Appian ACD101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Appian Development: Interface Design: The exam evaluates capabilities of Appian developers to design and construct interfaces, configure local variables, and use interface components like drop-downs and grids. The ACD101 exam also tests your adherence to best practices in interface design, as well as your skills in testing and troubleshooting interfaces.
Topic 2	<ul style="list-style-type: none">• Introduction to the Appian Platform: The Appian Associate Developer exam tests the familiarity of aspiring Appian developers with essential Appian resources like online docs and Appian Max, and their abilities to organize application structures. It measures your understanding of how to utilize the capabilities of Appian, such as process mining and RPA, to address business challenges effectively.
Topic 3	<ul style="list-style-type: none">• General Appian Principles: This topic of the ACD101 Exam assesses the knowledge of Appian developers about Appian platform permissions, including role-based security, and differentiates between various design objects like processes and records. It evaluates your understanding of Appian environments as well.

Our PDF files are printable that you can share your ACD101 free demo with your friends and classmates. You can practice ACD101 real questions and review our study guide anywhere and anytime.

Appian Associate Developer Sample Questions (Q91-Q96):

NEW QUESTION # 91

You want to add a script task in between two User Input Tasks assigned to the same user.

What needs to be configured so that the user sees the second form immediately after submitting the first?

- **A. Enable activity chaining.**
- B. Run the script task as "synchronous."
- C. Set all process variables as parameters.

Answer: A

NEW QUESTION # 92

After selecting a record, a user wants to initiate an activity in the context of that selected record. You start by creating the process model that implements this activity. What should you do next?

- A. Add the process model as a record related action to that record.
- B. Configure a site page as an action to kick off the process model.
- C. Add the process model as a record list action to that record.

Answer: A

Explanation:

a record related action. This allows the action to be performed in the context of a specific record, making it straightforward for users to initiate processes directly from the record view.

NEW QUESTION # 93

You built a grid field with the data source as a query entity.

You want to add a search box to the grid using Appian's out-of-the-box functionality. You set the parameter of showSearchBox to "True", but the search box is still not appearing.

Why is the search box NOT appearing?

- A. The search box only appears when data is populated in the grid.
- B. The showSearchBox parameter only applies when a record type is used as the source in the data.
- C. The grid is on an interface that needs to be placed within a report object.

Answer: B

NEW QUESTION # 94

You receive the following error message after creating a dropdown field:

What could be the problem?

- A. The choiceLabels have too few labels.
- B. The choiceValues has too few values.
- C. The choiceLabels and choiceValues datatypes do not match.

Answer: B

Explanation:

The error message indicates that the choiceValues array is not the same length as the choiceLabels array. In this scenario, there are more labels than values, which means the choiceValues array needs additional values to match the number of labels.

NEW QUESTION # 95

You need to configure the database to have a one-to-many relationship between ACME_ORDER and ACME_ORDER_ITEM. What is a valid method for configuring this relationship in the database?

- A. Add a new field "ORDER_ITEM_ID" on the ACME_ORDER table and set the field as a second primary key of the ACME_ORDER_ITEM entry.
- B. Add a new field "ORDER_ID" on the ACME_ORDER_ITEM table and set the field as a foreign key to the ACME_ORDER entry.
- C. Add a new field "ORDER_ITEM_ID" on the ACME_ORDER table and set the field as a foreign key of the
