customizations. The public cloud (SAP S/4HANA Cloud Public Edition) is not the primary focus of RISE with SAP, which emphasizes the private cloud (SAP S/4HANA Cloud Private Edition) for such customers.

Therefore, a greenfield implementation on the public cloud aligns more with GROW with SAP, not RISE with SAP. Extract: "For new customers, the GROW with SAP journey accelerates and streamlines the cloud transformation with a customized methodology to quickly implement and benefit from cloud ERP. ... SAP S/4HANA Cloud Public Edition is always implemented in a greenfield (new implementation) scenario." learning.sap.com Extract: "RISE with SAP is tailored to enable an easy transition to cloud ERP at a pace comfortable for the customer. Existing customers often require a higher degree of customization in their processes, prefer to innovate at their own pace, and need more control over their solution. These characteristics align with SAP S/4HANA Cloud Private Edition." learning.sap.com This option is incorrect.

* Option B: An ERP transformation to private cloud RISE with SAP is explicitly designed to support ERP transformations from on-premises SAP ERP systems (e.g., SAP ECC or on-premises SAP S/4HANA) to SAP S/4HANA Cloud Private Edition, which operates in a private cloud environment. This journey accommodates both greenfield (new implementation) and brownfield (system conversion) scenarios, allowing customers to maintain existing customizations and business processes while leveraging cloud benefits like scalability, AI, and continuous innovation. The private cloud focus is a hallmark of RISE with SAP, making this option a core component of its transformation journeys. Extract: "RISE with SAP is a comprehensive offering that helps companies run their business in the cloud. At the heart of this comprehensive offering is SAP S/4HANA Cloud Private Edition, an intelligent cloud ERP solution powered by AI designed for customers currently running SAP ERP and/or on-premise SAP S/4HANA." blog.sap-press.com Extract: "A private cloud deployment is recommended if a customer has plans for a long-term evolutionary journey to the cloud with high landscape complexity including mostly fragmented, highly customized systems. ... The private cloud deployment can be a new implementation, but also supports system conversion from an existing SAP ERP on-premise system." learning.sap.com This option is correct.

* Option C: New customers move to the public cloud New customers moving to the public cloud typically align with the GROW with SAP journey, which is designed for organizations (often midsize or new to SAP) seeking a rapid, standardized implementation of SAP S/4HANA Cloud Public Edition. GROW with SAP emphasizes quick time-to-value with preconfigured best practices and minimal customization, targeting customers without prior SAP investments. In contrast, RISE with SAP targets existing SAP customers with on-premises ERP systems, focusing on complex transformations to the private cloud. While RISE with SAP could theoretically include public cloud components in specific scenarios, its primary focus is not new customers or the public cloud. Extract: "GROW with SAP is a SAP software solution initiative designed exclusively for mid-size companies and initial SAP customers. SAP S/4HANA Cloud + Public Edition - built on top of SAP's own HANA Cloud infrastructure, optimized for fast roll-out and quick time-to-value." uneecops.com Extract: "RISE with SAP is an ERP adoption solution that helps current SAP ecosystem users transition traditional ERP information and processes to a cloud system without compromising or putting your data at risk." blog.nbs-us.com This option is incorrect.

nbs-us.com This option is incorrect.

* Option D: A hybrid two-tier approach A hybrid two-tier ERP approach involves using a combination of SAP S/4HANA Cloud Public Edition and Private Edition, often across different parts of an organization (e.g., headquarters vs. subsidiaries). RISE with SAP supports such configurations, particularly for existing SAP customers with complex landscapes who may implement a private cloud solution (via SAP S/4HANA Cloud Private Edition) for core operations while using the public cloud for standardized processes in specific areas. This approach allows flexibility and scalability, aligning with RISE with SAP's tailored transformation framework. The documentation explicitly mentions support for two-tier ERP scenarios under RISE with SAP, making this a valid journey. Extract: "It's also common for customers to implement both SAP S/4HANA Cloud Public and Private Edition in a two-tier ERP scenario." learning.sap.com Extract: "RISE with SAP is tailored to a customer's existing landscape and business requirements, and umfasst ein standardisiertes Framework, integrierte Tools und fachkundige Beratung bei jedem Schritt - nach einer bewährten Methodik, die sowohl die Transformation als auch die Wertschöpfung beschleunigt." (Translated: "RISE with SAP is tailored to a customer's existing landscape and business requirements, and includes a standardized framework, integrated tools, and expert guidance at every step - following a proven methodology that accelerates both transformation and value creation.") sap.com This option is correct.

Summary of Correct Answers:

* B: RISE with SAP supports ERP transformations to the private cloud, primarily through SAP S

/4HANA Cloud Private Edition, accommodating both greenfield and brownfield scenarios for existing SAP customers.

* D: RISE with SAP enables a hybrid two-tier approach, combining private and public cloud editions to meet diverse organizational needs, as part of its flexible transformation framework.

NEW QUESTION # 32

Match the outcomes in the dropdown lists to the capabilities of Joule

□

Answer:

Explanation:

□

Explanation:

Step-by-Step Solution

1. Get the insights you need, when you need them.

Correct Outcome:

* Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.

This outcome is about having real-time access to insights and analytics. Joule helps by making complex data simple and accessible, empowering all users (not just technical staff) to make decisions quickly, without waiting for IT or reports.

2. Enable every employee to achieve more in a faster way.

Correct Outcome:

* Increased workforce productivity, fewer operational errors, and quicker task completion.

Here, the focus is on how Joule streamlines processes for all employees. With AI automation and proactive recommendations, Joule helps everyone work faster, make fewer mistakes, and complete tasks efficiently.

3. Make every customer touchpoint count.

Correct Outcome:

* Higher NPS, better conversion rates, and stronger customer retention.

This is about customer experience. Joule uses AI to ensure every interaction with the customer is valuable, increasing satisfaction (NPS = Net Promoter Score), conversion, and retention rates.

NEW QUESTION # 33

Which key feature differentiates SAP Business Suite from traditional ERP solutions? Please choose the correct answer.

- **A. Integration with cloud-based applications**
- B. Focus on standalone business modules
- C. No integration with third-party applications
- D. Lack of real-time analytics

Answer: A

NEW QUESTION # 34
