최신업데이트버전FCSS_SDW_AR-7.4퍼펙트덤프최신버전인증덤프

Exam : **FCSS_SDW_AR-7.4**

Title : FCSS - SD-WAN 7.4 Architect

https://www.passcert.com/FCSS_SDW_AR-7.4.html

참고: ExamPassdump에서 Google Drive로 공유하는 무료 2025 Fortinet FCSS_SDW_AR-7.4 시험 문제집이 있습니다: https://drive.google.com/open?id=1xLV9oRpoJm5zLeb7XEd8p0nAhaGX4gA5

최근 IT 업종에 종사하는 분들이 점점 늘어가는 추세하에 경쟁이 점점 치열해지고 있습니다. IT인증시험은 국제에서 인정받는 효력있는 자격증을 취득하는 과정으로서 널리 알려져 있습니다. ExamPassdump의 Fortinet인증 FCSS_SDW_AR-7.4덤프는IT인증시험의 한 과목인 Fortinet인증 FCSS_SDW_AR-7.4시험에 대비하여 만들어진 시험전 공부자료인데 높은 시험적중율과 친근한 가격으로 많은 사랑을 받고 있습니다.

Fortinet FCSS_SDW_AR-7.4 시험요강:

주제	소개
주제 1	• Configure Performances SLAs: Designed for network administrators, this part focuses on setting up performance Service Level Agreements (SLAs) within SD-WAN environments. Candidates must show proficiency in defining criteria to monitor and maintain network performance and reliability.
주제 2	• Rules and Routing: Targeted at network engineers, this section assesses the ability to configure SD-WAN rules and routing policies. Candidates will be tested on managing traffic flow and prioritization across the SD-WAN infrastructure.

주제 3	• SD-WAN Configuration: This section of the exam measures the skills of network engineers and covers configuring a basic SD-WAN setup. Candidates are expected to demonstrate their ability to define SD-WAN members and zones effectively, ensuring foundational network segmentation and management.
주제 4	• Advanced IPsec: Intended for security engineers, this section covers the deployment of advanced IPsec topologies for SD-WAN, including hub-and-spoke models, ADVPN configurations, and complex multi-hub or multi-region deployments. Candidates need to demonstrate expertise in securing wide-area networks using IPsec technologies.
주제 5	• Centralized Management: This domain evaluates network administrators' competence in deploying and managing SD-WAN configurations centrally using FortiManager. It includes tasks such as implementing branch configurations and utilizing overlay templates to streamline network management.

FCSS_SDW_AR-7.4인증덤프 샘플체험 - FCSS_SDW_AR-7.4인기자격증 시험덤프

ExamPassdump의 덤프선택으로Fortinet FCSS_SDW_AR-7.4인증시험에 응시한다는 것 즉 성공과 멀지 않았습니다. 여러분의 성공을 빕니다.

최신 Fortinet Certified Solution Specialist FCSS_SDW_AR-7.4 무료샘플문제 (Q35-Q40):

질문 # 35
What is true about SD-WAN multiregion topologies?

- A. Regions must correspond to geographical areas.
- B. It is not compatible with ADVPN.
- C. Routing between the hub and spokes must be BGP.
- D. Each region has its own SD-WAN topology.

정답：D

질문 # 36
Refer to the exhibit.An administrator checks the status of an SD-WAN topology using the FortiManager SD-WAN monitor menus. All members are configured with one or two SLAs. Which two conclusions can you draw from the output shown? (Choose two.)
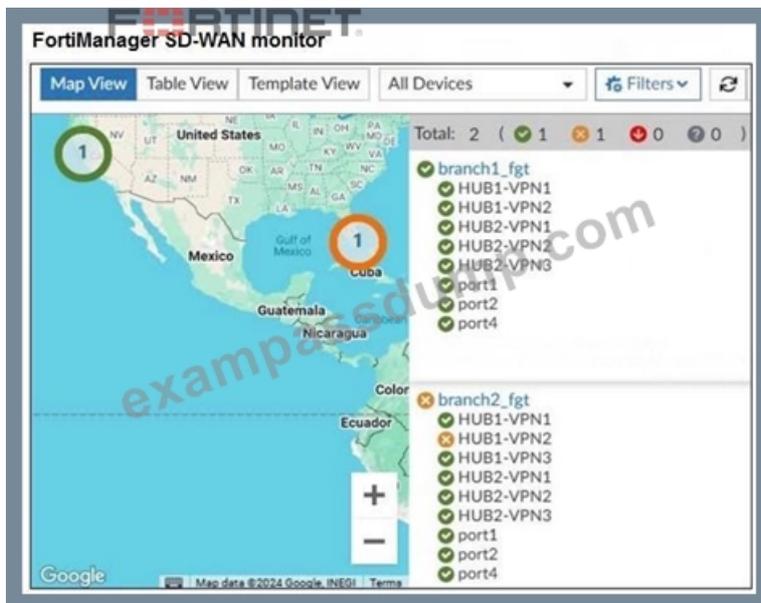

- A. This SD-WAN topology contains only two branch devices.
- B. branch2_fgt establishes six tunnels to the hubs and they are all up.
- C. The template view should be used to see the hub devices.
- D. One member of branch2_fgt is missing the SLAs.

정답：**A,D**

설명：

The monitor shows only two devices (branch1_fgt and branch2_fgt), indicating the topology contains two branch devices.
HUB1-VPN2 under branch2_fgt has an orange X, indicating it's up but not meeting SLA requirements - likely due to missing or failing SLA targets.

질문 # 37

Which three factors about SLA targets and SD-WAN rules should you consider when configuring SD-WAN rules? (Choose three.)

- A. Member metrics are measured only if a rule uses the SLA target.
- B. When configuring an SD-WAN rule, you can select multiple SLA targets from different performance SLAs.
- C. SLA targets are used only by SD-WAN rules that are configured with a Lowest Cost (SLA) strategy.
- D. When configuring an SD-WAN rule, you can select multiple SLA targets if they are from the same performance SLA.
- E. SD-WAN rules can use SLA targets to check whether the preferred members meet the SLA requirements.

정답：**B,C,E**

설명：
The use of SLA targets is specific to certain SD-WAN strategies. The "Lowest Cost (SLA)" and
"Maximize Bandwidth (SLA)" strategies are explicitly designed to use the configured SLA targets to make routing decisions. The "Best Quality" strategy uses performance metrics but does not necessarily require or reference SLA targets in the same way, while "Manual" does not use metrics at all for path selection.
This is a core function of SD-WAN rules with SLA targets. The purpose of configuring an SLA target with specific thresholds for latency, jitter, and packet loss is to define what is considered
"acceptable" performance for an application. SD-WAN rules then use these targets to check if the members (interfaces) meet these requirements before a flow is steered over them, ensuring that a preferred path still offers a good user experience.
FortiGate allows for a single SD-WAN rule to reference multiple, different performance SLAs. This is crucial for complex deployments where a single SD-WAN rule needs to handle traffic for multiple applications that have distinct performance requirements. For example, a single rule might direct VoIP traffic based on one performance SLA with strict latency/jitter targets, while simultaneously handling general web traffic using another performance SLA with more lenient requirements.

질문 # 38

Refer to the exhibits. You use FortiManager to manage the branch devices and configure the SD- WAN template. You have

configured direct internet access (DIA) for the IT department users.

Now. you must configure secure internet access (SIA) for all local LAN users and have set the firewall policies as shown in the second exhibit.

Then, when you use the install wizard to install the configuration and the policy package on the branch devices, FortiManager reports an error as shown in the third exhibit. Which statement describes why FortiManager could not install the configuration on the branches?

SD-WAN template on FortiManager

Name ⇕	Assigned to Device/Group ⇕	Interface ⇕
branches	2 Devices in Total View Details > ⬆ branch1_fgt [root] ⬆ branch2_fgt [root]	🖳 port1 🖳 port2

Firewall policies

□ Underlay (2/3 Total:2)

2	SIA	□ LAN	□ port1	⇌ LAN-net	⊟ all	🕓 always	🔁 FTP 🔁 HTTP 🔁 HTTPS	✓ Accept	no-inspection default
3	DIA	□ LAN	□ underlay	⊟ LAN-IT	⊟ all	🕓 always	🔁 ALL	✓ Accept	default certificate-i... default

FortiManager error message

Install Wizard – Validate Devices(branches_pp)(3/4)   _ □ ×

⚠ **Task finished with errors.**

Installation Preparation Total: 3/3. ✓ Success: 1. ⚠ Warning: 0. ✗ Error: 2. ▭ Show Details   100%

✓ Interface Validation
✓ Policy and Object Validation
✓ Ready to Install

⊙ Install Preview   📑 Policy Package Diff   Search...   ⊕ ⋰

☐	Device Name ⇕	Status ⇕	Action ⇕	⚙
☐	⬆ branch1_fgt	⊘ Copy Failed	Log	
☐	⬆ branch2_fgt	⊘ Copy Failed	Log	

- A. You cannot install firewall policies that reference an SD-WAN member.
- B. You cannot install SIA and DIA rules on the same device.
- C. You cannot install firewall policies that reference an SD-WAN zone.
- D. You must direct SIA traffic to a VPN tunnel.

정답：A

설명：

In FortiManager, firewall policies must reference SD-WAN zones, not individual SD-WAN members (interfaces like port1 or port2). The SIA rule incorrectly references port1, which is a member - not a zone - causing the installation failure during validation.

질문 # 39
Exhibit.

Refer to the exhibit, which shows an SD-WAN zone configuration on the FortiGate GUI. What can you conclude about the zone and member configuration on this device?

- A. You can delete the virtual-wan-link zones.
- B. The overlay-factories zone contains no member.
- C. The underlay zone contains three members.
- D. You can move HUB1-VPN3 from the HUB1 zone to the overlay-shops zone.

정답：B

설명：
In the SD-WAN GUI, the absence of members in a zone is visually represented, and the Fortinet guide confirms:
"If a zone such as overlay-factories contains no members, it will be displayed as empty in the SD-WAN GUI.
This may occur when the zone is reserved for future expansion, or if members have been temporarily removed for maintenance or reconfiguration. Traffic cannot be steered via an empty zone until at least one SD-WAN member is added." Such visual cues help operators quickly assess configuration status and readiness.
