

350-401 Exam Cram Questions & 350-401 Valid Dumps

350-401 Actual Exam Questions

Last updated on Jan. 29, 2025.
Vendor: Cisco
Exam Code: 350-401
Exam Name: Implementing Cisco Enterprise Network Core Technologies (ENCOR)
Exam Questions: 1066

Topic 1 - Single Topic

Question #1 Topic 1
What is the difference between a RIB and a FIB?

- A. The FIB is populated based on RIB content. **Most Voted**
- B. The RIB maintains a mirror image of the FIB.
- C. The RIB is used to make IP source prefix-based switching decisions.
- D. The FIB is where all IP routing information is stored.

[Hide Solution](#) [Discussion 19](#)
Correct Answer: A

Community vote distribution
A (100%)

Question #2 Topic 1
Which QoS component alters a packet to change the way that traffic is treated in the network?

- A. policing
- B. classification
- C. marking **Most Voted**
- D. shaping

[Hide Solution](#) [Discussion 27](#)
Correct Answer: C

Community vote distribution
C (100%)

Question #3 Topic 1
DRAG DROP -
Drag and drop the descriptions from the left onto the correct QoS components on the right.

2026 Latest ExamsTorrent 350-401 PDF Dumps and 350-401 Exam Engine Free Share: <https://drive.google.com/open?id=1mJOLUMBrSIIldtn9dGIYVdUvQYfk8VjG>

Most of the study material providers fail to provide insight on the 350-401 real exam questions to the candidates of certification exams. There is such scene with ExamsTorrent products. They are in fact made, keeping in mind the 350-401 Actual Exam. Thus every 350-401 exam dumps is set in line with the format of real exam and introduces the candidate to it perfectly.

Exam Introduction

The Cisco 350-401 Exam is an entry-level qualification for professionals who wish to pursue careers in industrial networking. It is targeted at individuals who work in industrial environments handling industrial devices like units, programmable logic controllers (PLCs), sensors, and substation equipment. Volume, high availability, energy conservation, and safety are among the key security priorities in industrial environments. To meet these requirements, organizations are embracing the Internet Protocol (IP) telephony field.

The exam measures the knowledge and skills of the candidate on a wide range of key topics, including IP Telephony fundamentals, IP Telephony security, IP Video Fundamentals, and Delivery Systems, Unified Communications technologies, Collaboration Technologies, and Infrastructure Groupware, Security Fundamentals and Fundamentals. Marks are awarded for passing each question and overall the total marks are the highest of those given on any of the required Cisco exams. Interactive exam questions include select all that apply, drag and drop, matching questions, and simulations.

Quiz Cisco - 350-401 - Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) –The Best Exam Cram Questions

Under the instruction of our 350-401 exam torrent, you can finish the preparing period in a very short time and even pass the exam successful, thus helping you save lot of time and energy and be more productive with our Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) prep torrent. In fact the reason why we guarantee the high-efficient preparing time for you to make progress is mainly attributed to our marvelous organization of the content and layout which can make our customers well-focused and targeted during the learning process with our 350-401 Test Braindumps. The high pass rate of our 350-401 exam prep is 99% to 100%.

How to prepare for Managing Industrial Networks with Cisco Networking Technologies (IMINS) Cisco 350-401 Exam:

It doesn't matter what the candidate is doing currently. The important thing is to start preparing and getting ready for the 350-401 Exam. A lot of people have taken their exams by hiring professionals, but you should be careful about this, they can claim that they are experts, but they may be not. Moreover, learning by this source could be expensive and time taking. Hiring an expert will give you a clear idea in few days, about them and you can decide whether to hire them or not.

To go through the managing industrial network with Cisco technologies 350-401 exam it is important that you understand the subject thoroughly. For that, you need to take the help of managing industrial networks with Cisco technologies 350-401 allfreedumps material. Our expert team, carefully researched and arranged wonderful brain exam dumps to guide & prep for the exam in a very short period of time. It will be easy for you because all the major concepts like routers, switches, cameras, etc. are covered in the Managing Industrial Networks with Cisco Networking Technologies (IMINS) Cisco 350-401 Exam. **Cisco 350-401 Dumps** are the only source of real preparation material that is available online for Managing Industrial Networks with Cisco Networking Technologies (IMINS) Cisco 350-401 Exam. The managing industrial network with Cisco technologies 350-401 test questions will make you feel comfortable while going through them. So go through all of them and do not forget to take a printout so that you can practice more on the Managing Industrial Networks with Cisco Networking Technologies (IMINS) Cisco 350-401 Exam prep.

A Cisco Managing Industrial Networks with Cisco Networking Technologies (IMINS) 350-401 printable PDF files are available on the official website of Cisco Systems. IPV 6 is a future-proof standard, and as cloud computing becomes popularized, 350-401 exam candidates will need to know how to configure the Cisco router for IPv6.

Cisco 350-401, also known as Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR), is a certification exam conducted by Cisco for IT professionals who want to validate their skills and knowledge in implementing core enterprise network technologies. 350-401 exam tests the candidates' ability to implement and troubleshoot the infrastructure of an enterprise network, including routing, switching, wireless, security, and automation. Passing 350-401 exam is a prerequisite for obtaining the Cisco Certified Network Professional (CCNP) Enterprise and Cisco Certified Specialist - Enterprise Core certifications.

Cisco Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) Sample Questions (Q51-Q56):

NEW QUESTION # 51

Refer to the exhibit. A network engineer must configure the router to use the ISE-Servers group for authentication. If both ISE servers are unavailable, the local username database must be used. If no usernames are defined in the configuration, then the enable password must be the last resort to log in. Which configuration must be applied to achieve this result?

```

enable secret cisco

aaa new-model

tacacs server ise-1
address 10.1.1.1
key cisco123!

tacacs server ISE-2
address 10.2.2.1
key cisco123!

aaa group server tacacs+ ISE-Servers
server name ise-1
server name ise-2

```

- A. aaa authorization exec default group ISE-Servers local enable
- **B. aaa authentication login default group ISE-Servers local enable**
- C. aaa authentication login error-enable
aaa authentication login default group enable local ISE-Servers
- D. aaa authentication login default group enable local ISE-Servers

Answer: B

NEW QUESTION # 52

Refer to the exhibit. An engineer receives an error when applying low latency queuing on a new switch. What is causing this policy to fail?

```

Switch# configure terminal
Switch(config)# class-map cmap
Switch(config-cmap)# exit
Switch(config)# class-map classmap1
Switch(config-cmap)# exit
Switch(config)# policy-map pmap
Switch(config-pmap)# class cmap
Switch(config-pmap-c)# priority
Switch(config-pmap-c)# exit
Switch(config-pmap)# class classmap1
Switch(config-pmap-c)# set DSCP CS2
Switch(config-pmap-c)# exit
Switch(config-pmap)# exit
Switch(config)# interface gigabitethernet 0/1/1
Switch(config-if)# service-policy output pmap

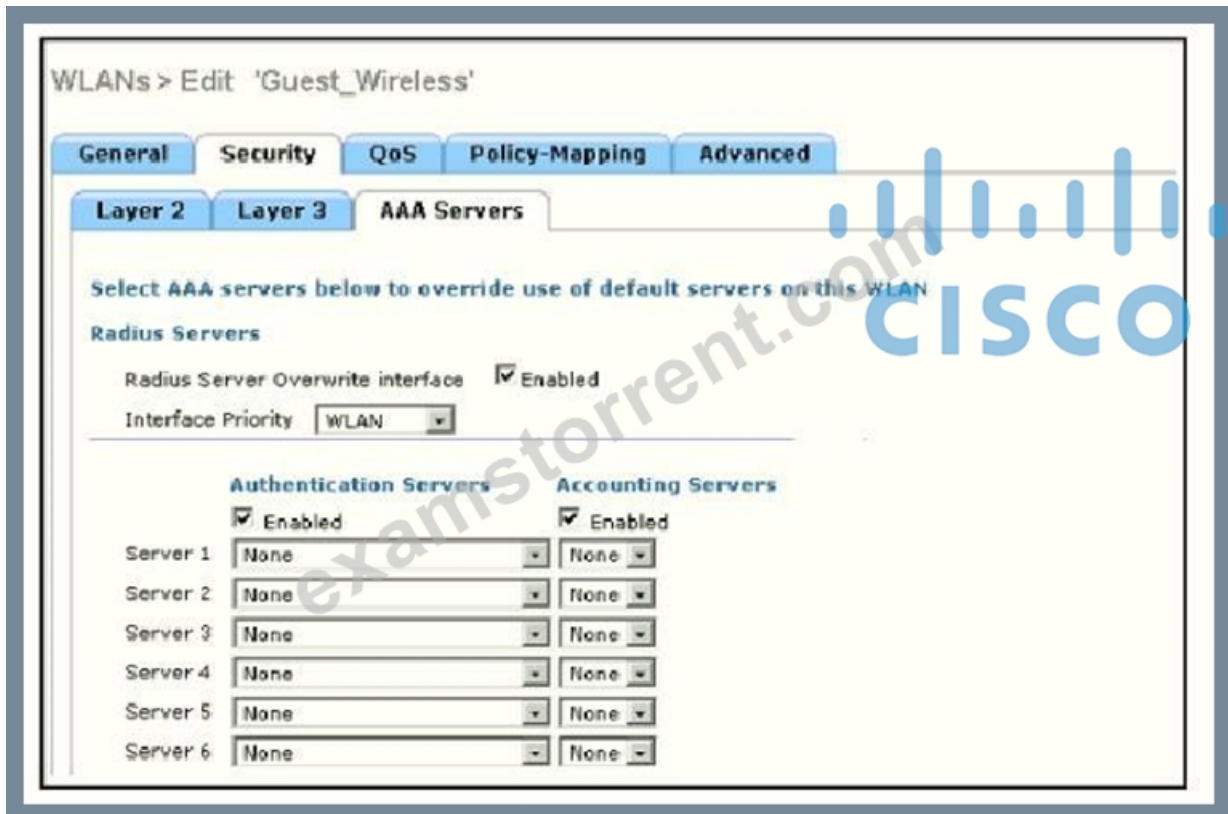

```

- **A. Low latency queuing needs to be applied inbound**
- B. There is no bandwidth rate applied for the priority queue.
- C. There is no action after the set statement.
- D. Traffic marking should be completed on a different policy

Answer: A

NEW QUESTION # 53

Refer to the exhibit.

Assuming the WLC's interfaces are not in the same subnet as the RADIUS server, which interface would the WLC use as the source for all RADIUS-related traffic?

- A. the controller virtual interface
- **B. the interface specified on the WLAN configuration**
- C. the controller management interface
- D. any interface configured on the WLC

Answer: B

NEW QUESTION # 54

Which IP SLA operation requires the IP SLA responder to be configured on the remote end?

- A. ICMP echo
- B. CMP jitter
- **C. UDP jitter**
- D. TCP connect

Answer: C

Explanation:

Cisco IOS IP SLA Responder is a Cisco IOS Software component whose functionality is to respond to Cisco IOS IP SLA request packets. The IP SLA source sends control packets before the operation starts to establish a connection to the responder. Once the control packet is acknowledged, test packets are sent to the responder. The responder inserts a time-stamp when it receives a packet and factors out the destination processing time and adds time-stamps to the sent packets. This feature allows the calculation of unidirectional packet loss, latency, and jitter measurements with the kind of accuracy that is not possible with ping or other dedicated probe testing.

Reference:

0aec806bfb52.html

The IP SLAs responder is a component embedded in the destination Cisco device that allows the system to anticipate and respond to IP SLAs request packets. The responder provides accurate measurements without the need for dedicated probes.

2/46sg/configuration/guide/Wrapper-46SG/swipsla.html

UDP Jitter measures the delay, delay variation(jitter), corruption, misordering and packet loss by generating periodic UDP traffic. This operation always requires IP SLA responder.

NEW QUESTION # 55

Refer to the exhibit.

```

Cat3650# show logging
[ ... out ... ]
*Sep 11 19:06:25.595: %PM-4-ERR_DISABLE: channel-misconfig error detected on Po1, putting Gi1/0/2
in err-disable state
*Sep 11 19:06:25.606: %PM-4-ERR_DISABLE: channel-misconfig error detected on Po1, putting Gi1/0/3
in err-disable state
*Sep 11 19:06:25.622: %PM-4-ERR_DISABLE: channel-misconfig error detected on Po1, putting Po1 in
err-disable state

Cat3650# show etherchannel summary
[ ... out ... ]
Group Port-channel Protocol Ports
-----
1      Po1(SD)          -          Gi1/0/2(D) Gi1/0/3(D)

Cat3650# show interface status err-disabled
Port      Name      Status Reason      Err-disabled Vlans
-----
Gi1/0/2   err-disabled channel-misconfig
Gi1/0/3   err-disabled channel-misconfig
Po1       err-disabled channel-misconfig

```

The administrator troubleshoots an EtherChannel that keeps moving to err-disabled. Which two actions must be taken to resolve the issue? (Choose two.)

- A. Ensure that interfaces Gi1/0/2 and Gi1/0/3 connect to the same neighboring switch.
- B. Ensure that the corresponding port channel interface on the neighbor switch is named Port-channel1.
- C. Reload the switch to force EtherChannel renegotiation
- D. Ensure that the switchport parameters of Port channel1 match the parameters of the port channel on the neighbor switch
- E. Ensure that the neighbor interfaces of Gi1/0/2 and Gi1/0/3 are configured as members of the same EtherChannel

Answer: A,E

Explanation:

Explanation

Causes of Errdisable

This feature was first implemented in order to handle special collision situations in which the switch detected excessive or late collisions on a port. Excessive collisions occur when a frame is dropped because the switch encounters 16 collisions in a row. Late collisions occur after every device on the wire should have recognized that the wire was in use. Possible causes of these types of errors include:

- * A cable that is out of specification (either too long, the wrong type, or defective)
- * A bad network interface card (NIC) card (with physical problems or driver problems)
- * A port duplex misconfiguration

A port duplex misconfiguration is a common cause of the errors because of failures to negotiate the speed and duplex properly between two directly connected devices (for example, a NIC that connects to a switch). Only half-duplex connections should ever have collisions in a LAN. Because of the carrier sense multiple access (CSMA) nature of Ethernet, collisions are normal for half duplex, as long as the collisions do not exceed a small percentage of traffic.
